Letters of transmittal

21 May 2008

Pursuant to United Nations Children's Fund financial regulation 13.3, enclosed are the financial report and statements for the biennium 2006-2007 as prepared by the Comptroller.

Copies of these financial statements are also being transmitted to the Advisory Committee on Administrative and Budgetary Questions.

(Signed) Ann M. **Veneman** Executive Director

The Chairman of the Board of Auditors United Nations New York

30 June 2008

I have the honour to transmit to you the report of the Board of Auditors on the financial statements of the United Nations Children's Fund for the biennium ended 31 December 2007.

(Signed) Philippe **Séguin**First President of the Court of Accounts of France and
Chairman, United Nations Board of Auditors

The President of the General Assembly of the United Nations New York

Chapter I

Financial report for the biennium ended 31 December 2007

Introduction

1. The United Nations Children's Fund (UNICEF) submits herewith its financial report, accompanied by 10 statements and 3 schedules. Statements I to IV are presented in line with the formats agreed upon by the United Nations System Chief Executives Board for Coordination (CEB) as a step towards harmonizing the accounts of agencies in the United Nations system. The financial report summarizes the financial results of UNICEF activities for the biennium ended 31 December 2007.

Income

2. UNICEF income in the biennium totalled \$5,765 million. Income comprised \$2,133 million under regular resources, \$2,503 million under other resources (regular) and \$1,129 million for other resources (emergency). The breakdown of UNICEF income by source is: 58 per cent (\$3,320 million) from Governments; 29 per cent (\$1,667 million) from fund-raising campaigns, the sale of greeting cards and individual donations; and 6 per cent (\$366 million) from miscellaneous sources, including interest and exchange rate revaluation of assets and liabilities. An amount of \$412 million (7 per cent) was contributed under inter-organizational arrangements.

Expenditure

3. UNICEF expenditure for the biennium was \$5,104 million, consisting of \$1,575 million for programme cooperation from regular resources, \$1,994 million for programme cooperation from other resources (regular) and \$1,365 million from other resources (emergency). The remaining expenditure of \$149 million was for management and administration, and \$21 million was for security.

Supported deliveries

4. UNICEF handled supported deliveries on behalf of third parties valued at \$506 million during the biennium. The deliveries are not reflected in the financial accounts of UNICEF, although they are handled through the administrative structures of the organization.

Trust funds

5. Trust fund receipts in the biennium totalled \$1,602 million and disbursements and obligations \$1,630 million. Trust funds do not form part of the income of UNICEF. Those funds are earmarked resources entrusted to UNICEF by various entities, including Governments, other organizations in the United Nations system and non-governmental organizations, mainly to cover the cost of procuring supplies but also to provide services on behalf of those entities. They also include funds provided by Government sponsors to cover the costs of Junior Professional Officers.

Cash holdings and investments

6. As at 31 December 2007, UNICEF had total cash holdings and investments of \$2,675 million, which included unspent balances from trust funds amounting to \$315 million. Some \$2,101 million was held in interest-bearing term deposits, \$445 million was in investments and \$128 million was in current bank accounts. Cash on hand amounted to \$1 million globally.

Approved programmes

7. During the biennium, the Executive Board approved an amount of \$6,225 million for new programmes for children in countries with which UNICEF cooperates, as well as for regional and interregional projects. The total included \$2,527 million for programmes to be funded from UNICEF regular resources and \$2,581 million for projects that the Board approved as worthy of support and that were financed by pledges of supplementary funds made during the biennium. The total also included \$1,117 million for projects financed by pledges for emergency relief and rehabilitation.

Chapter II

Report of the Board of Auditors

Summary

The Board of Auditors has audited the financial statements of the United Nations Children's Fund (UNICEF) for the biennium ended 31 December 2007. The audit was conducted through visits to 36 field offices, including the regional offices; the Private Sector Division in Geneva; and the Supply Division in Copenhagen, as well as a review of the financial transactions and operations at UNICEF headquarters in New York.

The Board also addressed special requests made by the Advisory Committee on Administrative and Budgetary Questions and the General Assembly.

The Board issued an unqualified audit opinion on the financial statements of the United Nations Children's Fund for the biennium ended 31 December 2007 (see chapter III).

Follow-up of previous recommendations

In response to the request of the Advisory Committee on Administrative and Budgetary Questions and in line with paragraph 7 of General Assembly resolution 59/264 A, the Board has evaluated the ageing of the previous recommendations contained in its report for biennium 2004-2005 (A/61/5/Add.2, chap. II) that had not yet been fully implemented and has indicated the financial periods in which such recommendations were first made. Of the 96 recommendations, 82 had been fully implemented, 13 were still under implementation and only one remained to be implemented.

Overall financial overview

For the period under review, total income was \$5.76 billion, compared with \$4.72 billion for the previous biennium, an increase of 22 per cent. Total expenditure amounted to \$5.10 billion, compared with \$3.79 billion for the previous biennium, an increase of 35 per cent. This resulted in a surplus of \$639 million after write-offs and prior-period adjustments, compared with a surplus of \$912 million in the preceding biennium. Assets increased by 24 per cent, or \$668 million, from \$2.77 billion as at the end of 2005 to \$3.44 billion as at 31 December 2007. Of the \$668 million increase in assets, \$445 million pertained to investments in securities. There was a slight increase in total liabilities, from \$778.8 million as at the end 2005 to \$799.3 million as at 31 December 2007. Total reserves and fund balances also increased, to \$2.64 billion as at 31 December 2007 from \$1.99 billion at the end of the biennium 2004-2005.

Unliquidated obligations

The Board noted that UNICEF had cancelled unliquidated obligations relating to prior periods amounting to \$45.32 million but had not made the necessary adjustments against opening reserves. Instead, the amount of \$25.79 million (the programme budget allotment for which was still open) was credited against expenditure for the biennium 2006-2007 while \$19.53 million (the programme budget allotment for which was already closed) was credited to income.

Cash and short-term deposits

Reconciling items for unrecorded deposits (\$5.71 million), bank charges (\$1.91 million) and stale-dated cheques (\$174,859) remained unadjusted in UNICEF accounts as at 31 December 2007.

The Board also noted that balances (Systems, Applications and Products — Financial and Logistics System (SAP-FLS) figures) of field office bank accounts recorded by UNICEF were higher by \$344,492 than those recorded by the field offices as at the end of the biennium under review.

Contributions receivable

The \$5 million balance of the provision for uncollectible contributions account had remained unchanged since it was set up in 1997. However, for the period from 2000 to 2005, amounts totalling \$30.98 million were written off against income as uncollectible contributions. For the current biennium, a further amount of \$19.48 million was written off. The initial provision of \$5 million for uncollectible contributions is, therefore, in need of review.

Land

While UNICEF has title to and possession of the deeds of transfer to its name of several parcels of land in four countries, they were not recorded in the books nor disclosed in the notes to the financial statements.

Lease of building

In January 1994, UNICEF entered into an amended lease agreement with the United Nations Development Corporation (UNDC) for the Three United Nations Plaza building. On the expiration of the lease, title to the property may be transferred to UNICEF for consideration of \$1 if it meets the conditions of continuous and uninterrupted stay in the building and maintenance of its worldwide headquarters in New York City until 2026. The terms of the lease arrangements have been disclosed in the notes to the financial statements. To date, UNICEF has paid approximately \$82 million towards the lease costs, and the actual value of future lease payments is approximately \$109 million.

End-of-service liabilities, including after-service health insurance

The notes to the financial statements for the period under review reflect end-of-service liabilities amounting to \$378.02 million. Of that amount, \$292.38 million represent after-service health insurance, \$45.15 million pertain to unused vacation leave credits and \$40.49 million represent repatriation benefits.

The disclosed accrued liability for after-service health insurance of \$292.38 million is based on the valuation made by a consulting actuary as at 31 December 2005 because the revised valuation as at the end of 2007 had not yet been submitted by the new actuary when the financial statements were being prepared. As at 31 December 2007, UNICEF had increased its fund reserve for after-service health insurance to \$150 million, from \$60 million as at 31 December 2005.

Progress towards the implementation of the International Public Sector Accounting Standards

In response to the comments of the Advisory Committee on Administrative and Budgetary Questions (A/61/350), the Board reviewed the progress of UNICEF towards the implementation of the International Public Sector Accounting Standards (IPSAS), as well as the development or upgrading of any related enterprise resource planning systems. As at 30 April 2008, UNICEF had not prepared an IPSAS implementation plan. It indicated, however, that it had carried out a review of the major impact areas of IPSAS on UNICEF business practices, that a cost estimate of IPSAS adoption had been approved and that a project team was in the process of being recruited. The Board is of the view that the pace of preparations for IPSAS implementation needs to be accelerated.

Procurement and contract management

At the Private Sector Division, the review of the performance of suppliers was not documented. There is, therefore, a risk that bid solicitation documents might be extended to suppliers with history of unsatisfactory performance.

At three country offices, the actual delivery of procured items was delayed by as much as 240 days.

Consultants, experts and temporary assistance

The Board's review of special service agreements of consultants, experts and temporary assistance staff disclosed a number of deficiencies in hiring and contracting practices in a number of regional and field offices, including extending contracts beyond the allowable periods.

Programme and project management

At a number of field offices, UNICEF did not evaluate actual output against annual workplans. In some cases, planned results were not stated in specific and measurable terms. As a result, the efficiency and effectiveness of programme and project implementation could not be satisfactorily evaluated at those offices.

Revenue-producing activities

While the National Committees for UNICEF are authorized to retain 25 per cent of the proceeds realized from the sale of Greeting Card Operation products, only 4 of the 36 National Committees that submitted final revenue and expenditure reports for 2006 had retained less than 25 per cent while 32 had retained from 30 to 100 per cent.

Internal audit function

It is the policy of the Office of Internal Audit to audit country offices at least once every five years. However, 16 field offices were not audited from 2003 to 2007. Verifiable explanations were given by UNICEF for their postponement. Nonetheless, all 16 field offices were included in the 2008 audit plan, 11 of which had been audited by 30 June 2008.

Internal audit findings

The Office of Internal Audit audited 50 country offices and 1 zone office during the biennium. Of the 385 audit observations issued in 2007, 70 per cent had been acted upon favourably. Of the 490 audit observations issued in 2006, 9 remained open and all pertained to 1 country office. Twenty of the open observations from 2007 and two from 2006 were rated as high risk. The Board is of the view that these high-risk issues should be addressed immediately.

Write-offs and disposals

In biennium 2006-2007, UNICEF approved the write-off of assets totalling \$20.98 million, consisting of uncollectible contributions of \$19.48 million, inventory stock of \$820,594, uncollectible receivables amounting to \$285,347 and other assets totalling \$393,749.

Cases of fraud and presumptive fraud

UNICEF reported to the Board a total of 58 cases of fraud and presumptive fraud for 2006-2007 as against 42 cases for 2004-2005.

Recommendations

The Board made several recommendations on the basis of its audit. The main recommendations are set out in paragraphs 9 and 10 of the report.

A. Introduction

1. Mandate, scope and methodology

- 1. The Board of Auditors has audited the financial statements of the United Nations Children's Fund and has reviewed its operations for the financial period from 1 January 2006 to 31 December 2007 in accordance with General Assembly resolution 74 (I) of 7 December 1946. The audit was conducted in conformity with Article VII of the Financial Regulations and Rules of the United Nations and the annex thereto, as well as the International Standards on Auditing. Those standards require that the Board plan and perform the audit to obtain reasonable assurance as to whether the financial statements are free of material misstatement.
- 2. The audit was conducted primarily to enable the Board to form an opinion as to whether the financial statements presented fairly the financial position of UNICEF as at 31 December 2007 and the results of its operations and cash flows for the financial period then ended in accordance with the United Nations system accounting standards. This included an assessment as to whether the expenditures recorded in the financial statements had been incurred for purposes approved by the governing bodies and whether income and expenditure had been properly classified and recorded in accordance with the UNICEF Financial Regulations and Rules. The audit also included a general review of financial systems and internal controls and a test examination of the accounting records and other supporting evidence to the extent that the Board considered necessary to form an opinion on the financial statements.
- 3. In addition to auditing the accounts and financial transactions, the Board reviewed UNICEF operations under United Nations financial regulation 7.5. This requires the Board to make observations with respect to the efficiency of the financial procedures, the accounting system, the internal financial controls and, in general, the administration and management of UNICEF operations.
- 4. The present report addresses the specific request of the Advisory Committee on Administrative and Budgetary Questions (A/59/736, para. 8) to evaluate the ageing of the recommendations made in the previous biennium that were under implementation or not yet implemented. The General Assembly had also requested the Board to follow up on the previous recommendations and to report on them accordingly. Those matters are addressed in paragraphs 11 to 16 below.
- 5. The Board continued to report the results of audits to UNICEF in the form of management letters containing detailed observations and recommendations. This practice allowed for ongoing dialogue with the UNICEF administration. In this regard, 43 management letters were issued covering the period under review.
- 6. Where observations in the present report refer to specific locations, such observations are limited to the locations specified. They do not in any way imply that they are applicable to other locations nor do they imply that they do not also exist at other locations.
- 7. The present report covers matters that, in the opinion of the Board, should be brought to the attention of the General Assembly. The Board's observations and conclusions were discussed with UNICEF, whose views have been appropriately reflected in the report.

08-43952 **7**

2. Coordination with internal audit

8. The Board coordinated with the UNICEF Office of Internal Audit in the planning of the audit. In order to avoid duplication of effort, the Board considered the UNICEF offices audited by the Office of Internal Audit in preparing its workplan. The results of internal audits in country offices provided valuable input in planning the focus areas of the Board. In addition, the Board reviewed the internal audit coverage of the operations of the Office to assess the extent to which reliance could be placed on its work.

3. Main recommendations

- 9. The Board's main recommendations are that UNICEF:
- (a) Make the necessary adjustments against reserves and fund balances for the cancellation of outstanding prior-period obligations (para. 24);
- (b) Consider the cancellation of outstanding obligations relating to the current biennium as a reduction to recorded expenditure instead of as income (para. 24);
- (c) Assess periodically the collectibility of the amounts shown as contributions receivable and make adequate provision for any amounts that are unlikely to be collected (para. 31);
- (d) Monitor closely cash assistance provided to Governments to ascertain that they are utilized in accordance with the objectives of the approved projects (para. 61);
- (e) Clear all long-outstanding cash assistance/transfers to Governments (para. 61);
- (f) Make further cash transfers to implementing partners only upon the submission of cash utilization reports (para. 61);
- (g) Review all reconciling items appearing on the monthly bank reconciliation statements of field offices and make the appropriate adjustments to the accounting records immediately after each monthly review (para. 76);
- (h) Carry out a comprehensive inventory of all its landholdings and reconcile the results with the related asset records to correctly value them and record them in the books of accounts (para. 96);
- (j) Develop a plan detailing the various steps to be taken leading to the full implementation of the International Public Sector Accounting Standards by 2010 (para. 121);
- (k) Take measures to improve the reliability of the inventory records in the field offices (para. 146);
- (1) Review its non-expendable property management processes and control of property records (para. 150);
- (m) Ensure that the Private Sector Division enforces financial rule 9.04 relating to the retention of income by National Committees (para. 189).

10. The Board's other recommendations appear in paragraphs 36, 42, 47, 52, 69, 79, 81, 83, 90, 102, 107, 117, 119, 126, 130, 141, 157, 164, 169, 171, 175, 179, 184, 190, 196, 200 and 206. The recommendations do not address sanctions or disciplinary steps that UNICEF may wish to impose on defaulting officials for consistent failure to ensure compliance with the Financial Regulations and Rules of UNICEF, administrative instructions and other related directives.

Detailed findings and recommendations

Follow-up of previous recommendations

- 11. In accordance with section A, paragraph 7, of General Assembly resolution 51/225, the Board reviewed the actions taken by UNICEF to implement the recommendations made in its report for the biennium ended 31 December 2005.
- 12. Of the 96 recommendations made in the previous biennium, 82 (85 per cent) had been fully implemented, 13 (14 per cent) were under implementation and 1 (1 per cent) had not been implemented (see annex I).

Recommendations under implementation

Subject of the recommendation

13. The 13 recommendations made in 2004-2005 that were still under implementation are shown in detail in table II.1.

Table II.1 Details of recommendations still under implementation

- 4. Attach an annex on financial reporting and transfers of funds to the agreements with National Committees

implications of the context of , and an approved by January 2008 to ation review.

Status as at 30 March 2008

UNICEF has been working with the United Nations and other United Nations Development Group Executive Committee agencies since August 2006 on the establishment of harmonized financial regulations and rules for eventual approval by the Executive Board.

The first draft of the harmonized financial rules were still subject to review and consensus.

The annex is still being finalized, however, its contents will be sent to National Committees in the form of an official letter by mid-April 2008.

Status as at 30 March 2008 Subject of the recommendation 5. Harmonize the accounting treatment The Board noted that implementation of private sector fund-raising options were still being reviewed and proceeds the target date for full implementation is the last quarter of 2010, in conjunction with the implementation of IPSAS. 6. Revise E/ICEF/Organization/Rev.3 to A project team was created to revise the adapt the accountabilities of each unit description of accountabilities, a case to the core commitments for children study was carried out, and a project in emergencies note was developed towards achieving the recommended action. 7. Update the list of approved Management is currently updating not emergency items only its list of approved emergency items but also its new sourcing, procurement and warehousing strategy based on the principles of category management. UNICEF reported that its new target date for completion was the third quarter of 2008. 8. Assist country offices to ensure that The performance monitoring system for they produce an extended assessment the country offices and related training in compliance with the core is in progress, as the system has been commitments to children in fully piloted in Bangladesh. In line with emergencies the Board's follow-up, UNICEF intends full implementation to be completed in the fourth quarter of 2008. 9. Identify ways of quickly assessing The Board noted that the review process commenced only in February 2008 and and raising the financial and administrative capacity of that a concept paper had already been developed, and questionnaires on implementing partners during emergencies revision were sent to country offices. Completion of the implementation of the recommendation was targeted for the third quarter of 2008. 10. Liaise with UNOPS to ensure that Implementation was validated to be still financial procedures for direct ongoing in the Sri Lanka country office construction adequately safeguard based on documents submitted to the **UNICEF** interests Board. UNICEF informed the Board that the 11. Advocate, in cooperation with other United Nations organizations, the recommended review could not be expeditious review of the medical started because the post of the Chief, Medical and Life Insurance Section, of insurance plan

10 08-43952

the United Nations had remained vacant

for a prolonged period.

Subject of the recommendation	Status as at 30 March 2008
	UNICEF, however, continues to support the effort and to advocate for completion of the study and will actively participate in the review once the exercise resumes.
12. Expedite the development of its emergency "talent pool"	As at 31 December 2007, the talent pool was still to be part of phase two of the SAP-Human Resources system, which is now scheduled for implementation in the fourth quarter of 2008. UNICEF has been actively advancing the planning effort for the implementation of phase two in the fourth quarter of 2008.
13. Revise its long-term arrangements with suppliers after updating its approved emergency items list	UNICEF responded that it was updating not only its list of approved emergency items but also preparing new sourcing of suppliers with a new target date in the third quarter of 2008. UNICEF also explained that the procurement and warehousing strategy was being enhanced based on the principles of category management, followed by the revision of the long-term arrangements with suppliers, as recommended by the Board.

Recommendation not implemented

14. One recommendation was noted by the Board not to have been implemented. In its previous report, the Board recommended that UNICEF monitor more closely the target arrival date of emergency local orders and the date of their issuance (A/61/5/Add.2, chap. II, para. 113). While UNICEF indicated that this recommendation was under implementation, the Supply Division in Copenhagen reported that the monitoring of local orders was not feasible, as field offices managed their own procurement via the Programme Manager System (ProMS), hence there was no practical way for UNICEF to retrieve the information from ProMS for purposes of monitoring. In addition, while the Systems, Applications and Products — Financial and Logistics System would enable monitoring of local procurement, the system would have to be rolled out to the field offices in 2008 and 2009.

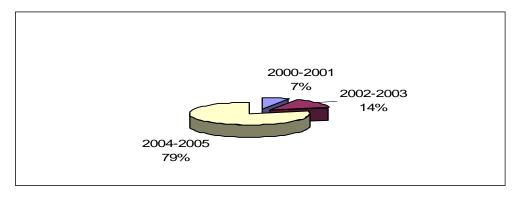

Ageing of previous recommendations

15. The Board also evaluated the ageing of the recommendations made in the previous biennium that were under implementation or had not yet been implemented, as requested by the Advisory Committee on Administrative and

Budgetary Questions (A/59/736, para. 8). The financial period in which each recommendation was first made is indicated in annex I.

16. Of the 14 recommendations that were under implementation and had not yet been implemented, 79 per cent (11 recommendations) related to the 2004-2005 period, 14 per cent (2 recommendations) to 2002-2003 and 7 per cent (1 recommendation) related to 2000-2001, as depicted in figure II.I.

Figure II.I Status of implementation of recommendations

2. Financial overview

17. Since the biennium 2004-2005, UNICEF income had increased by 22 per cent, from \$4.72 billion to \$5.77 billion in the biennium under review. The increase in total income was attributed to the combined increase in voluntary contributions, interest income and funds received under inter-organizational arrangements. The 21 per cent rise in voluntary contributions, from \$2.76 billion in the previous biennium to \$3.35 billion in the biennium under review, resulted mainly from an increase in supplementary resources (55 per cent) and in regular resources (35 per cent) (see table II.2).

Table II.2 Comparison of income for the bienniums 2004-2005 and 2006-2007

	2004	!-2005	2006-	2007	Increase/((decrease)
Type of income	Amount ^a	Percentage	Amounta	Percentage	Amounta	Percentage

Total	4 715		5 765		1 050	22

^a Millions of United States dollars.

18. The cash position of UNICEF was healthy, at 65 per cent of total assets at the end of the biennium 2006-2007. The increase in the cash balance when compared

with the prior biennium was only 2 per cent. Inventories registered an 80 per cent increase at the end of 2007. The key financial ratios are detailed in table II.3.

Table II.3 **Key financial ratios**

3. Statement of income and expenditure

19. Income for the period under review amounted to \$5.76 billion, while expenditure amounted to \$5.10 billion, resulting in a surplus after write-offs and prior-period adjustments of \$639.47 million. Comparative income and expenditure for the bienniums 2004-2005 and 2006-2007 are shown in figure II.II.

Figure II.II

Income and expenditure for the bienniums 2004-2005 and 2006-2007

20. The increase in expenditure of \$1.31 billion, or 35 per cent, was attributable mainly to the increase in programme assistance expenditure of \$1.33 billion.

Unliquidated obligations

21. Unliquidated obligations as at 31 December 2007 amounted to \$273.72 million, representing 5 per cent of total expenditure, and had decreased slightly by \$10 million, or 3.52 per cent, in the current biennium compared with the previous period. Figure II.III shows unliquidated obligations against total expenditure for the bienniums 2004-2005 and 2006-2007.

^b A high indicator depicts a healthy financial position.

^c A low indicator is a reflection that insufficient cash is available to settle debts.

^d A low indicator depicts a healthy financial position.

^e A low indicator is a positive reflection that obligations are being liquidated.

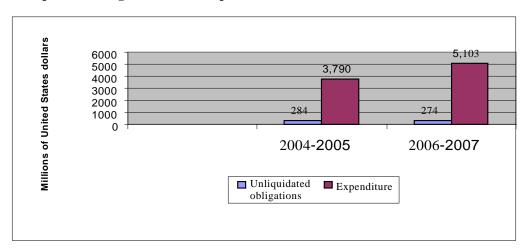

Figure II.III
Unliquidated obligations versus expenditure

Cancellation of outstanding budgetary obligations

- 22. The Board noted that the cancellation of prior-period obligations was not properly recorded in the accounts. Outstanding budgetary obligations totalling \$25.79 million pertaining to the biennium 2004-2005 for which programme budget allotments were still open were incorrectly cancelled against the expenses of the biennium 2006-2007, resulting in the understatement of reported expenditure for the current biennium. In addition, the cancellation of \$19.53 million in outstanding budgetary obligations relating to the biennium 2004-2005 for which programme budget allotments were already closed was recorded as miscellaneous income, resulting in the overstatement of income for the current period.
- 23. Likewise, the cancellation of outstanding budgetary obligations raised in the first year of the current biennium for which programme budget allotments were closed were also recorded as miscellaneous income.
- 24. The Board recommends that UNICEF: (a) make the necessary adjustments against reserves and fund balances for the cancellation of outstanding prior-period obligations; and (b) consider the cancellation of outstanding obligations relating to the current biennium as a reduction to recorded expenditure instead of as income.
- 25. UNICEF commented that for the purpose of consistency between UNICEF reporting periods and between agencies, it proposed to maintain the current reporting on its obligations, but acknowledged that its note on the accounting policy with respect to the liquidation of obligations should be expanded.

Provision for uncollectible contributions receivable

26. The statement of assets, liabilities, reserves and fund balances (statement II) as at 31 December 2007 reports a provision for uncollectible contributions receivable of \$5 million. Note 11 to the financial statements discloses that UNICEF maintains the provision for potentially uncollectible contributions receivable in line with the recommendation of the Board. The Board notes that in its report for the biennium 1994-1995 (A/51/5/Add.2, chap. II, para. 37), it recommended that UNICEF

establish a reserve for its doubtful receivables to ensure an accurate disclosure of its realizable assets but did not specify an amount.

- 27. In the biennium 1996-1997, UNICEF set up a provision for uncollectible contributions in the amount of \$5 million, but the amount has remained unchanged because the write-off of uncollectible contributions was deducted directly against income. No periodic allowance was provided for when new contributions were earned.
- 28. Accounting records and reports showed that uncollectible pledges written off by UNICEF from 2000 to 2007 ranged from \$8.12 million to \$19.48 million per biennium, representing 5 to 8 per cent of the contributions receivable balances of the pledges made during the biennium. Table II.4 provides a breakdown of the \$50.46 million in contributions receivable that were written off in the past four bienniums.

Table II.4

Write-offs of contributions receivable

	bale	ributions receivable ances of the pledges luring the biennium ^a	
Biennium	(Thousands of United States dollars)		Percentage of write-off
2000-2001	10 411	190 352	5
2002-2003	12 453	261 962	5
2004-2005	8 119	178 380	5
2006-2007	19 479	242 653	8
Total	50 462		

^a Excludes the balances of pledges made before the biennium.

- 29. Similarly, in 2006-2007, the Private Sector Division made the same direct write-off of uncollectible accounts receivables deemed irrecoverable, amounting to \$1.96 million.
- 30. In view of the large amounts of write-offs of receivables over the years, the Board is of the view that the provision of \$5 million for uncollectible receivables from contributions might not be adequate.
- 31. The Board recommends that UNICEF assess periodically the collectibility of the amounts shown as contributions receivable and make adequate provision for any amounts that are unlikely to be collected.

Open outstanding budgetary obligations with small balances after the settlement of obligations

32. UNICEF financial rule 112.18 requires that outstanding budgetary obligations retained against biennial budget appropriations or programme allocations be reviewed periodically by certifying officers. Likewise, under existing procedures prescribed in its accounting instructions, UNICEF is required to periodically review unliquidated obligations and to cancel those that are no longer valid.

- 33. The Board noted that the reported total unliquidated obligations as at the end of the biennium 2006-2007 amounted to \$273.72 million, consisting of 24,997 individual outstanding budgetary obligations. Verification of obligations as at 31 December 2007 revealed that 6,548 outstanding budgetary obligations (26 per cent) totalling \$688,935 had outstanding individual balances of \$300 or less. The Board also noted that 18 per cent, or 4,472, had individual balances of \$150 or less, while 2,076, or 8 per cent, had balances between \$151 and \$300.
- 34. UNICEF explained that a large number of the outstanding budgetary obligations were related to freight, customs fees and insurance, the costs of which are actualized after supplies are procured offshore.
- 35. The Board is concerned that these outstanding budgetary obligations, if not cancelled, could collectively: (a) affect reported expenditures and obligations at the end of the biennium as they no longer represent obligations to be paid or settled; and (b) represent an overstatement of the expenses and the obligations reported during the accounting period when they were raised. It is also the position of the Board that even if it has not been 12 months since the end of the financial period, any small balance of outstanding budgetary obligations that no longer represents an obligation to pay a third party needs to be cancelled.
- 36. The Board recommends that UNICEF ensure that field offices request headquarters to cancel the remaining balances of outstanding obligations as soon as they are fully settled.
- 37. UNICEF assured the Board that procedures had been institutionalized to ensure compliance with its Financial Regulations and Rules.

Delayed reporting to donors on the use of contributions received

- 38. Contributions received from donors are the primary source of UNICEF income. The UNICEF Programme Policy and Procedures Manual provides that the UNICEF representative in a country has the primary responsibility for quality and timely reporting to donors of the manner by which contributions are utilized by UNICEF and of the result/outcome of programme implementation.
- 39. The Board observed, however, that the donor reports of seven field offices were submitted beyond the due date, as shown in table II.5.

Table II.5 **Delays in the submission of donor reports**

Field office	Number of reports	Reports submitted after the due date	Length of delay
Ghana	12	5	3-31 days
Bolivia	39	30	4 days-9 months
Colombia	_	2	More than 3 months
Brussels	35	8	Unspecified
Philippines	12	7	3-138 days
Regional office for Central and Eastern Europe and the Commonwealth of Independent States	_	59	Unspecified
Eastern and Southern Africa Regional Office	39	18	26-796 days

- 40. The field offices listed in table II.5 gave various reasons for delays in the submission of donor reports. These include: (a) the security situation in September 2007 due to protests occurring in the vicinity of the UNICEF office; (b) the extra time spent to ensure the quality of reports; (c) the erroneous and late submission of quantitative data from implementing partners; (d) the delay in the translation of documentation for donors; (e) the difficulty or lack of facility by some staff in the English language as the medium for report preparation; and (f) the delayed submission of reports by the counterparts and/or implementing partners.
- 41. The Board is concerned that the delay in the submission of reports to donors might not meet donors' expectations regarding accurate and timely reporting and affect their enthusiasm to contribute to UNICEF programme activities in the future.
- 42. The Board recommends that UNICEF determine the cause of the delays in donor reporting by field offices and institute measures to ensure that reports are submitted in accordance with donor agreements.
- 43. The field offices acknowledged the delays in the submission of donor reports and ensured that all possible measures would be considered to address the situation.

Fund-raising targets

- 44. The ability of UNICEF to implement its programmes depends largely on contributions from Government sources. The UNICEF Tokyo office takes the lead in advocacy and fund-raising in Japan and in the Republic of Korea. Every year it prepares an income projection for each category of funding, which is revised periodically on the basis of dialogue with the Government of Japan.
- 45. It was noted that in the donor profile for 2006, the office had not set a target amount of contributions from the Government of Japan that would guide its efforts to achieve the desired level.
- 46. As at 30 September 2006, the office was still 22 per cent short of the \$184.14 million that it had been able to raise in 2005.
- 47. UNICEF agreed with the Board's recommendation that the Tokyo office establish an annual contribution target that would serve as a benchmark in assessing the effectiveness of fund-raising programme activities.
- 48. The Programme Funding Office explained that UNICEF requires the use of a resource mobilization checklist to guide the Office's fund-raising activities and strategies. Based on the checklist, the Office must set realistic targets for implementation in order to schedule contributions, particularly supplementary funds or other resources.

Cash assistance to Governments without official receipts

49. UNICEF financial circular 15 (Rev. 3) provides that for all cash assistance to Governments, an official receipt from the head of the Government department concerned or from the official formally authorized to register funds should be obtained and attached to the relevant payment vouchers and kept in UNICEF files. The same circular requires that the programme officer ensure that the authorized payees/implementing partners officially acknowledge receipt of the direct cash transfer for proper recording and accounting of the cash received.

- 50. In connection with its review of payment vouchers on cash assistance to Governments, the Board noted that in six country offices (in Bangladesh, Egypt, Ethiopia, Ghana, the Philippines and Senegal) there were payment vouchers that were not supported by official receipts from implementing partners. At the Myanmar country office, five acknowledgement receipts did not contain the official seals of the implementing partners.
- 51. Without the official receipts or signed acknowledgements, there is a risk that the cash assistance will not be recorded in the books of the implementing partner.
- 52. The Board recommends that UNICEF ensure that its country offices comply with financial circular 15 (Rev.3) on the issuance of official receipts by recipients of cash assistance.
- 53. In lieu of the official receipts, the country offices of Ethiopia and Senegal required the implementing partners to sign and return a notification letter from UNICEF whenever funds were transferred. The Senegal country office informed the Board that the practice had been established and adopted by the office with the consent of the regional office owing to the difficulty encountered with implementing partners in issuing official receipts.
- 54. To facilitate the process of acknowledging the receipt of funds by the implementing partners, the Ghana country office developed a form that is provided with the notification letter whenever funds are transferred to a partner. The implementing partner is required to sign the form as acknowledgement of funds and return it to UNICEF.
- 55. The Myanmar country office gave assurance that it would strengthen its existing mechanism for monitoring the timely submission of acknowledgement receipts with official seals of implementing partners in close collaboration with its finance and programme sections. The Egypt country office commented that to mitigate this risk, payments were released through bank transfers, which the country office considered as adequate proof of receipt since funds had been directly credited to the implementing partners' accounts.

Long-outstanding cash assistance to Governments

- 56. In a report to the Executive Board dated 30 May 2002, UNICEF stated that disbursements for cash assistance to Governments should cover the estimated expenditures for a period of no longer than three months and that the recipient of cash assistance was responsible for submitting a financial and activity monitoring report to UNICEF within a period of six months, and nine months in exceptional cases, following the actual provision of funds (E/ICEF/2002/AB/L.5, para. 40).
- 57. Furthermore, financial circular 15 (Rev.3) provides that documentation, particularly evidence of the effective utilization of cash assistance to Governments, should be submitted by the implementing partners within six months or, in exceptional cases, nine months, of the provision of funds.
- 58. A review of the direct cash transfer monitoring report for programme accounts of six field offices (the country offices of Bolivia, Kenya, Panama, Senegal and Thailand, and the Western and Central Africa Regional Office) revealed that a portion of their cash transfers to implementing partners remained outstanding for more than six months from the date of release. The delay in reporting averaged six

- to nine months. At the Panama country office, the cash assistance to 14 implementing partners remained outstanding for 10 to 154 months.
- 59. In the case of the regional offices for Eastern and Southern Africa and for the Americas and the Caribbean, the review of their cash assistance to Government status reports showed that 14 of their implementing partners were unable to submit financial and activity reports, hence the cash assistance remained outstanding for 9 to 47 months. The reasons cited were staff turnover, delayed implementation of the projects, slow utilization of funds and incomplete documentation.
- 60. At the India country office (in New Delhi and Mumbai), cash utilization reports for 12 implementing partners (9 in New Delhi and 3 in Mumbai) had not been submitted six months after the receipt of the cash transfers. In New Delhi, unliquidated cash transfers amounting to \$5,756 made to three implementing partners remained outstanding for more than five years. To address this concern, management required weekly monitoring reports indicating which implementing partners were banned from receiving additional cash assistance.
- 61. UNICEF agreed with the Board's recommendation that its field offices: (a) monitor closely cash assistance provided to Governments to ascertain that they are utilized in accordance with the objectives of the approved projects; (b) clear all long-outstanding cash assistance/transfers to Governments; and (c) make further cash transfers to implementing partners only upon the submission of cash utilization reports.

Inconsistencies between the table of authority and the document authorization table

- 62. The UNICEF financial policy on authorizing, certifying, approving and paying functions are found in the table of authority, which is the basis of the document authorization table in the Programme Manager System. The document authorization table assigns authority to staff members to perform authorizing, certifying, approving and signing functions in accordance with the stipulations of financial circular 34 and the table of authority. The document authorization table also sets the maximum amount that the designated staff member is authorized to certify or approve. These functions are normally agreed upon and signed by the Head of Office in the table of authority. Any amendment to the document authorization table is based on changes made in the table of authority.
- 63. At the country offices of Romania and India, the Board observed that the tables of authority had not been immediately updated for changes in the designation of assigned staff. In Romania, some responsibilities that existed in the table of authority for approval of advances up to \$10,000 and cash requisitions up to \$60,000 and for approval of cash authorizations up to \$3,000 were not found in the document authorization table.
- 64. At the Regional Office for South Asia, the Deputy Regional Director can approve a cash requisition up to \$1 million and can authorize a cash advance up to \$100,000, while in the table of authority he or she can authorize a cash requisition and approve a cash advance only up to \$15,000 per authority.
- 65. Although the Office explained that the system would not allow any transaction to be authorized, certified or approved beyond the financial limits specified in the document authorization table, the Board was concerned that because of the inconsistencies in the financial limits between the table of authority and the

08-43952 **19**

document authorization table, transaction documents might have been authorized, certified, approved and signed for amounts exceeding the limits.

- 66. At the India country office, inconsistencies were found in 19 cases between assigned levels of authority in the table of authority and the ProMS document authorization table. The country office explained that 18 of the observed inconsistencies had occurred when staff members were assigned temporary responsibilities as officer-in-charge for a staff function with a higher financial authority limit in the table of authority.
- 67. The review of 20 payment transactions at the India country office as at 31 December 2007 revealed that 9 payment requests had been certified by officers even though the amounts were beyond their authorized limits.
- 68. The Romania and India country offices explained that: (a) temporary designations of responsibilities to staff members were assigned through e-mail frequently, and documenting updates to the table of authority every time there was a new designation would add considerable paperwork; and (b) the process of managing the inconsistencies between the table of authority and the document authorization table when the concerned staff members were acting as officer-in-charge for others with higher authority required regular reviews to manually record changes in the document authorization table in ProMS when the validity period of the officer-in-charge expired.
- 69. UNICEF agreed with the Board's recommendation that country offices: (a) monitor regularly the changes made in the document authorization tables; (b) update periodically the tables of authority; and (c) establish procedures to ensure that the assignment of financial authorities in the Programme Manager System is consistent with that contained in the table of authority.

4. Statement of assets, liabilities and reserves and fund balances

Cash and term deposits — unrecorded reconciling items

- 70. UNICEF financial rule 111.4 requires that all bank accounts be reconciled with the bank statements on a regular basis as determined by the Comptroller.
- 71. In addition, accounting instructions and the field finance procedures require that reconciling items as well as discrepancies between the book and bank entries identified in the bank reconciliation statements that require adjustments be acted upon immediately by the appropriate finance staff and not carried forward as a pending adjustment in the subsequent period.
- 72. The Board's review of the reconciliation statements of 275 bank accounts disclosed various reconciling items that had not been recorded in the UNICEF books as at 31 December 2007, as shown in table II.6.

Table II.6 **Details of unrecorded reconciling items**

(United States dollars)

Net understatement of cash in bank balance	3 630 046
Difference between UNICEF recorded balances (SAP-FLS figures) of field office bank accounts and the balances recorded in the field offices	(344 492)
Stale-dated cheques	174 859
Unrecorded bank debits/charges	(1 914 951)
Unrecorded deposits	5 714 630

- 73. The unrecorded bank debits/charges were related to reconciling items from prior periods from 15 October 2004 to 30 November 2007, but were still shown in the bank reconciliation statements as at 31 December 2007.
- 74. At the India country office, the bank reconciliation statements for one bank account revealed numerous reconciling items that had been recorded only after 2 to 10 months, while in another bank account reconciling items from January 2006 to December 2007 had not yet been recorded as at the end of February 2008. At the Philippines country office, numerous outstanding cheques issued in 2005 that were therefore already stale were recorded in the books only in October 2006.
- 75. At the Nigeria country office, four stale-dated cheques had been voided two to six months after they had become stale. The bank reconciliation statement of the Colombia country office revealed that three cheques had been outstanding for 6 to 13 months. Similarly, at the India country office there were also cheques that had been outstanding for six to nine months.
- 76. The Board recommends that UNICEF review all reconciling items appearing on the monthly bank reconciliation statements of field offices and make the appropriate adjustments to the accounting records immediately after each monthly review.
- 77. UNICEF commented that where the operational environment in which field offices are working supports the practical application of this recommendation, it would endeavour to ensure that all reconciling items are reviewed and appropriately recorded in the month following the month covered by the bank reconciliation.

Long-outstanding contributions receivable

78. The Board noted that the Programme Funding Office report on the results of its review and analysis of the \$40 million balance in the outstanding contributions receivable — other resources account included a \$2.7 million receivable that actually represented the foreign exchange difference between the dollar equivalent of recorded pledges in the donor's local currency made in 2001 and 2002 and the dollar equivalent when the contributions were received. Considering that the donor had paid the full amount of its pledge in local currency, there might be no further payment forthcoming to settle the still recorded outstanding balance.

79. UNICEF agreed with the Board's recommendation that it review the amount of \$2.7 million shown as outstanding receivables in respect of contributors who have fully honoured their pledges.

Delays in recording signed pledges

- 80. The verification of pledged contributions of 42 countries for 2006 showed that the contributions of 15 countries had not been recognized as income at the time of receipt of the signed pledge. While pledges were supposed to be recorded upon receipt of the signed pledges, there was a delay in the recording of contributions receivable and income by the fund-raising and contributions units ranging from 7 to 253 days.
- 81. The Board recommends that UNICEF take appropriate measures to ensure that written pledges are promptly recorded as income and contributions receivable.

Negative receivable balances

- 82. As at 31 December 2007, the other accounts receivable from staff members account, which comprises several accounts, had a balance of \$21.58 million. The Board's verification indicated that this amount was the net balance after accounts with negative balances totalling \$6.38 million as at 31 December 2007 were considered. Negative receivable balances may indicate either overcollection, which would become a liability of the collecting entity, or errors in recording and collecting receivables.
- 83. UNICEF agreed with the Board's recommendation that it investigate the negative balances in the "other accounts receivable from staff members" accounts and make the appropriate adjustments.
- 84. UNICEF commented that negative balances result in some instances from specific system configurations but agreed to review negative balances to ensure the accuracy of amounts under "other accounts receivable from staff members" that would be disclosed in future financial statements.

Discrepancies in Supply Division inventory balances

- 85. The Systems, Applications and Products Financial and Logistics System is the central source in UNICEF for retrieving inventory data on receipt, issuance and consumption.
- 86. A review of the Supply Division's accounting records revealed that the raw materials and finished goods inventory accounts reflected balances of \$0.33 million and \$32.08 million respectively, or a total of \$32.41 million as at 31 December 2007. When compared with the balance of \$29.86 million generated from SAP-FLS, however, there was a \$2.55 million difference.
- 87. The details of the inventory report generated by SAP-FLS showed the following inconsistencies:
- (a) 241 items with an aggregate value of \$0.36 million reflected zero quantities;

- (b) 162 items reflected negative values aggregating to \$2.42 million, of which 31 items had corresponding quantities and 131 zero quantities;
 - (c) 51 items had quantities but had no corresponding values.
- 88. The Supply Division explained that the difference of \$2.55 million was due to the current moving average price and that the SAP-FLS database produced reliable data in terms of item quantities but not on the reported values of those items. Thus, it used the database primarily to report on information related to quantities, as it provided a fast overview of the inventory at all locations and hubs.
- 89. Because SAP-FLS serves as a common database for all the inventory reports, the Board is of the view that the reports generated from it must contain the same information, whether they are for logistical or financial reporting purposes, and that the values and quantities must be correct.
- 90. UNICEF agreed with the Board's recommendation that it determine the causes of the discrepancies in the inventory account, especially those with negative balances, and take steps to evaluate SAP-FLS for possible enhancement.
- 91. UNICEF commented that the timeline for having the report corrected would be 12 months, as it implied using information technology resources that were currently focused on the development and rollout of the "One ERP" enterprise resource planning system.

Landholdings

- 92. UNICEF financial regulation 13.1 requires the Executive Director to submit accounts biennially in respect of the UNICEF account, including the status of capital asset accounts.
- 93. A review of the capital asset fund revealed documents confirming UNICEF ownership of parcels of land, as shown in table II.7.

Table II.7
List of unrecorded UNICEF landholdings

Location of land	Area	Cost/fair market value (United States dollars)	Remarks
Bamako	8 400 square metres	Undetermined	Land grant with title in the name of UNICEF
Santiago		Undetermined	
Ghana	Undetermined	Undetermined	Land grant with deed of transfer to UNICEF
Haiti	Undetermined	165 000	Includes building in the deed of transfer

94. The Board examined the UNICEF chart of accounts and noted that no account was used for landholdings, although there were accounts for capital assets and capital expenditures, such as buildings, housing, equipment and machinery.

Furthermore, it noted that the capital assets, as presented in the statement of assets, liabilities reserves and fund balances, did not include landholdings. Neither were the parcels of land owned by UNICEF disclosed in the notes to the financial statements. In note 14 to the financial statements, it is disclosed that the capital assets of UNICEF consist of office buildings and staff housing only.

- 95. The Board is concerned that UNICEF may have overlooked the requirements of its Financial Regulations and Rules by not recording landholdings in its books nor presenting them in the financial statements.
- 96. The Board recommends that UNICEF carry out a comprehensive inventory of all its landholdings and reconcile the results with the related asset records to correctly value them and record them in the books of accounts.
- 97. UNICEF agreed to review the documentation relating to land and buildings that are held in New York and in field offices to ensure that any land to which UNICEF has title is identified and correctly valued and recorded in the accounts.

Lease of building

- 98. UNICEF is a lessee of the United Nations Development Corporation (UNDC) for a building known as Three United Nations Plaza, which is covered by a lease agreement between the parties dated 13 August 1984. On 11 January 1994, UNDC and UNICEF mutually entered into an agreement amending article 17 of the original lease agreement, which stated that the parties expected that upon expiration, title to all portions of the building and plaza adjacent thereto and all portions of the land underlying the building and plaza would be conveyed to the tenant (or to the United Nations, if the tenant so requested), free and clear of all liens and encumbrances, other than the "permitted exceptions" that were either identified in schedule I or were created, suffered, permitted or agreed upon by the parties directly or indirectly.
- 99. As required by the amended lease agreement, the transfer agreement signed by the City of New York, the New York City Economic Development Corporation, UNDC and UNICEF in 1995 contained various conditions that must be fulfilled for UNICEF to take title of Three United Nations Plaza, including the following:

UNICEF shall have continuously and without interruption maintained its World-Wide Headquarters in New York City from the date hereof [1995] until July 2, 2026.

UNICEF, and/or the United Nations, shall have continuously and without interruption occupied the portion of the 3 UNP Property demised to UNICEF under the UNDC-UNICEF Sublease from the date hereof [1995] until July 2, 2026.

100. The monthly lease payments made by UNICEF consisted of a base rent of \$32.50 per square foot from 12 January 1994 until the expiration date, plus actual operating expense escalation for taxes, repairs and maintenance costs, all of which were recorded as outright expenses. Based on the rate specified in the lease agreement, the total base rent payments made from the effective date of the amended agreement had amounted to approximately \$82 million as at 31 December 2007 and the value of future lease payments are approximately \$109 million. Hence, total payments would amount to \$191 million by the end of the amended lease term. In 2026, or 18 years hence, the ownership of Three United Nations Plaza will finally

be transferred to UNICEF for the consideration of \$1, if it has satisfied the conditions of continuous and uninterrupted stay in the building and maintenance of its worldwide headquarters in New York City.

- 101. By the terms of the amended lease agreement, UNICEF apparently entered into a lease-purchase agreement, under the category of a finance lease. UNICEF, however, has considered the lease to be an operating lease since its inception and since the lease amendment date.
- 102. UNICEF agreed with the Board's recommendation that it disclose in the notes to the financial statements the terms of the lease arrangements, the cost of the property and the corresponding liability for the unpaid portion of the lease.
- 103. The terms of the lease arrangements have since been disclosed in note 23 to the financial statements.

Negative payable balances

104. In the UNICEF statement of assets, liabilities reserves and fund balances (statement II) as at 31 December 2007 accounts payable amounted to \$123.45 million. The account groups comprising that account, as reported in note 17 to the financial statements, are provided in table II.8.

Table II.8 **Composition of accounts payable**

(Millions of United States dollars)

Account group	
United Nations system	26.70
Supplies, services and freight	71.38
Miscellaneous	25.37
Total	123.45

105. The grouping of accounts did not show any negative balances. Verification showed, however, that the reported amounts were the net credit balances of various individual creditors and vendors. Further verification revealed that there were 1,187 UNICEF creditors, including Government entities, United Nations entities and suppliers/vendors. Of this number, 155 had negative balances ranging from \$7,628 to \$487,834, for a total of \$1.35 million.

106. Since a negative balance may indicate either an overpayment or an error, the Board is concerned that such balances might be due to a failure to record liabilities at the time they were incurred with the result that the recording of subsequent payments resulted in a negative balance.

107. The Board recommends that UNICEF review the accounts payable with negative balances and make the appropriate adjustments in the accounting records.

108. UNICEF commented that it would look into the reasons for the negative balances and take action to rectify them, as appropriate.

5. End-of-service liabilities, including after-service health insurance

After-service health insurance

109. The General Assembly, in its resolution 61/264, noted that the International Public Sector Accounting Standards required that the accrued after-service health insurance liabilities and future accrued expenses be recognized on the face of the financial statements and that this requirement was irrespective of funding such liabilities. In the same resolution, the Assembly decided to approve the establishment of an independent segregated special account to record after-service health insurance accrued liabilities and account for related transactions. As regards UNICEF, end-of-service liabilities as at 31 December 2007 are reported in note 20 to the financial statements. UNICEF indicated that the resolution was not clear on whether all United Nations entities were required to accrue those liabilities, nor on the time frame for recognizing such accrued liabilities, whether as at 31 December 2007 or during the course of IPSAS adoption.

110. As computed and reported by the consulting actuary, the amount of \$292.38 million was disclosed in the notes as the accrued liability for after-service health insurance as at 31 December 2005 because the actuary engaged to revise the valuation as at 31 December 2007 had not yet completed the new valuation as at 31 March 2008, the date of issuance of the financial statements. It was further disclosed in note 20 that the actuary had given a preliminary indication that UNICEF liability had increased significantly and that the accrued liability as at 31 December 2007 totalled \$482.7 million.

111. The previous valuation of after-service health insurance as at 31 December 2005 was based on the gross liability for active employees then eligible to retire and active employees not yet eligible to retire as at 31 December 2005, as well as UNICEF retirees in the biennium the 2004-2005, with data obtained from: (a) census data provided by UNICEF and premium and contributions data provided by the United Nations; (b) actual retiree claims experience in the United States of America with various medical plans, including the medical insurance plan; (c) expected United States Medicare drug subsidy receipts; and (d) various economic and actuarial assumptions.

112. To meet the funding requirement for the after-service health insurance liability, the established fund reserve was increased to \$150 million as at 31 December 2007 (from \$60 million as at 31 December 2005) pursuant to approval by the UNICEF Executive Board. Considering, however, that UNICEF liabilities had increased significantly and that the estimated accrued liability as at 31 December 2007 totalled \$482.7 million, the \$150 million fund reserve for after-service health insurance was not adequate.

Accumulated leave and repatriation grant

113. In note 21, UNICEF disclosed its liability as at 31 December 2007 for accumulated leave credits and repatriation grant in the total amount of \$85.64 million, as detailed in table II.9. The estimated liability for repatriation grant was based on a computed average generated in SAP-FLS. The estimated liability for

accumulated annual leave was based on the average for the past five years. The annual estimates were verified against the computation sheet of each country/regional/field office prepared by the individual employees using their accumulated leave balance multiplied by their rate per day in United States dollars. As at 31 December 2007, the amount of \$18.3 million had since been reserved to cover separation and termination liabilities (excluding after-service health insurance).

Table II.9

Comparative accrued liability for end-of-service liabilities (excluding after-service health insurance) for the bienniums 2004-2005 and 2006-2007

(Thousands of United States dollars)

Total	85 643	75 811
Repatriation grant	40 488	36 909
Accumulated leave	45 155	38 902
	2006-2007	2004-2005

114. The Board recommends that UNICEF: (a) consider disclosing its end-ofservice liabilities on the face of the financial statements; and (b) determine mechanisms to fully fund those liabilities.

6. Financial statement disclosures

Disclosure of the details of the investment portfolio

- 115. The United Nations system accounting standards require disclosure of details of an investment portfolio. The purpose is to provide readers of the financial statements with enough insight into the significance of the investments to the financial position and cash flows of UNICEF.
- 116. The \$445 million in investments reported in the statement of assets, liabilities, reserves and fund balances was described in note 9 as consisting of fixed-income securities stated at amortized cost, with the current period market value estimated at \$446 million. The account statement from the investment manager for the month of December 2007 disclosed that UNICEF holdings represented various callable notes and bank bonds maturing within one year or more. No other additional information was provided.
- 117. The Board recommends that UNICEF disclose the details of the investment portfolio, including the market value of the investments under both the short-term and long-term classifications.

Source of funding of reserves

118. Paragraph 56 of United Nations system accounting standards prescribes obligatory disclosure for reserves, which include the sources of funding of each capital fund and reserve account to help the reader better understand the nature of the reserves. In note 7, paragraphs 31 to 34, of the notes to the financial statements regarding reserves for procurement services, insurance and capital assets, there was

no information regarding the source of funding, in contrast to the disclosures on the reserves for after-service health insurance.

119. UNICEF agreed with the Board's recommendation that it consider the disclosure of the source of funding of the reserves for procurement services, insurance and capital assets.

7. Progress towards the implementation of the International Public Sector Accounting Standards

120. A review of the preparations made by UNICEF to implement IPSAS revealed that it had no IPSAS adoption plan. Such a plan is one of the five critical implementation steps set out in the IPSAS adoption progress report of the Task Force on Accounting Standards dated 10 March 2008. The UNICEF IPSAS website also made no mention or reference to an adoption plan in reporting progress of the preparations for IPSAS implementation.

121. The Board recommends that UNICEF develop a plan detailing the various steps to be taken leading to the full implementation of IPSAS by 2010.

122. UNICEF commented that its IPSAS project was on track and would be completed by 2010 and that it had prepared and circulated a gap analysis during the first quarter of 2008 that covered each of the major areas of IPSAS impact on UNICEF business practices, summarized the requirements of IPSAS and would form the basis for a detailed timetable and implementation plan. In addition, UNICEF reported that its Executive Board had in January 2008 approved the budget estimate relating to the cost of IPSAS adoption, had in September 2007 recruited an IPSAS adoption specialist and was in the process of recruiting an IPSAS project team.

8. Procurement and contract management

Undocumented performance evaluation of suppliers

123. The UNICEF Supply Manual, in paragraph 7.6, chapter 10, provides that:

All information regarding the supplier is stored in a file ... including the SPF [supplier profile form], copies of financial statements, annual reports, inspection reports, quality certificates, correspondence relating to quality problems and other documents relevant to the supplier's performance.

- 124. At the Private Sector Division, supplier evaluations were done through a joint consultative process among the assigned Production Control Officer, the Procurement Officer, the Heads of Procurement and Production and the Chief of the Office of Support Services. However, no written report was prepared to document the performance evaluation of each. The Private Sector Division claimed that a written evaluation on each supplier was neither reasonable nor possible, as the sheer administrative magnitude of the work would exceed the resources available.
- 125. The Board is concerned that without performance evaluation reports, suppliers with a history of unsatisfactory performance might be offered additional contracts.
- 126. UNICEF agreed with the Board's recommendation that it prepare written evaluations of all suppliers to reduce the risk of contracts being awarded inadvertently to suppliers with unsatisfactory performance.

127. The Private Sector Division commented that in January 2008 a new web-based bidding tool had been implemented that contained a pre-evaluation of suppliers; post-evaluation criteria were being developed.

Deliveries beyond specified delivery dates/liquidated damages

- 128. The Board noted that items had been delivered 48 to 72 days after the agreed delivery dates for the Philippines country office, 5 to 187 days late for the Myanmar country office and 37 to 240 days late for the Ethiopia country office. There was also no provision in the purchase orders imposing liquidated damages in case of late delivery. The delays affected the timely implementation of programme activities.
- 129. The Myanmar country office explained that the delays were due primarily to the continual changes in the Government's policy on importation and the resulting difficulties encountered by suppliers in bringing goods into the country, considering that most of the raw materials were imported from neighbouring countries.
- 130. UNICEF agreed with the Board's recommendation that the Philippines, Myanmar and Ethiopia country offices include in purchase orders a penalty clause for late delivery in accordance with the provisions in the UNICEF Supply Manual.
- 131. As verified by the Board, the Philippines country office had recently imposed liquidated damages for late deliveries. A supplement to the standard terms and conditions was added to include delivery periods as well as a penalty for late delivery.
- 132. The Ethiopia country office agreed to monitor the timely delivery of supplies. However, the system-driven purchase order template did not allow additional clauses to be added to each purchase order.

9. Asset management

Undistributed project supplies

- 133. It is important to keep proper records of UNICEF supplies in Government warehouses and stores separate from the Government's records to facilitate tracking by UNICEF staff as well as by auditors. At the same time, it is important to use or establish a Government reporting system on the status of UNICEF supplies in Government warehouses, as set out in the Supply Manual (chap. 14, sect. 1, para. 4.8).
- 134. Generally, the warehousing and distribution of UNICEF project supplies is the responsibility of the counterpart Government, but there are situations in which there is no Government in place or where a country office assessment found that the local government was unable to manage and deliver the project supplies on time. This seriously jeopardized the achievement of programme goals. In such situations, UNICEF should consider extending assistance to the counterpart Government for customs clearance, warehousing and in-country distribution (see chap. 11, sect. 1, para 2.2 of the Supply Manual).
- 135. The Board's review of the Myanmar country office warehouse inventory report as at 30 September 2007 disclosed that there were supplies in four Government warehouses that had remained undistributed for six months to two years. The items included water and sanitation supplies comprising mostly written-off items and

items appropriated for emergency response. Supplies over one year old valued at \$78,071 were obsolete items that had been earmarked for write-off. The process of disposal/write-off had been delayed owing to the bureaucratic procedures of the Government.

- 136. The Myanmar country office explained that the educational supplies stored at the warehouse from six months to two years had been distributed in October and November 2007. Items consisting of children's books valued at \$0.17 million could not be distributed owing to a delay in the completion of boxed libraries. It further emphasized that the school supplies needed to be sent twice a year in accordance with the school calendar (June to March). This caused some delay, as supplies for the next school year had to reach the schools before they opened in June, thus, there were times when supplies ordered the previous year remained in the warehouse to align with the school year distribution plan. The Myanmar country office further stated that the inventory of health and nutrition supplies at the warehouse had been reduced by \$0.96 million as at 26 November 2007.
- 137. Likewise, an examination of the inventory records of the Bolivia country office as at 30 May 2007 showed that there were supplies such as PVC pipes and other construction materials, carts and radios purchased for four programmes that had remained undistributed for 154 to 343 days from the purchase date. Office equipment and a motorcycle also remained in stock for 176 to 343 days. Supplies that remain undistributed for a long period of time affect the efficiency of programme implementation and occupy valuable storage space.
- 138. The following conditions were cited by the Bolivia country office as causes for the untimely distribution of supplies: (a) the supply requirements of a particular programme were not provided immediately owing to problems with item specifications resulting in numerous exchanges of correspondence and return of documentation; and (b) the programme's supply needs were overestimated. The country office further explained that the quantities of some items was small and they would be too costly to transport unless accompanied by larger orders. It agreed, however, that there was room for improvement in terms of the supply plan and work processes.
- 139. In addition, the Board verified 20 supply requisitions from the Ethiopia country office from 1 January 2006 to 30 September 2007 and noted that distribution lists were attached to only 2 of them.
- 140. The Board's review of the Addis Ababa warehouse stock report as at 15 October 2007 revealed that supplies costing \$708,280 had been in stock from 2002 to 2005 in a bonded warehouse owing to the non-payment of customs duties by the recipient Government agency, including costs associated with the clearance, receipt, unloading, storage, insurance, transportation and distribution of such supplies, equipment and other materials after their arrival in the country. The payment of those costs by the recipient Government agency was specified in the basic cooperation agreement between UNICEF and the Government of Ethiopia.

141. UNICEF agreed with the Board's recommendation that:

(a) The Myanmar country office implement a procurement strategy to ensure that supplies are dispatched in a timely manner to the end-users once they are delivered;

- (b) The Bolivia country office ensure that realistic estimates of supply requirements are prepared and that supplies are distributed to the programmes within the designated time frames.
- 142. UNICEF also agreed with the Board's recommendation that the Ethiopia country office: (a) attach distribution lists to supply requisitions; and (b) make representation to the Government of Ethiopia for the release of programme supplies that are kept in bonded warehouses in compliance with chapter 14 of the Supply Manual.

Non-expendable property disclosure in the financial statements

- 143. The accounting instructions for the closure of UNICEF accounts require field offices to submit a certified summary of non-expendable property for the year supported by sound inventory management practices in accordance with UNICEF financial rule 112.34, which requires physical inventories of supplies, equipment or property owned by or entrusted to UNICEF be taken annually or at such intervals as deemed necessary. All certified non-expendable property summaries submitted by the country offices were reviewed and consolidated manually at UNICEF headquarters to form part of the notes to the financial statements.
- 144. The Board noted the following deficiencies in the certified non-expendable property summaries submitted by the field offices to UNICEF as the basis for the disclosure of non-expendable property in the notes to the financial statements:
- (a) In the summary submitted by the Regional Office for South Asia, the beginning balances for 2006 did not tally with the ending balances of the previous year by \$23,698 for the programme budget and \$19,121 for the support budget;
- (b) The summary of the Yemen country office as at 31 December 2006 showed a beginning balance for equipment charged to the programme and support budget of \$434,560, while the summary as at 31 December 2005 showed an ending balance of \$443,917, or a net discrepancy of \$9,357. The property report generated as at 31 December 2006 from the local property inventory database, as reconciled with the summary submitted to the Division of Financial and Administrative Management, revealed a discrepancy of \$149,640;
- (c) The Ethiopia country office summary as at 31 December 2006 included items valued below \$1,500 each;
- (d) The opening and closing balances for non-expendable property of the Southern Sudan area office as reported to the Division of Financial and Administrative Management as at 1 January 2006 and 31 December 2007 were not supported by detailed inventory listings that would have allowed verification. Only the actual non-expendable property inventory for the Juba office and the seven zonal offices as at 31 December 2007 was presented. These totalled \$3.75 million, which, when compared against the closing balance of \$6.32 million as reported to the Division, resulted in a difference of \$2.57 million.
- 145. Since the figures reported by the field offices are disclosed in the notes to the financial statements, it is imperative that UNICEF headquarters obtain reasonable assurance that the non-expendable property figures are accurate.
- 146. UNICEF agreed with the Board's recommendation to take measures to improve the reliability of the inventory records in the field offices.

08-43952

Disposal of unrecorded non-expendable property

147. A review of the 2006 and 2007 certified non-expendable property summaries revealed disposals of computer equipment in 2007 valued at \$171,984. An examination of the corresponding Property Survey Board report for 2007 further revealed that the Board had approved the disposal of four HP RP8400 servers, which were traded in when UNICEF purchased two Superdome servers. Upon the approval of the Property Survey Board, the amount of \$171,984 was deducted from the certified non-expendable property summary for 2007. It was verified, however, that the carrying amount of the four HP servers that were disposed of should have been \$1.41 million, as shown in table II.10.

Table II.10

Details of the disposed-of servers that were traded in (United States dollars)

Purchase order number	Serial number	Amount
45027785	USR41520CN	171 984.30
45027785	USR41520CP	171 984.30
4503511 (Invoice No. 5FS5891)	USR43075AC	295 424.41
4503511 (Invoice No. 5FS5891)	USR43136OJ	492 445.39
4503511	Upgrades	278 252.95
Total		1 410 091.35

148. Only one of the four HP servers (USR41520CN) listed in the Property Survey Board report was included in the certified non-expendable property summary for 2006. The three other servers, worth \$1.24 million, that were disposed of in 2007 were not listed.

149. In addition, disposals in 2006 amounted to \$824,272. The review of the corresponding Property Survey Board report for 2006 and of the asset listings that accompanied the Board's approval revealed that the certified non-expendable property summary for 2006 did not report in the disposal column the disposal of assets amounting to \$444,324. These circumstances point to the existence of weaknesses in asset management.

150. UNICEF agreed with the Board's recommendation that it review its non-expendable property management processes and control of property records.

10. Human resources management

Consultants, experts and temporary assistance

151. The services of consultants and/or individual contractors are engaged for the implementation of the programmes of UNICEF through the issuance of special service agreements, which have to be approved and signed by both UNICEF and the consultants/contractors before the commencement of work. The Board noted 94 special service agreements in five regional/country offices (i.e. the regional office in the Americas and the Caribbean and the country offices in Ethiopia, the

Philippines, Viet Nam and India) where UNICEF allowed the consultants/contractors to start work and/or to be paid before the contracts were signed, contrary to the provisions of paragraph 6.2.83 of the Human Resources Manual (Vol. II).

- 152. At the India country office, payments to some consultants/contractors were made despite non-compliance with performance evaluation provisions of sections 5.13 and 5.14 of administrative instruction ST/AI/1999/7. The deficiencies included: (a) the absence of a performance evaluation regarding the contractor's accomplishment of agreed deliverables; (b) incomplete deliverables; and/or (c) the submission of a discussion paper that did not correlate with the agreed output. The evaluation of the performance of a consultant to measure the quality of work performed is mandatory before the payment of consultancy fees.
- 153. Moreover, the work of the consultants and contractors involved travel on behalf of the regional/country offices, hence health statements and physician certificates were needed in all cases to make sure that the consultants were fit to travel and immune to disease, especially in countries that required vaccination, as provided in paragraph 6.2.126 of the Human Resources Manual. The Board noted that the files of 11 special service agreements in Myanmar, 9 in Ethiopia and 17 in the Philippines did not contain a statement of good health or the statements were dated after the work of the consultants had commenced.
- 154. In addition, in order for the consultants/contractors to fully meet UNICEF standards, a checklist is recommended (see annex A to the Human Resources Manual) to be used by offices and to be completed, filed and monitored periodically by the supervisor throughout the duration of the contract. Documentation related to the contracts as well as the terms of reference are also required to be complete, up-to-date and readily accessible.
- 155. The country office in Egypt did not comply with the checklist requirement, considering that it was too lengthy and cumbersome and assuming that it was not mandatory. It agreed to consider the implementation of a systematic and streamlined monitoring mechanism. The Board noted that a number of original copies of special service agreements were not on file at the country office in the Philippines.
- 156. In hiring institutional contractors, which required competitive bidding in the selection process, the Southern Sudan area office in Juba was found to have hired or rehired some of its contractors from a single source contrary to the provisions of paragraph 6.2.73 of the Human Resources Manual. The area office explained that this was due to the expertise of the contractor or the urgency of the circumstances. At the Nigeria country office, the Board noted that one contractor had been the recipient of an uninterrupted period of engagement from May 2005 to May 2007 involving an aggregate amount of \$7.07 million. Although the contractor was initially selected through a competitive process, the contracts were renewed without bidding except for two special service agreement extensions, contrary to the provisions of administrative instruction CF/AI/1991-011.
- 157. The Board recommends that UNICEF comply with the requirements of the Human Resources Manual and the related administrative instructions in the hiring of consultants in respect of selection procedures, the signing of special service agreements before the commencement of work, medical examinations and performance evaluation.

08-43952

11. Information technology

Segregation of functions in the computerized information system

- 158. The Board examined the Systems, Applications and Products Human Resources (SAP-HR) payroll process using as a sample the international professional worldwide payroll for the period from 31 January to 30 September 2007. It was noted that the Payroll Unit had access rights allowing it to assign fund sources to certain posts directly from the programme budget allotment. The Payroll Unit can execute this action when there is either a shortfall in the balance of cash requisitions for a given payroll period or when no cash requisition has been created for a particular post that has a sufficient programme budget allotment.
- 159. The Board noted that the following functions of the Division of Financial and Administrative Management were also undertaken by the Payroll Unit:
- (a) Execution of corrective action to assign funds to posts directly from the available balance of the programme budget allotment when other field offices did not create the needed cash requisitioning within the period set prior to finalization of the payroll to ensure that the staff get their salary at the end of the month. The concerned field office is advised with urgency, by e-mail, to effect corrections done by the Payroll Unit at headquarters to ensure the replication of payroll payments in ProMS:
- (b) Execution of corrective action, when short of time, to change the validity end date of a cash requisition that did not end on the last calendar day of the month;
- (c) Initiation of a posting run in the financial accounting module of the payroll data to financial accounts;
- (d) Review of incorrect accounts posting, running of actual accounts posting, rerunning of posting errors and finalization of accounts posting.
- 160. As both the funding commitments or the cash requisitions and the work breakdown structure elements were under the SAP-FLS finance module and posting activities were within the domain of the Division of Financial and Administrative Management, posting activities usually were functions of the Division.
- 161. The access/administration rights of the Payroll Unit, which is not functionally under the Division of Financial and Administrative Management, were inconsistent with the general practice of segregation of duties.
- 162. UNICEF pointed out that posting in SAP-HR was always done at the programme budget allotment level and that the Payroll Unit did not administer the assignment of funds to posts. UNICEF also pointed out that salary expenditures were charged directly to the programme budget allotment and linked to the replicated cash requisition created by the field office. However, in exceptional cases in which the funding source was not automatically updated (for technical and/or other reasons), the Division of Financial and Administrative Management updated the cost distribution on the basis of information on the programme budget allotment provided by the concerned office and/or the programme budget allotment for regular resources of the respective office.
- 163. In respect of the comment by UNICEF that the Division of Financial and Administrative Management had updated the cost distribution related to errors and observations raised, the Board is of the view that corrections made by raising or

correcting the cash requisition could be made only by the field office through ProMS for replication in SAP-FLS.

164. The Board recommends that UNICEF evaluate the existing functions in the payroll process with a view to ensuring the adequate segregation of duties.

Financial authorities in the Programme Manager System document authorization table

- 165. A Division of Financial and Administrative Management advisory note of December 2005 delineated the tasks of the Systems Administrator and the Applications Administrator. The note provided that the Applications Administrator should not have any financial authority or any other systems rights.
- 166. The Board noted, however, that the assigned Applications Administrator of the Middle East and North Africa Regional Office had been delegated financial authority, such as allocating programme budget allotments up to \$200,000 and certifying invoices up to \$2 million, and was a member of the signatory panel as paying officer.
- 167. An evaluation of the workflow processes at the Eastern and Southern Africa Regional Office revealed that the certifying authority given by the Applications Administrator to the Procurement Officer for invoices in the ProMS document authorization table was not in line with the table of authority issued by the Regional Director. In the table of authority, the Procurement Officer was designated as the second alternate obligating officer for purchase orders and not as the certifying officer for payment. Allowing the Procurement Officer to act as the certifying officer while at the same time designating him or her as an alternate obligating officer was inconsistent with the internal control principle of segregation of duties. The Eastern and Southern Africa Regional Office acknowledged this oversight.
- 168. At the Jordan country office, the Applications Administrator had been delegated certain ProMS rights, such as the allocation of both programme budget allotments up to \$4.25 million and support budget allotments up to \$400,000.
- 169. The Board recommends that UNICEF ensure that the regional offices for the Middle East and North Africa and for Eastern and Southern Africa and the Jordan country office comply with the requirement that the Applications Administrator not be granted any financial authority.

12. Programme and project management

Planned project results that are not specific, measurable and attainable

170. A review of the 2006 and 2007 annual workplans for the reproductive and child health project of the Mumbai field office and the annual workplans of the Regional Office for South Asia revealed that planned results had not been articulated in "change language" with specific, measurable and achievable results. This did not allow for an objective assessment of the key results for the programme. At the Ghana country office, the annual workplans did not have details as to activities, time frame and budget.

171. The Board recommends that UNICEF ensure that all field offices provide specific baseline and target data to further enhance the measurability of project results.

08-43952

Non-use of the Programme Manager System for planning and monitoring

172. The Programme Manager System, which is prescribed in the Programme Policy and Procedures Manual as a primary tool for the efficient planning, initiation and recording of transactions relative to the annual workplan, was not utilized as intended at the Americas and the Caribbean Regional Office and at the Southern Sudan area office.

173. At the Americas and the Caribbean Regional Office, the planned outputs, specific time frames, project results and other detailed activities and information were not indicated in the annual workplan and the folders for programme/projects in ProMS were not filled, hence, the annual workplan printout did not contain the necessary information.

174. At the Southern Sudan area office, the ProMS-generated standard project report was not prepared. Instead, the office prepared the end-of-year review report, but it contained only the budget and expenditures by project and not by activity; thus, information on key areas, such as a description of planned output against actual output and actual expenditure against funds budgeted, could not be determined. In the health programme, the annual workplan monitoring tool was used in only 3 out of 16 projects, but in those projects (sector policy and planning, integrated child health/primary health care, and immunization plus) key information was not indicated in areas such as results of activities and progress towards achieving country programme outputs.

175. The Board recommends that UNICEF ensure that the Americas and the Caribbean Regional Office and the Southern Sudan area office: (a) fully utilize ProMS as a monitoring tool for programme implementation and for requisitioning inputs; and (b) conduct training for all sector heads and programme/project officers on the use of programme management tools in ProMS.

Comparative analysis between the detailed annual workplan and implementation results

176. In line with the 2007 country office annual reporting guidelines, the UNICEF Division of Policy and Planning prescribed a reporting format for the uniform presentation of programme achievements. The guideline also required the incorporation in the country office annual report of a comparative analysis of the annual workplan and the actual results.

177. This objective, however, was not achieved, as no comparative analysis was undertaken of the detailed activities for each programme as contained in the annual workplan and the documented actual implementation results based on the annual workplan monitoring tool. It was also noted that the two documents (the annual workplan and its monitoring tool) were not attached as annexes to the country office annual report. Only the annual report of the Southern Sudan area office mentioned a comparison between the number of activities completed (502) as against the number planned (550) in the annual workplan.

178. The Director of the Division of Policy and Planning is of the view that attaching the annual workplan and the monitoring tools to the country office annual reports would be duplicative and unnecessary, as they were already available to potential reviewers through ProMS.

179. UNICEF agreed with the Board's recommendation that it ensure that the Division of Policy and Planning include in the guidelines for the 2008 country office annual reports a requirement to incorporate in section 2.2 of the report a comparative analysis of the annual workplan in relation to the actual results according to the annual workplan monitoring tool.

Programme refunds

- 180. Since the annual workplan describes the planned annual outputs and the activities to be carried out by the implementing Government or non-governmental partner and the support to be provided by the United Nations agency, it is used as the basis for any reservation of funds, the planning and requisition of supplies, contracts, travel authorizations, cash inputs and disbursements. As such, no disbursements are possible without an approved annual workplan.
- 181. The Board's review of the reported programme budget implementation by the India country office showed only the extent of budget utilization, not the programme refunds received (\$4.05 million for the biennium 2006-2007) that had to be reprogrammed, the actual utilization and unspent balances of which were also not indicated.
- 182. In its review of cash transfers to implementing partners, the Board noted that of the \$4.05 million in programme refunds, the \$199,920 received in 2006 related to 2004 and 2005 cash transfers and the \$14,580 received in 2006 and 2007 related to programmes with closed programme budget allocations. The refunds had already been reported as expenditure when the cash transfers to implementing partners were released.
- 183. The Board is concerned about the recurring overstatement of expenditure every biennium as a result of the refunds.
- 184. The Board recommends that UNICEF ensure that the India country office: (a) evaluate project proposals to determine the adequacy of requested financing by implementing partners and probable obstacles to implementation; (b) strengthen the monitoring of projects; and (c) document and monitor the reprogramming and utilization of refunds.

13. Revenue-producing activities

Income retention by National Committees from the sale of greeting cards and gifts

- 185. Rule 9.04 of the special supplement on the Greeting Card Operation to the UNICEF Financial Regulations and Rules provides that the National Committees may be authorized to retain up to 25 per cent of their gross proceeds from the sale of Greeting Card Operation products, such as cards and gifts, pursuant to a recognition agreement between the National Committee and UNICEF.
- 186. Verification revealed significant variations in the retention rates from the authorized 25 per cent. Of the 36 National Committees that submitted final revenue and expenditure reports for 2006, only 4 had retention rates below the authorized 25 per cent, while 32 had more than 25 per cent. One even applied a retention rate of 100 per cent.
- 187. The Private Sector Division explained that rule 9.04 would be revised in conjunction with an overall update of the UNICEF Financial Regulations and Rules

08-43952

to be undertaken along with the implementation of IPSAS. Furthermore, according to the Division, applying a simple 25 per cent retention policy throughout would jeopardize future income growth from fund-raising and did not take into account the specific needs or stages of development of individual committees.

188. The Board is of the view, however, that the Division could have maximized National Committee contributions to UNICEF had it strictly enforced the authorized retention rate of 25 per cent of gross proceeds from the sale of greeting cards and gifts.

189. The Board recommends that UNICEF ensure that the Private Sector Division enforces financial rule 9.04 relating to the retention of income by National Committees.

190. The Board also recommends that UNICEF evaluate the applicability of the 25 per cent retention rate to all National Committees.

Private Sector Division income based on provisional revenue and expenditure reports

191. To provide UNICEF with an income estimate for inclusion in its annual financial report, the gross proceeds from the sale of cards and gifts are accrued on the basis of the provisional revenue and expenditure reports received from the National Committees at the end of the campaign year. The accrual is eventually adjusted in the following year upon the receipt of the final revenue and expenditure reports. Likewise, related estimated expenditures incurred by the National Committees and the costs of goods delivered are accrued on the basis of the provisional revenue and expenditure reports, which are adjusted upon receipt of the final reports.

192. Furthermore, rule 9.09 of the special supplement on the Greeting Card Operation provides that all income from the Greeting Card Operation shall be recognized by the Comptroller in the relevant fiscal year in which it was earned and shall be recorded on the basis of financial reports submitted to the Greeting Card Operation by its sales agents.

193. The due dates for the submission of revenue and expenditure reports, as contained in the final instructions and the National Committees' planning and reporting calendar for the 2006 and 2007 campaign years, are provided in table II.11.

Table II.11 **Due dates for the submission of revenue and expenditure reports**

Campaign year	Provisional report	Final report
2006	31 January 2007	31 May 2007
2007	31 January 2008	31 May 2008

194. Under accounting instructions 2007/03, UNICEF was required to submit financial statements for the biennium ended 31 December 2007 by 31 March 2008. The Private Sector Division for its part was to complete all activities in preparation for consolidation by 8 February. The 31 May 2008 deadline in the reporting calendar

for campaign year 2007 was therefore beyond the 8 February 2008 deadline for financial reporting.

195. As a result, the recording of Private Sector Division income was based on estimates contained in the provisional reports of the National Committees. The Division explained that previously the National Committees had submitted their annual provisional reports by the end of February, and under the current business practices National Committees would not be able to comply with the request to submit their final reports by 31 January.

196. The Board recommends that UNICEF ensure that the Private Sector Division, in consultation with the National Committees, revises the reporting calendar for the submission of the final reports to coincide with the deadline for financial reporting.

197. The Private Sector Division commented that, given the specificities of the greeting card business, it would not be possible to implement the recommendation without fundamental technical changes and that this issue would be considered as part of a longer-term strategy discussion regarding future business models for cards and gifts.

14. Travel management

Late submission of travel claims

198. The verification of travel authorizations and travel reports during the biennium at headquarters and nine field offices (in Bangladesh, Bolivia, Colombia, Ethiopia, South Africa, Tokyo, Yemen and Geneva and at the Americas and the Caribbean Regional Office) revealed that travel reports (claims/reimbursements) had been submitted after the prescribed 15-day period, contrary to the provisions of the Administration Manual (chap. 8, sect. 1, para. 5.10). The delays were as long as 99 days in the Tokyo office and 194 days at the Americas and the Caribbean Regional Office.

199. Delays in the submission of travel reports result in delays of the recognition of travel expenses in the books of accounts. The Board is concerned that this affects the accuracy of the travel expense account owing to the temporary lodging of unliquidated travel advances under a receivable account.

200. UNICEF agreed with the Board's recommendation that it: (a) comply with policies and procedures on the submission of travel reports; and (b) ensure that travel advances are cleared within 15 days of the completion of travel.

201. UNICEF commented that it would ensure that managers monitor regular travel on time and enforce recovery through salary deductions in cases of non-submission of regular travel reports within the prescribed period.

Absence of travel plan

202. The Human Resources Manual (Vol. II, chap. 12, sect. 3, para. 12.3.80) provides that staff members must submit a local travel request form at least two weeks prior to the anticipated departure date. Staff members must be in possession of a signed travel authorization form prior to undertaking official duty travel. The same provision is contained in chap. 8, sect. 3, para. 4.2 of the UNICEF Administration Manual.

08-43952

203. The Board's review of travel at the Bolivia country office showed that a number of staff members had submitted their travel requests one day before or on the day of travel, despite instructions that travel requests must be initiated by each sector and sent to the administration 72 hours in advance. At the Philippines country office, the Board noted that travel authorizations had been issued after the start of or after the completion of travel.

204. Neither the Bolivia nor the Philippines country office had travel plans for 2006 and 2007, increasing the risk that an assessment of the relevance of the field trips to programme activities was not undertaken.

205. The Southern Sudan area office also did not have a travel plan for 2006-2007. Instead, a travel indicator report was prepared and all travel by Professional staff was monitored monthly during meetings of the area management team and quarterly in country management team meetings. The Office informed the Board that the preparation of an area-wide travel plan was not feasible in view of the emergency nature of the Southern Sudan area programme. However, the office plans to prepare a travel plan for 2009.

206. The Board recommends that UNICEF ensure that the Bolivia and the Philippines country offices and the Southern Sudan area office: (a) submit travel requests in a timely manner; and (b) prepare a travel plan in line with the UNICEF Administration Manual.

15. Internal audit function

207. It is the policy of the Office of Internal Audit to audit country offices at least once every five years. The Charter of Authorities and Responsibilities of the Office of Internal Audit was promulgated in February 2005, and the policy to audit each office within a period not to exceed five years has been in force since then. This same policy was used in the risk model from 2003 to 2007 and the global risk model for 2008.

208. An examination of the list of field offices audited by the Office of Internal Audit showed that 113 field offices were audited and 16 were not audited in calendar years 2003 to 2007. The field offices not audited were those in Argentina, Azerbaijan, Bhutan, Brazil, the Congo, Costa Rica, Eritrea, the Gambia, Ghana, Lesotho, Malaysia, Mexico, Morocco, Nepal, Peru and Uruguay. Verifiable explanations were given, however, for the postponement of the 16 audits, and the audits were included in the workplan of the Office for 2008.

209. The same lists showed that 17 field offices had been audited more than once during the same period, as shown in table II.12.

Table II.12 List of offices audited more than once by the Office of Internal Audit from 2003 to 2007

Country office	2003	2004	2005	2006	2007	Total
Belarus	X				X	2
Burundi	X			X		2
Djibouti	X			X		2
Bangladesh		X		X		2
Indonesia	X	X	X	X	X	5
Kenya	X				X	2
Pakistan	X			X		2
Iraq		X	X	X		3
Nigeria		X		X		2
India		X		X		2
Ethiopia			X		X	2
Rwanda	X				X	2
Zambia	X			X		2
Zimbabwe	X			X		2
Sri Lanka			X		X	2
Kazakhstan	X				X	2
The former Yugoslav Republic of Macedonia	X			X		2

210. The objective of the Office of Internal Audit to audit all field offices in the span of five years had apparently not been met because 16 offices had not been audited in the past five years (2003-2007), while 17 offices had been audited twice or more during the same period. UNICEF explained that the Office of Internal Audit had audited all country offices at least once since 2001.

211. UNICEF further explained that there were reasons for the repeated audits, namely: (a) 9 of the offices were among the top 10 country offices based on programme budget allocation during the period 2003-2007; (b) consistent with its charter and where possible, the Office of Internal Audit had since prioritized audits of the top 10 country offices, undertaking one audit every two years. The small offices, in Belarus and Kazakhstan, were prioritized for audit in 2007 ahead of the Gambia in order to economize on the use of audit resources; and (c) Burundi, Djibouti, Kenya, the former Yugoslav Republic of Macedonia, Rwanda, Zambia and Zimbabwe were prioritized on the basis of risk, observed from various risk models and consultations.

212. As at 30 June 2008, 11 of the 16 country offices had since been audited. The remaining 5 would be audited between July and September 2008.

16. Internal audit findings

Observation

213. In 2007, 23 country offices and 1 zone office were audited by the Office of Internal Audit. Of the 385 audit observations issued, 70 per cent have been favourably acted upon. In 2006, 27 country offices were audited and 490 audit observations were issued. Only 9 of the 490 observations remain open, and all pertain to one country office.

214. Twenty of the open observations from 2007 and two from 2006 were rated as high risk. The Board is concerned of the need to immediately address the high-risk issues.

215. Five significant observations and recommendations are summarized in table II.13.

Recommendations

Table II.13
Summary of Office of Internal Audit observations and recommendations

1. Monitoring and disposal of non-expendable property. The inventory database was not accurate and up-to-date, including incorrect sales values of disposed vehicles as well as no record maintained on the disposal of 400 obsolete items as well as the inventory numbers of communication equipment destroyed.

The office should review the functioning of the Property Survey Board once a year to ensure that the established policies concerning disposal of non-expendable property as stated in financial circular 10 are complied with. The office should ensure that Property Survey Board recommendations are implemented in a diligent and timely manner.

2. Functioning of the Property Survey Board. The Board did not meet regularly, did not properly maintain minutes of its meetings and did not report on the action taken on the disposal of five vehicles and computer and telecommunication equipment.

The office should establish adequate procedures for monitoring, recording and disposal of non-expendable property to ensure that all inventory items are accounted for. The office should assign responsibility to review all obsolete items stored in the warehouse and to ensure that the inventory database is reconciled with the actual physical existence of the items.

There was also significant delays in the execution of Property Survey Board recommendations relative to disposal of non-expendable property inventory items and the functioning of the Board.

The office should ensure that activities are realistically scheduled in the annual workplans and that schedules reflect partners' implementation plans; the office should also take steps to help ensure that partners' requests for programme inputs are received within an adequate time frame prior to the planned start of activities, to enable timely processing.

3. Inadequate planning and scheduling of activities. Some of the programmes and zone offices had utilization rates below 50 per cent at the end of October 2007. Examples include health and nutrition (48 per cent), water and sanitation (24 per cent) and HIV/AIDS (21 per cent). The low utilization and the tendency to use significant amounts of programme funds

Observation

Recommendations

in the last quarter of the year were due to various factors, including inadequate work planning and inadequate capacity to implement planned activities.

The office should establish a process for periodic review and adjustment of planned activities based on available staff and implementing partner capacities to manage the implementation of planned activities, and also ensure that financial resources are periodically adjusted and rephased based on the activities that can be implemented.

4. Inadequate segregation of financial duties. At the time of audit, the Officer-in-Charge of operations was performing multiple duties that were incompatible. The staff member who performed accounting functions was also the ProMS systems administrator because of a shortage of operations staff. As a compensating control, the Officer-in-Charge was not designated as a paying officer. This, however, cannot guarantee the prevention of inappropriate transactions.

The office should review and adjust the responsibilities assigned to the Officer-in-Charge of operations to ensure a clear segregation of duties, in accordance with financial circular 34 on financial implementation.

5. Transfer of high-value equipment to a non-governmental organization

(NGO). The office donated to an NGO a drilling rig acquired in 2000 with a value of \$406,805 under an agreement with the Church of Christ Rural Water Supply Development Project, however, the office continued to support the repair and maintenance of the rig, including spare parts costing \$35,000. The audit considered that the agreement was high risk since the partner was a small local NGO.

The office should strengthen standards and procedures for the release of equipment to NGOs, ensuring that donation of high-value equipment to NGOs is justified and included in the programme cooperation agreements on exceptional basis and extensions of the agreements are adequately justified.

The office should explain why the drilling rig was donated to the Church of Christ Rural Water Supply Development Project although this was not included in the programme cooperation agreement.

17. Write-offs and disposals

216. In the biennium 2006-2007, the Executive Board of UNICEF approved the write-off of the assets listed in table II.14.

08-43952

Table II.14 **Assets written off during the biennium 2006-2007**

(United States dollars)

Inventory stock	820 594
Uncollectible receivables	285 347
Other assets	393 749
Uncollectible contributions	19 478 783
Total	20 978 473

18. Ex gratia payments

217. In line with UNICEF financial rule 113.9, the Administration informed the Board that there were no ex-gratia payments during the biennium.

19. Cases of fraud and presumptive fraud

218. During the biennium 2006-2007, UNICEF reported to the Board a total of 58 cases of fraud or presumptive fraud (as against 42 cases in 2004-2005). Examination of the details of those cases showed that UNICEF had not yet determined the financial loss in the majority of the cases.

C. Acknowledgement

219. The Board of Auditors wishes to express its appreciation for the cooperation and assistance extended by the Executive Director and staff of the United Nations Children's Fund.

Annex
Analysis of the status of implementation of the Board's recommendations for the biennium ended 31 December 2005^a

	Subject	Paragraph reference ^a	First reported	Fully implemented	Under implementation	Not implemented
1.	Review the allocation of resources within countries considering the strategic priorities and the allocation of supplementary funding.	20	2004-2005		X	
2.	For the fund-raising strategy, identify ways of increasing the proportion of regular resources.	21	2004-2005	X		
3.	Review the capacity to sustain the increase in the portfolio of supplementary funded projects.	29	2004-2005	X		
4.	Review the procedure for raising and verifying unliquidated obligations relating to programme supplies.	36	2004-2005	X		
5.	Advocate the expeditious review of the medical insurance plan in cooperation with other United Nations organizations.	42	2002-2003		X	
6.	Amend the presentation of the cost recovery in statements I and IV or submit a redefinition of programme support expenditure to the Executive Board.	47	2000-2001		X	
7.	Review and improve the procedure on the disclosure of the value of non-expendable property.	54	2004-2005	X		
8.	Conduct a comprehensive analysis of long- outstanding contributions receivable and take appropriate action.	58	2004-2005	X		
9.	Revise manuals and the special supplement to the UNICEF Financial Regulations and Rules.	62	2004-2005		X	
10.	Review by the Private Sector Division of its policy on the determination of the provision for uncollectible accounts receivable and to ensure that it excludes written-off receivables from the provision for uncollectible receivables.	66	2004-2005	X		
11.	Attach an annex on financial reporting and transfers of funds to its agreements with national committees.	72	2002-2003		X	
12.	Harmonize the accounting treatment of private sector fund-raising proceeds.	78	2004-2005		X	
13.	Calculate, monitor and make available to national committees the overall support costs of income and expenditure to ensure that they are appropriately explained and disclosed.	81	2002-2003	X		

	Subject	Paragraph reference ^a	First reported	Fully implemented	Under implementation	Not implemented
14.	Set and monitor a target for the proportion of thematic contributions within other resources as part of its global fund-raising strategy.	86	2004-2005	X		
15.	Set and monitor targets for local private sector fund-raising in potential high-growth country offices.	88	2004-2005	X		
16.	Review supply-chain management to consider the cost-effectiveness of locally manufacturing part of its products.	91	2004-2005	X		
17.	Revise E/ICEF/Organization/Rev.3 to adapt the accountabilities of each unit to the core commitments for children in emergencies.	99	2004-2005		X	
18.	Expedite the development of its emergency "talent pool".	104	2004-2005		X	
19.	Bring to the attention of the Inter-Agency Standing Committee the identification and recruitment of human resources for emergencies.	106	2004-2005	X		
20.	Establish and monitor the implementation of quality standards for emergency preparedness and response plans.	108	2004-2005	X		
21.	Consider sharing its 24-hour operations centre with other United Nations agencies.	110	2004-2005	X		
22.	Monitor more closely the target arrival date of emergency local orders and the date of their issuance.	113	2004-2005			X
23.	Update the Supply Division's emergency preparedness and response plan.	115	2004-2005	X		
24.	Set and enforce quality standards for the supply and logistics components of emergency preparedness and response plans.	118	2004-2005	X		
25.	Increase of the proportion of field offices using the supply-planning module.	121	2004-2005	X		
26.	Update of the list of approved emergency items.	124	2004-2005		X	
27.	Revise the long-term arrangements with suppliers after updating its approved emergency items list.	128	2004-2005		X	
28.	Assess the reliability and accuracy of the Supply Division's key performance indicators.	130	2004-2005	X		
29.	Comply with rules regarding the segregation of duties between certifying and approving officer.	133	2004-2005	X		
30.	Regular review of all user profiles in the Systems Applications and Products to ensure adequate segregation of duties.	135	2004-2005	X		

	Subject	Paragraph reference ^a	First reported	Fully implemented	Under implementation	Not implemented
31.	Issue a guideline on investments in research and development to avoid the recurrence of advance payments for untested or faulty items.	141	2004-2005	X		
32.	Adopt a policy that would require contracts involving significant financial commitments to be submitted to the Senior Adviser (legal) for clearance.	144	2004-2005	X		
33.	Review the sustainability of the increase in procurement activity of the China country office.	149	2004-2005	X		
34.	Review relationships with national committees in the light of the tsunami fund-raising experience.	157	2004-2005	X		
35.	Provide guidance to field offices on the appropriate method to structure emergency programmes for reporting purposes.	159	2004-2005	X		
36.	Review the guidance on emergency preparedness and response planning,	163	2004-2005	X		
37.	Regular monitoring by regional offices of the status and quality of country office emergency preparedness and response plans.	165	2004-2005	X		
38.	Finalize the development of a rapid assessment manual to share with the members of the Inter-Agency Standing Committee to form the basis of a common methodology.	168	2004-2005	X		
39.	Assist country offices to ensure that they produce an extended assessment in compliance with the core commitments to children in emergencies.	170	2004-2005		X	
40.	Prepare comprehensive multi-year budgets and workplans for utilizing funds received in excess of initial requirements.	176	2004-2005	X		
41.	Allocate emergency funding to field offices in the context of appeals or other validated plans.	179	2004-2005	X		
42.	Systematically seek explicit donor approval to extend or modify the geographic or thematic reach of funds it is entrusted with.	183	2004-2005	X		
43.	Include the management of emergency surge capacity in the strategic review of human resources.	186	2004-2005	X		
44.	Include in the strategic review of human resources the process of recruiting temporary fixed-term staff for emergencies.	188	2004-2005	X		
45.	Improve the quality of supply and distribution planning in emergencies	193	2004-2005	X		
46.	Identify ways to quickly assess and raise financial and administrative capacity of implementing partners during emergencies.	195	2004-2005		X	

	Subject	Paragraph reference ^a	First reported	Fully implemented	Under implementation	Not implemented
47.	Use standard rates of allowances for training sessions, workshops and other activities funded by cash assistance.	197	2004-2005	X		
48.	Improve compliance of cash assistance in Indonesia and Sri Lanka with the requirements of financial circular 15 (Rev. 3).	199	2004-2005	X		
49.	Liaise with the United Nations Office for Project Services (UNOPS) to ensure that financial procedures for direct construction adequately safeguard UNICEF interests.	203	2004-2005		X	
50.	Review the means necessary to fully discharge its sectoral lead responsibilities for the relevant cluster in the Inter-Agency Standing Committee framework.	207	2004-2005	X		
51.	Monitor the involvement of its senior field management teams in inter-agency coordination forums.	217	2004-2005	X		
52.	Systematically bring unsatisfactory levels of inter-agency coordination to the attention of regional directors, the United Nations Development Group and, where appropriate, the High-Level Committee on Management.	218	2004-2005	X		
53.	Advocate, in consultation with the United Nations country team, for an extension of the preferential conditions it benefits from for its accommodation in China to other United Nations agencies.	225	2004-2005	X		
54.	Systematically advocate for joint premises to be considered by United Nations country teams when new or expanded premises are required in the context of a humanitarian crisis.	227	2004-2005	X		
55.	Include active involvement of field offices in the development of common services in the criteria used to assess the performance of country representatives and liaise with the United Nations Development Group Office to determine the options available to increase the proportion of common services in field offices.	237	2004-2005	X		
56.	Liaise with the United Nations Development Group Office to identify ways of improving the timeliness and relevance of the common country assessment/United Nations Development Assistance Framework process.	243	2004-2005	X		
57.	Liaise with the Department of Peacekeeping Operations to clarify the respective mandates of UNICEF field offices and integrated peacekeeping missions in the area of child protection.	247	2004-2005	X		

	Subject	Paragraph reference ^a	First reported	Fully implemented	Under implementation	Not implemented
58.	Draw lessons learned from its lack of provision of inputs for joint district-level implementation of the coordinated HIV/AIDS Response through Capacity-building and Awareness project.	252	2004-2005	X		
59.	Invite the China United Nations country team to draft and approve an integrated HIV/AIDS master plan of operation that focuses on reducing programme duplication and maximizing effectiveness.	258	2004-2005	X		
60.	Invite the China United Nations country team to develop projects involving joint implementation.	260	2004-2005	X		
61.	Review whether its approach to the HIV/AIDS epidemic is sufficiently closely aligned to its mandate.	262	2004-2005	X		
62.	Initiate negotiations at the appropriate level to conclude a framework agreement.	270	2004-2005	X		
63.	Benchmark procurement services with United Nations and other public procurement services to determine whether the level of its handling charge for cost recovery is appropriate.	272	2004-2005	X		
64.	Monitor the proportion of its purchases that take place within a collaborative United Nations framework.	277	2004-2005	X		
65.	Take further steps to encourage other United Nations agencies to use its procurement services and long-term arrangements.	279	2004-2005	X		
66.	Endeavour to jointly purchase items of common interest with the Office of the United Nations High Commissioner for Refugees (for example, tents, tarpaulins, blankets, collapsible jerrycans, mosquito bednets), whenever it would result in cost or efficiency gains for the United Nations as a whole.	282	2004-2005	X		
67.	Implement a comprehensive risk-management framework to enhance its governance and management control processes.	294	2004-2005	X		
68.	Review the terms of reference of its audit committee in line with the United Nations governance review.	300	2004-2005	X		
69.	Support the rapid expansion of the Office of Internal Audit coverage of all headquarters areas, including information technology.	306	2004-2005	X		
70.	Give high priority to a review of the adequacy of the Office of Internal Audit resources in the light of the expanded coverage required and of the various options available to meet that requirement.	307	2004-2005	X		

	Subject	Paragraph reference ^a	First reported	Fully implemented	Under implementation	Not implemented
71.	Expedite the approval of updated anti-fraud procedures.	310	2004-2005	X		
72.	Review internal audit procedures and work with the Audit Committee to ensure it significantly improves its report-issuance lead time.	313	2004-2005	X		
73.	Take steps to improve Office of Internal Audit internal quality assurance processes.	317	2004-2005	X		
74.	Update the job descriptions of senior staff.	321	2004-2005	X		
75.	File performance reports for all staff members, including at the Assistant Secretary-General level and above.	323	2004-2005	X		
76.	Define guidelines on gifts received and given and consider introducing a single, UNICEF- wide instruction to that effect.	325	2004-2005	X		
77.	Monitor detailed, measurable and achievable indicators for all UNICEF entities.	328	2004-2005	X		
78.	Establish a travel plan for staff members of the Office of the Executive Director.	331	2004-2005	X		
79.	Achieve greater interchangeability among Deputy Executive Directors, in particular regarding the oversight of divisions.	332	2004-2005	X		
80.	Ensure that briefing notes for the Executive Director abide by the deadlines and comply with the harmonized format.	334	2004-2005	X		
81.	Review the management of talking points and reports prepared by the Office of United Nations Affairs and External Relations.	340	2004-2005	X		
82.	Draft the guidelines requested in the Human Resources Manual, chapter 6, section 2, on temporary assistance.	342	2004-2005	X		
83.	Identify the reasons for the breakdown in financial controls that led to paying for temporary assistance in the absence of the required contract, and address them.	344	2004-2005	X		
84.	Provide senior managers with statistics regarding the timely submission of documents by their offices and divisions.	347	2004-2005	X		
85.	Propose to the Executive Board that it extend the scope of the guidelines for field visits to the President's travels.	349	2004-2005	X		
86.	Consult United Nations Headquarters on best practices regarding the recruitment as staff members of former representatives to the Executive Board.	353	2004-2005	X		
87.	Implement automated alerts and statistics on the use of information and communications technology resources.	357	2004-2005	X		

	Subject	Paragraph reference ^a	First reported	Fully implemented	Under implementation	Not implemented
88.	Implement vulnerability assessment of firewalls on a more regular basis, to be determined after considering United Nations and private sector best practices in this respect.	359	2004-2005	X		
89.	Implement logical security controls in order to strengthen the protection of computer facilities against fraud or misuse.	361	2004-2005	X		
90.	Strengthen remote access security, with due consideration of the inter-agency context.	363	2004-2005	X		
91.	Ensure proper segregation of duties in its information technology systems.	368	2004-2005	X		
92.	Review the policy on extended access in the production system.	370	2004-2005	X		
93.	Adopt and implement a methodology to determine the total costs, including staff costs, of its major information technology projects.	379	2004-2005	X		
94.	Improve the documentation of information and communications technology system selection by performing formal multi-vendor costbenefit evaluations.	385	2004-2005	X		
95.	Improve the information technology quality assurance process to bring it fully into line with industry best practices.	387	2004-2005	X		
96.	Issue an instruction on the follow-up of external audit recommendations.	389	2004-2005	X

Chapter III

Audit opinion

We have audited the accompanying financial statements of the United Nations Children's Fund (UNICEF), comprising statements numbered I to VII and the supporting notes and annexes, for the biennium ended 31 December 2007. These financial statements are the responsibility of the Executive Director. Our responsibility is to express an opinion on the financial statements based on our audit.

We conducted our audit in accordance with the International Standards on Auditing. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting policies used and significant estimates made by the Executive Director, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for the audit opinion.

In our opinion, the financial statements present fairly, in all material respects, the financial position of UNICEF as at 31 December 2007 and the results of its operations and its cash flows for the period then ended, in accordance with the United Nations system accounting standards.

Furthermore, in our opinion, the transactions of the United Nations Children's Fund that have come to our notice or which we have tested as part of our audit have in all significant respects been in accordance with the Financial Regulations and Rules of UNICEF and legislative authority.

In accordance with article VII of the Financial Regulations and Rules of the United Nations, we have also issued a long-form report on our audit of the United Nations Children's Fund.

(Signed) Philippe **Séguin**First President of the Court of Accounts of France
Chairman of the United Nations Board of Auditors

(Signed) Reynaldo A. Villar Chairman, Philippine Commission on Audit (Lead Auditor)

(Signed) Terence **Nombembe** Auditor-General of the Republic of South Africa

30 June 2008

Notes to the financial statements

Note 1

Statement of the objectives and activities of the United Nations Children's Fund

1. UNICEF is mandated by the United Nations General Assembly to advocate for the protection of children's rights, to help meet their basic needs and to expand their opportunities to reach their full potential. The organization mobilizes political will and material resources to help countries, particularly developing countries, ensure a "first call for children" and build their capacity to form appropriate policies and deliver services for children and their families.

Note 2

Summary of significant accounting policies

United Nations Children's Fund

Accounting convention

- 2. The financial statements are prepared in accordance with the Financial Regulations and Rules of UNICEF and the United Nations system accounting standards.
- 3. With the goal of achieving harmonization in the presentation of accounts by agencies in the United Nations system, the financial statements are presented in line with the formats agreed upon by the United Nations System Chief Executives Board for Coordination.

Financial period

4. In accordance with the UNICEF Financial Regulations and Rules, the accounts are maintained on a biennial basis.

Unit of account

5. The accounting unit is the United States dollar. The equivalent in United States dollars of other currencies is established on the basis of the United Nations operational rate of exchange.

Translation of currencies

6. Assets and liabilities in currencies other than United States dollars are revalued for accounting purposes at the prevailing United Nations operational rates of exchange. Any variance due to fluctuation of those rates is accounted for as income or loss and shown separately in the statement of income and expenditure. In accordance with UNICEF Executive Board decision 1990/28, differences resulting from the payment of contributions pledged in currencies other than United States dollars are recorded against the contributions.

Income

7. Income consists of regular resources, supplementary funds and funds for emergency relief and rehabilitation. Regular resources include funds from the voluntary annual contributions of Governments, intergovernmental organizations

and non-governmental organizations (NGOs), the net income from the Private Sector Division, non-earmarked funds contributed by the public and other income. Supplementary funds are those contributed to UNICEF by Governments, intergovernmental organizations, NGOs and the United Nations system for specific purposes within the programmes approved by the UNICEF Executive Board. Emergency relief and rehabilitation funds include those contributed for emergency operations.

- 8. Income is recorded on the basis of funds or pledges received for the current year. Funds received for future years for purposes specified by donors are considered deferred income and are recorded as "contributions received in advance".
- 9. Contributions income received from National Committees for UNICEF is accounted for on a cash basis, with the exception of contributions for supplementary funds and for emergency relief and rehabilitation, which may be recorded on the basis of a valid pledge from a National Committee. The validity of the pledge is determined by the existence of funds raised and a statement from the National Committee that it is committing funds to UNICEF in the form of a pledge.
- 10. The statement of income and expenditure does not include funds received and disbursements made from trust funds.
- 11. All other income received by UNICEF is classified as miscellaneous income and is credited as regular resources.
- 12. Contributions in kind are valued by management and reflect the cost UNICEF would normally pay for similar items.
- 13. Supported deliveries are not reflected in the financial accounts of UNICEF, although they are handled through the administrative structures of the organization.

Expenditure

- 14. All expenditures of UNICEF are accounted for on an accrual basis, except for those relating to staff entitlements, which are accounted for on the basis of cash disbursements only.
- 15. Deferred charges comprise expenditure items that are not properly chargeable in the current financial period and that will be charged as expenditure in a subsequent financial period.
- 16. No provision is made for end-of-service entitlements for staff with temporary fixed-term contracts, staff on loan, Junior Professional Officers or staff who are not part of the UNICEF payroll. Also, no provision is made to meet contingencies under appendix D of the United Nations Staff Rules, as funds are provided in the budget appropriations as required.

Cash

17. All funds received, including those under trust fund arrangements, are deposited into UNICEF bank accounts and reflected as cash holdings.

08-43952 **89**

Inventory

18. The inventory of programme supplies at UNICEF Supply Division warehouses is shown at average cost. All costs associated with bringing the goods to the warehouse are considered as part of the average cost. Goods in transit to the warehouse are valued at actual cost.

Capital assets

19. Capital assets consist of buildings and staff housing and are presented at acquisition cost.

Consolidation

20. The financial report and statements reflect the net operating income, assets and liabilities of the Private Sector Division. Inter-office transactions between UNICEF and the Private Sector Division are eliminated on consolidation.

Non-expendable property

21. Furniture, equipment and other non-expendable property are not included in the assets of the organization. Acquisitions are charged against budgetary accounts in the year of purchase.

Private Sector Division

Accounting convention

22. Private Sector Division accounts are maintained in accordance with the UNICEF Financial Regulations and Rules and the Greeting Card Operation special supplement.

Translation of currencies

23. Proceeds are recorded in local currency on the basis of annual reporting and are converted to United States dollars at the United Nations operational rates of exchange prevailing on 31 December.

Allowance for doubtful accounts receivable

24. In accordance with Private Sector Division accounting policy, a provision to cover accounts receivable that are considered doubtful for collection may be established.

Inventory

25. The inventory of work in process and finished goods is valued at standard cost, while raw materials are valued at moving average cost. It is Private Sector Division policy to write down unsold cards and dated products at the end of the first sales campaign year and all other products at the end of the second sales campaign year. Products that have been written down and carried forward are valued at their add-on cost. All publicity and promotional materials produced in the current campaign year but relating to future campaign years are shown at standard cost and included in inventory.

Capital assets

26. Capital assets costing \$100,000 or more are capitalized and depreciated over their estimated useful life.

Liabilities

27. Liabilities are accrued in the Private Sector Division accounts following recognized accounting standards, and appropriate cut-off procedures are followed consistently.

Income

- 28. Gross proceeds from the sale of cards and products are recorded in foreign currency and accrued on the basis of the provisional sales reports received from the sales partners at year's end. They are converted into United States dollars at the United Nations operational rates of exchange prevailing on 31 December of the year in question. The accrual is adjusted in the following year on receipt of the final sales report. If the provisional sales report is not received from a sales partner by end-of-year closure, gross proceeds are accrued on the basis of that sales partner's average sales-to-delivery ratio for the current year.
- 29. Income from private sector fund-raising activities and related expenses are recorded separately in the Private Sector Division accounts. The net proceeds raised by National Committees from private sector fund-raising activities are recorded on the basis of the reports they submit at year's end, while the net proceeds raised by field offices from private sector fund-raising activities are recorded on receipt of funds.

Note 3 Transfer to the biennial support budget

30. A transfer is made from income to the biennial support budget, in keeping with the budget harmonization of the United Nations Development Programme, the United Nations Population Fund and UNICEF, as follows:

(Thousands of United States dollars)

	2006-2007	2004-2005
Government contributions towards local costs	462	346
Income tax reimbursement	28 624	23 831

Total	89 081	129 159	20 720	197 520

Reserve for procurement services

- 31. The Executive Board approved the establishment of a reserve for procurement services of \$2 million. There were no movements in the reserve in the biennium ended 31 December 2007.
- 32. The income and expenditure relating to procurement services amounted to:

(Thousands of United States dollars)

Transfer to miscellaneous income	23 402	12 689
Staff and related expenses	20 859	16 021
Funds received	44 261	28 710
	2006-2007	2004-2005

Reserve for insurance

33. The Executive Board approved the establishment of a reserve for insurance of \$200,000 to absorb losses of UNICEF programme supplies and equipment not covered by commercial insurance. In 1987, UNICEF established a reserve of \$100,000 to self-insure for property losses. There were no movements in the reserve in the biennium ended 31 December 2007.

Reserve for capital assets

34. The Executive Board approved the establishment of a capital asset reserve of \$22 million to better control future purchases of UNICEF capital assets, mainly buildings to be purchased for office accommodations and staff housing in the field.

08-43952 **93**

Reserve for after-service health insurance

35. In 2003, the Executive Board approved the establishment of a funded reserve for after-service health insurance and an initial allocation of \$30 million from UNICEF regular resources. The reserve was increased by \$90 million during the biennium ended 31 December 2007. Currently, disbursements for retirees are charged against the budget appropriations of the periods when actual payments are made.

Reserve for separation fund

36. In 2006, the Executive Board approved the establishment of a separation fund to cover separation and termination liabilities and an initial allocation of \$10 million from UNICEF regular resources. The fund will be built up on an annual basis by the net of total contributions less payments made. There was an increase of \$8.3 million in the reserve during the biennium ended 31 December 2007.

Note 8 Cash and term deposits

(Thousands of United States dollars)

	2007	2005
Term deposits	2 100 992	2 125 318
Cash (convertible)	116 130	61 636
Cash (non-convertible)	12 707	7 557
Total cash and term deposits	2 229 829	2 194 511

Note 9 Investments

- 37. Investments include marketable securities and other negotiable instruments acquired by the organization to produce income. Investments are stated at cost plus or minus any amortized premium or discount. As at 31 December 2007, a total of \$445 million was invested in fixed-income securities.
- 38. As at 31 December 2007, the market value of investments was \$446 million. While the market value of the financial instruments may fluctuate during the investment period, it does not affect the value due on maturity to UNICEF.

Note 10 Ageing analysis of contributions receivable

(Thousands of United States dollars)

	Prior to 2005	2005	2006	2007	Total, 31 December 2007	Total, 31 December 2005

Note 19 Medical insurance plan

(Thousands of United States dollars)

	2006-2007	2004-2005
Opening balance	39 569	31 450
Premiums	23 833	17 921
Expenditure	16 380	9 802
Ending balance	47 022	39 569

41. The medical insurance plan is a health and dental insurance plan operated by the United Nations, the United Nations Development Programme, the Office of the United Nations High Commissioner for Refugees and UNICEF at designated duty stations for the benefit of locally recruited current and former General Service staff, National Professional Officers and their eligible family members. Staff and the organization share in the cost of the premiums. The balance represents premiums less expenditure.

Note 20 After-service health insurance liability

42. In order to gain a better understanding of the financial dimensions of the organization's liability for after-service health insurance, a consulting actuary was engaged to carry out an actuarial valuation of post-retirement health insurance benefits as at 31 December 2005.

(Thousands of United States dollars)

	Present value of future benefits as at 31 December 2005	Accrued liability as at 31 December 2005
Gross liability	589 213	368 946
Offset from retirees	121 769	76 566
Total	467 444	292 380

43. The report of the consulting actuary engaged to revise the valuation as at 30 June 2007 was not available at the time these financial statements were

08-43952 **97**

published. The actuary has provided a preliminary indication that the financial dimensions of UNICEF liability have increased significantly and that the accrued liability as at 30 June 2007 totalled \$482.7 million.

- 44. The present value of future benefits is the discounted value of all benefits, less retiree contributions, to be paid in the future to all current retirees and active employees expected to retire in the future. In actuarial terminology, it is called the expected post-retirement benefit obligation.
- 45. The accrued liability for future benefits represents that portion of the present value of benefits that has accrued from the employee's date of hire until the valuation date. An active employee's benefit is fully accrued when that employee has reached the date of full eligibility for benefits. Thus, for retirees and active employees who are eligible to retire with benefits, the present value of future benefits and the accrued liability are equal. In actuarial terminology, the accrued liability is called the accumulated post-retirement benefit obligation.
- 46. As at 31 December 2007, the balance for the after-service health insurance reserve was \$150 million.

Note 21 Other end-of-service liabilities

47. The net contingent liability for staff benefits as at 31 December 2007 is estimated at \$84 million, consisting of the following:

(Thousands of United States dollars)

	2007	2005
Accumulated leave	45 155	38 902
Repatriation grant	40 488	36 909
Total	85 643	75 811

48. In 2006, the Executive Board authorized the establishment of a separation fund to cover separation and termination liabilities. The reserve balance was \$18 million at the end of 2007.

Note 22 United Nations Joint Staff Pension Fund

- 49. UNICEF is a member organization participating in the United Nations Joint Staff Pension Fund, which was established by the General Assembly to provide retirement, death, disability and related benefits. The Pension Fund is a funded defined-benefit plan. The financial obligations of the organization to the Pension Fund consist of its mandated contribution at the rate established by the General Assembly, together with any share of any actuarial deficiency payments under article 26 of the Regulations and Rules of the Fund. Such deficiency payments are payable only if and when the General Assembly has invoked the provision of article 26, following a determination that there is a requirement for deficiency payments based on an assessment of the actuarial sufficiency of the Fund as at the valuation date.
- 50. At the time of the preparation of the present report, the General Assembly had not invoked that provision.

Note 23 Non-expendable property

Total	142 614	128 287
Cost of non-expendable property under UNICEF custody	97 082	83 676
Cost of non-expendable property — UNICEF	45 532	44 611
	2007	2005

Note 24 Liquidity

- 51. UNICEF internal liquidity guidelines recommend a year-end regular resources convertible cash balance equal to at least 10 per cent of projected regular resources income for the following year.
- 52. The financial plan for 2007 recommended a minimum regular resources convertible cash balance of \$115 million.
- 53. For the purpose of meeting this internal guideline, UNICEF cash holdings and investments, excluding trust funds, are estimated to be split between regular resources and other resources as follows:

(Thousands of United States dollars)

	Regular resources	Other resources
Term deposits, cash (convertible) and investments	810 997	1 536 555
Cash (non-convertible)	12 707	
Total	823 704	1 536 555

54. UNICEF met its internal liquidity guideline for the year 2007.

Note 25 In-kind contributions

55. UNICEF provided in-kind contributions to the following organizations during the biennium ended 31 December 2007:

(Thousands of United States dollars)

	Total 2006-2007	Total 2004-2005
Global Alliance for Vaccines and Immunization		512
Joint United Nations Programme on HIV/AIDS	89	118

Annex II

Glossary

accounts, audited. The financial statements of the organization for a specified period or at a specified date audited by the external auditors (United Nations Board of Auditors).

accrual basis of accounting. The accrual basis of accounting for revenue in each financial period means that income is recognized when it is due and not when it is received. Accrual of expenditures in each financial period means that costs are recognized when obligations arise or liabilities are incurred and not when payments are made.

asset. An asset is a resource owned by or due to the organization as a result of past events.

budget. A plan in financial terms for carrying out proposed activities in a specified time. The term "budget" is used to refer to UNICEF programme support, management and administration costs, programme assistance and the Private Sector Division. However, the Executive Board approves an appropriation of funds only for the UNICEF support budget and the regular resources part of intercountry programmes.

budget appropriation. The total appropriation of funds approved by the Executive Board for UNICEF programme support, management and administration costs and programme assistance against which obligations may be incurred for those purposes up to the amount so approved.

budget estimate. Estimates of the costs of proposed programme support, management and administration and programme assistance prepared for submission to the UNICEF Executive Board for the approval of relevant appropriations.

budget estimate, revised. Resulting from Executive Board approval of "supplementary estimates" proposed to adjust an approved budget.

cash holdings. The aggregation of all the funds of the organization, including coins, banknotes, cheques, balances in current and call accounts, savings accounts and interest-bearing deposits.

cash in transit. Cash transfers between one or more UNICEF bank accounts at a specified time.

cash in current bank accounts. The aggregate of money maintained in UNICEF bank accounts, as reflected in the UNICEF books of account, to sustain operational requirements.

cash in interest-bearing deposits. Funds temporarily available over those needed for immediate requirements, held in short-term, interest-bearing deposits and ready to be drawn down when needed.

cash-on-hand (also called "petty cash"). Cash kept on hand by authorized officers as a convenience for making small payments on behalf of the organization.

contributions, voluntary. Contributions to UNICEF that are offered and accepted without reference to a scale of assessments determined by any United Nations legislative body.

08-43952

contributions receivable. Contributions pledged to UNICEF but not received until a future time.

currencies of "restricted use" for UNICEF. Currencies the use of which (mainly in respect of transferability and convertibility) is limited because of foreign exchange regulations or a donor's wish. When those limitations do not exist, the currencies are considered by UNICEF as "unrestricted" because they are fully convertible.

earmarked. To give expression to a restriction imposed by agreement or by administrative action on the use of an account or of an equivalent amount of assets.

expenditure. The sum of disbursements and valid unliquidated obligations made against the appropriation/allocation for the period.

financial period. The operating period of the organization covered by the financial statements is a biennium.

financial regulations. Until 31 December 1987, UNICEF accounts were maintained in accordance with the Financial Regulations and Rules of the United Nations, with such modifications as required by the nature of UNICEF work. Since 1 January 1988, UNICEF accounts have been maintained in accordance with the UNICEF Financial Regulations and Rules.

fund balance. Fund balances and reserves represent the difference between the assets and the liabilities of the organization. They consist of funds available for the implementation of programmes funded by regular resources and supplementary funds as well as funds available for the acquisition of capital assets.

income. Money or money equivalent received or accrued during the financial period which increases existing net assets. UNICEF income is recorded on the basis of funds or pledges received for the current year. It comprises funds classified as "regular resources", "supplementary funds" and "emergency relief and rehabilitation".

income, deferred. Funds received or pledges recorded as receivable, attributable to future financial periods and, therefore, not credited to the income account of the period reported on.

income, regular resources. Non-earmarked income, which includes funds from voluntary annual contributions of Governments, the net income from Private Sector Division, funds contributed by the public and certain "other (or miscellaneous) income".

income, other. Also referred to as "miscellaneous income" for regular resources. Miscellaneous income is defined in the United Nations system as income other than: (a) the value of assessed or voluntary contributions; and (b) such other income items as may be excluded under the Organization's Financial Regulations and Rules. In UNICEF, this includes income other than the value of the voluntary contributions and the net income of the Private Sector Division.

income, supplementary funds. Specific contributions for programmes approved by the UNICEF Executive Board, in addition to regular resources, which then become part of UNICEF programmes. They consist of funds contributed to UNICEF by Governments, non-governmental organizations and United Nations agencies for specific purposes.

income, emergency relief and rehabilitation. Consists of funds contributed to UNICEF by Governments, non-governmental organizations and United Nations agencies for emergency appeals.

inventory. The value of supplies and equipment for programmes owned by the organization, as well as Private Sector Division materials at the end of an accounting or financial period.

liability. A present obligation of the organization arising from past events, the settlement of which is expected to result in an outflow of resources from the organization.

liquidity policy. Owing to the nature of programme implementation and UNICEF cash flows, there may be, from time to time, short-term imbalances between regular resources cash disbursements and cash receipts. The UNICEF liquidity policy allows these temporary imbalances to be offset by up to one half of the balance of supplementary cash on hand.

liquidity requirement. In order to meet UNICEF liquidity requirements, regular resources convertible cash balances, at the end of each fiscal year, are required to equal 10 per cent of projected regular resources income for the next fiscal year.

local currency. The currency of the country or area in which the local financial records of an activity are kept and/or in which its local financial transactions take place.

non-expendable property. Items of property and equipment charged to the administrative budget with an individual unit cost of at least \$1,500.

obligation. Obligations are amounts of orders placed, contracts awarded, services received and other transactions that involve a charge against the resources of the current financial period. Obligations may be maintained either for that period or until liquidated or cancelled.

pledge. A written commitment by a prospective donor to make a voluntary contribution to UNICEF. A written commitment that is subject to the need to secure an appropriate national legislative approval is considered a pledge.

procurement services. UNICEF assists Governments, United Nations agencies and non-governmental organizations working in fields of benefit to children by undertaking, on request and on a reimbursable basis, the procurement of goods and services. A small handling charge is added by UNICEF to the cost of the supplies and services to cover the costs of extra administration and documentation (see trust funds).

rates of exchange. The UNICEF accounts are maintained in United States dollars. Transactions in other currencies are converted for recording into United States dollars, in principle, at the United Nations operational rates of exchange.

reserve for insurance. A reserve of \$200,000 was established by the Executive Board in November 1950 when UNICEF adopted a policy of self-insurance for programme supplies. UNICEF also has a reserve for third-party liability, which had a balance as at 31 December 2007 of \$26,399.

trust funds. Funds accepted by UNICEF mainly to cover the costs of procurement of supplies and services undertaken by UNICEF on behalf of others. They also

08-43952

include financing provided by sponsors to cover the costs of Junior Professional Officers as well as those relating to projects funded by the World Bank and the Global Alliance for Vaccines and Immunization. These funds are not considered to be UNICEF income.

schedule. Explanatory or supporting analyses accompanying financial statements.

specific contributions. Programme recommendations are often prepared in excess of the input available from regular resources. Those recommendations are approved by the Executive Board as suitable for funding by supplementary contributions and contributions for emergency relief and rehabilitation from donors. When a contribution for specific purposes is made for such a programme, the corresponding commitment enters into effect (usually between Executive Board sessions).

unencumbered balance. That portion of the approved budget that has not been expended at the end of the year. The unspent balance at the end of the biennium is cancelled and reported to the Executive Board.

write-off. An adjustment to the accounts in order to record the loss of or reduction in the value of an asset.
