## Letters of transmittal

27 March 2008

Pursuant to financial regulations 11.4 and 12.1, I have the honour to submit the consolidated financial statements of the United Nations Relief and Works Agency for Palestine Refugees in the Near East (including the Microfinance and Microenterprise Department) for the year ended 31 December 2007, which I hereby approve. The financial statements have been prepared and certified as correct by the Comptroller.

(Signed) Karen **Koning AbuZayd**  
Commissioner-General

The Chairman of the United Nations Board of Auditors  
United Nations  
New York

---

30 June 2008

I have the honour to transmit to you the report of the Board of Auditors on the financial statements of the United Nations Relief and Works Agency for Palestine Refugees in the Near East for the biennium ended 31 December 2007.

(Signed) Philippe **Séguin**  
First President of the Court of Accounts of France  
(Chairman, United Nations Board of Auditors)

The President of the General Assembly  
of the United Nations  
New York

## Chapter I

### **Financial report for the biennium ended 31 December 2007**

#### **A. Introduction**

1. The United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA) was established by the General Assembly in its resolution 302 (IV) of 8 December 1949 as a separate entity within the United Nations system and it began operations on 1 May 1950. The mandate of UNRWA has been renewed repeatedly, most recently in Assembly resolution 59/117 of 10 December 2004, when it was extended until 30 June 2008.

2. UNRWA reports directly to the General Assembly, to which the Commissioner-General submits an annual report. A general review of UNRWA programmes and activities is undertaken on an annual basis by the 10-member Advisory Commission, which includes representatives of the Agency's donors and host authorities. The Advisory Commission has a working relationship with the Palestine Liberation Organization.

#### **B. Strategic goals of the United Nations Relief and Works Agency for Palestine Refugees in the Near East**

3. The Agency's goal is to promote the human development of Palestine refugees and strengthen the self-reliance of the refugee community.

4. In the foreseeable future, UNRWA will continue to provide basic education, health, and relief and social services to more than 4 million registered Palestine refugees living in Jordan, Lebanon, the Syrian Arab Republic, the West Bank and the Gaza Strip.

5. The Agency intends to develop a comprehensive approach to camp development that will integrate housing and infrastructure interventions with health, education, microfinance and microenterprise, and community services within a human development framework.

6. The education programme will provide Palestine refugee children and youth with learning opportunities, knowledge, skills and experience that are consistent in quality, standards and norms with those offered by the host authorities within the overall framework of the principles of the United Nations.

7. The health programme will continue to focus on fostering quantitative and qualitative service standards consistent with the United Nations Millennium Development Goals and public sector standards, and on improving environmental conditions in camps, with a special focus on preventive primary health care.

8. The relief and social services programme will give high priority to providing assistance to meet the minimum needs of the most vulnerable refugees.

9. The Microfinance and Microenterprise Department will be funded primarily from revenues generated by the Department's credit operations, but also from donor contributions. The Department will focus on implementing outreach, product development and capacity-building through a range of business, consumer and housing loan products that will improve the enterprise, household and housing

conditions of Palestine refugees and other groups of proximate poor in four of the Agency's five areas of operation.

10. The Agency will continue to provide emergency assistance to Palestine refugees in situations of acute distress.

11. Capital improvements and associated recurrent costs in respect of Agency facilities and camp infrastructure, as well as other major developments, including the Palestine Refugee Records Project, will continue to be provided for under the project budget.

12. The Agency will continue to create and enhance capacity-building opportunities for staff by providing the necessary developmental, leadership and management capacities to deliver and manage a quality service that is both innovative and responsive.

13. The Agency will continue to promote gender equality and empower women through all of its programmes.

### **C. Strategic planning framework**

14. Working within the parameters of its mandate, UNRWA has developed its own strategic plan, widely known as the medium-term plan for the period 2005-2009. The medium-term plan articulates the Agency's desire to take advantage of technological advances across sectors, consolidate its achievements and better serve the long-term interests of Palestine refugees. This refocusing of direction is necessary to help prepare Palestine refugees to contribute to, and take advantage of, any positive changes that may be realized in the region over the next several years. The planning framework is aimed at ensuring that all Palestinians derive maximum benefit from the Agency's work — work which should include the continuation of human development trends that have been set in motion by the Agency since its early years.

### **D. Partnership with other agencies**

15. UNRWA enjoys close cooperation and long-standing partnerships with a number of United Nations organizations including the Joint United Nations Programme on HIV/AIDS, the United Nations Development Programme, the United Nations Educational, Scientific and Cultural Organization, the United Nations Population Fund, the United Nations Human Settlements Programme, the Office of the United Nations High Commissioner for Refugees, the World Food Programme, the United Nations Children's Fund and the World Health Organization. It participates actively in multilateral aid coordination structures for the occupied Palestine territory and collaborates with the League of Arab States. As UNRWA partnership strategies have proved highly successful, programme departments have maintained and strengthened existing partnership practices while at the same time actively seeking opportunities to build new partnerships. With a view to contributing to civil society, priority is given to exploring partnerships with established local non-governmental organizations. To minimize the duplication of services, particular efforts are being made to develop cooperative arrangements with alternative, complementary service providers, based on comparative advantage.

16. Developments in the areas of governance and stakeholder relations affect donor and host country support and thus have important implications for the achievement of UNRWA goals. As underlined at the conference on building partnerships in support of UNRWA, held in Geneva in June 2004, an important priority is to develop a tripartite (host/donor/UNRWA) approach as a tool for increasing donor responsiveness and creating synergies with other service providers. Productive synergies with other service providers will help demonstrate to donors that the Agency is capable of combining its strengths with those of other competent actors to maximize efficiency and optimize service outcomes for its beneficiaries.

17. The Agency recognizes that its governance processes do not as yet fulfil their potential as mechanisms for information-sharing, substantive policy guidance and mutual accountability of UNRWA and its stakeholders. The Agency is committed to working initially to identify a reform formula that allows for substantive discussion of concrete policy issues, while respecting the imperatives of the Agency's mandate. The implementation of the Agency's planned programme of work will benefit from a continuing multi-level dialogue with all partners and stakeholders.

## **E. External factors**

18. UNRWA planning is complicated by uncertainty surrounding the Middle East peace process. Should peace talks progress, the Agency may be asked to assume new temporary tasks, as required by a peace settlement. However, should conflict persist, military operations, security issues, deteriorating economic conditions for the refugees and restrictions on the flow of goods, services and individuals will continue to affect the Agency's work.

19. UNRWA operates in a turbulent region buffeted by the Arab-Israeli conflict and its consequences in terms of episodes of violence and a worsening socio-economic situation. Emergency situations, especially in the Gaza Strip and the West Bank, impose heavy operational and financial burdens on the Agency, threatening the sustainability and quality of UNRWA services and necessitating emergency appeals, which compete with fund-raising for the regular budget.

20. Uncertainty exists as to the economic impact of the planned Israeli disengagement from the Gaza Strip and some parts of the West Bank. Contingency planning for the disengagement includes the pre-positioning of food and other supplies for distribution, and preparation for medical emergencies that might arise during the disengagement process. UNRWA, in close cooperation with the Palestinian Authority, is preparing for major activities in the fields of education and infrastructure development, to be implemented upon completion of disengagement and once supplementary funding to that end is secured.

21. In the West Bank, the communities affected by the wall/fence have increasing needs, as access to basic services is more and more restricted. By adapting its services, UNRWA has been working to meet the growing needs of these communities. The wall/fence around Jerusalem is having a particular impact on UNRWA operations, as even access to duty stations for staff has become a serious problem. The conflict in the Gaza Strip and the West Bank has also disrupted the Agency's ability to deliver its services, has adversely affected the safety and security of UNRWA staff and has resulted in significant additional expenditure to counteract obstacles imposed by the Israeli authorities.

22. Staff living and working under conditions of extreme stress in the Gaza Strip and the West Bank frequently suffer from fatigue and burnout, making it increasingly difficult to produce quality results.

23. Obstacles to UNRWA operations include the imposition of closures and restrictions on humanitarian access in the West Bank and the Gaza Strip, where some 48 per cent of the Agency's regular budget is spent.

24. The UNRWA budget, funded almost entirely by voluntary contributions (in cash and in kind), is subject to uncertainties in the timing and value of funding receipts. This limits the ability of the Agency to plan and implement programmes and project activities. Although UNRWA expenditure is incurred mainly in United States dollars, 63 per cent of the income is received in non-United States dollar currencies, thus exposing the Agency to the risks of currency fluctuations.

25. Worsening socio-economic conditions and increased rates of unemployment in some of the Agency's areas of operation result in, inter alia, larger numbers of school dropouts and increased demands on medical care services, compromising community participation and causing a breakdown in cost-sharing systems.

## **F. Social accounting, risk management, performance evaluation, disaster recovery plan and internal control**

### **1. Social accounting**

26. Accounting plays an important role in defining the goals of the Agency and increasingly in mediating the relationships between the Agency, society and the environment within which it operates. Its social accounting responsibility is recognized within the Agency and stakeholder welfare reported upon; the stakeholders are the refugees it serves, the employees, the donor community and the host Governments of the areas of operations. Deliberate policies are implemented that are meant to demonstrate the importance of social and ethical responsibilities enshrined in the Agency's mission and objectives. This is achieved by recognizing the needs and taking care of the environment in which it operates and ensuring that it is culturally friendly and acceptable to the local community and the host Government. The Agency's social responsibility is further demonstrated by its recognition of the vast majority of its workforce as belonging to the Area Staff category and by providing for their needs to the largest extent possible during and after their employment with the Agency. Special reference should be made to the Agency's specific programmes that address various social responsibilities. Their objectives can be summarized as follows:

(a) To foster and promote awareness and understanding of human rights, conflict resolution and tolerance;

(b) To contribute to the process of establishing system-wide programmes addressing gender mainstreaming, child disabilities, psychosocial health and life-skills-based education within system-wide strategies;

(c) To improve the access of the refugee population to essential health services by implementing affordable and equitable hospitalization policies, adjusting the imbalance in financial allocations among field locations and achieving cost efficiency gains through the rationalization of referral practices;

- (d) To improve environmental health conditions in refugee camps;
- (e) To improve the general social well-being of the refugee population by providing, in addition to the above, various welfare services, such as psychological counselling and sports activities.

## 2. Risk management

27. The Agency has a broad spectrum of risks associated with its existence and operations. These risks fall mainly in the broad categories of operational, environmental and financial risks. The management of risks is aimed at reducing the Agency's exposure to various forms of loss and, more critically, its failure to deliver services to the Palestine refugees in the areas of education, health, and relief and social services.

28. *Operational risk* refers mainly to the exposure to the risk of failing to deliver the services for which, according to its mandate, the Agency exists. This risk is managed through proper planning, control and performance reviews and evaluations in the Agency's main areas of operation (education, health, and relief and social services).

29. *Environmental risk* is the inherent risk associated with the volatile nature of the environment within which the Agency operates. This risk is managed through recognition of the potential danger and political and security concerns posed by the conflicts in the greater Middle East, particularly in the areas where the Agency operates: Jordan, the Syrian Arab Republic, Lebanon, the West Bank and the Gaza Strip. The security alerts are set at the appropriate levels and all risk-mitigating elements installed and monitored on an ongoing basis.

30. *Financial risk*. The Agency is prone to exposure to various forms of financial risk, the biggest of which is the risk of failure to have enough financial resources to achieve the planned objectives and activities. The source of funding for operations to meet the objectives of the Agency and the needs of the refugees is predominantly the donor community. The uncertainty surrounding the timing and actual amounts of voluntary contributions also poses some financial risk when it comes to planning. This risk is managed in the best way possible by considering the available information and providing for inflows in the most prudent manner. Financial risk can be extended to include foreign currency risk, since a good portion of contributions are in currencies other than the Agency's reporting currency, the United States dollar.

## 3. Performance evaluation

31. The process of performance evaluation starts with the strategic planning framework. This framework addresses four main objectives:

- (a) To achieve parity of UNRWA services with host authority and international standards;
- (b) To address unmet needs and the needs of the most vulnerable refugees;
- (c) To maximize the economic potential of the refugees;
- (d) To build capacity within UNRWA.

These objectives represent the principal tracks along which the Agency directs its efforts to improve living conditions for the Palestine refugees and to promote their self-reliance and human development. Performance criteria are necessary to monitor the management of the Agency's health, education, and relief and social services facilities. Indicators of achievement are benchmarked to international standards and host authority services, and by reference to beneficiaries' satisfaction levels and perceptions concerning the quality of UNRWA services.

#### **4. Disaster recovery plan**

32. The disaster recovery plan is meant to describe how the Agency is to deal with potential disaster, which is an unforeseen event that makes the continuation of normal functions impossible. The recovery plan is required to include a set of precautions so that the effects of a disaster will be minimized and the Agency will be able to either maintain or quickly resume mission-critical functions. The Agency's disaster recovery plan is at the finalization stage, as all the preliminary planning and logistics have been put in place and addressed.

#### **5. Internal control**

33. The Agency has a system of internal controls that are meant to safeguard assets, ensure adherence to management policies and procedures and prevent fraud. This is achieved through the Audit and Inspections Committee, which reviews and approves audit plans of the Internal Audit Department which are formulated after risk analysis in various operational areas. In addition, there is a developed fraud prevention plan in place which enhances fraud awareness and prevention. To enhance transparency and control, and to ensure that no single individual has the final say in decisions, most high-level managerial responsibilities and decisions are administered by committees. These are the Human Resources Committee, the Headquarters Contract Committee, which deals with procurement and the awarding of contracts, and the Property Survey Board, which deals with decisions on the disposal of asset. The Agency has established detailed instructions and procedures to ensure effective financial administration and the exercise of economy.

34. The Agency maintains a system of internal controls which provide for an effective examination or review of financial transactions in order to ensure the regularity of receipt, custody and disposal of the resources of the Agency, ensure the conformity of expenditure with the provisions of the financial regulations and detect any uneconomic use of the Agency's resources. There are also organizational directives to guide the day-to-day running of the Agency and ensure adherence to internal controls.

### **G. Financial results for the biennium**

35. The Agency's total excess of income over expenditure, before adjustments, for the biennium is broken down as follows:

- (a) Regular budget mainstream cash amounted to \$2.37 million;
- (b) The in-kind portion amounted to a deficit of \$1.41 million;
- (c) Non-regular budget funds amounted to a deficit of \$30.77 million;

(d) The Microfinance and Microenterprise Department results amounted to a deficit of \$1.36 million.

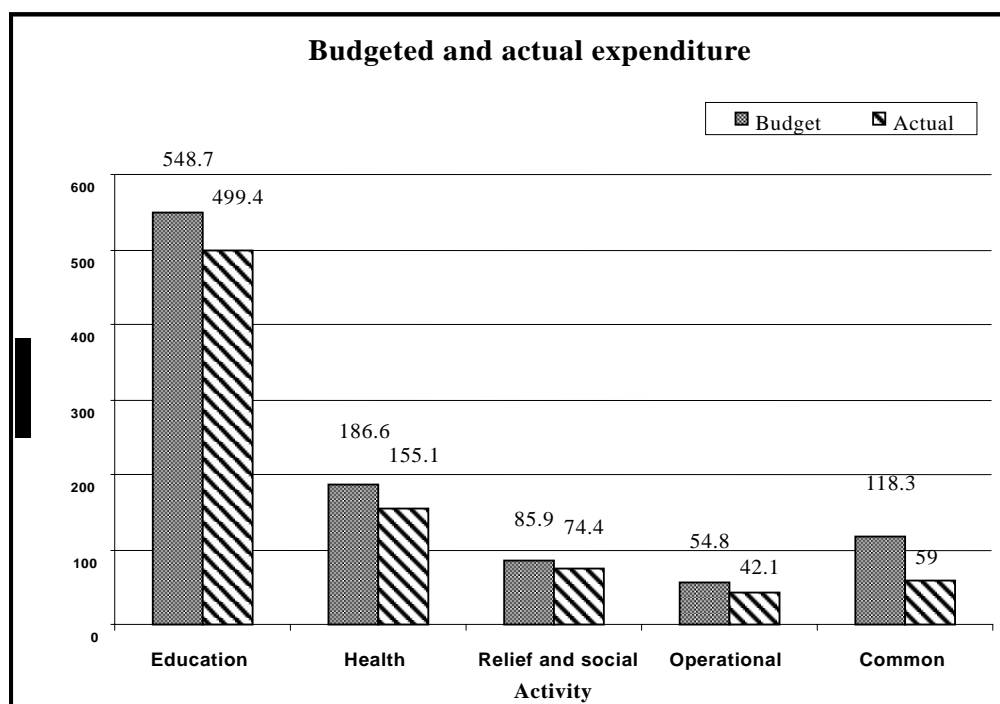

36. The above amounts are shown in statement 1, which also shows the balances of the Agency's working capital and other funds. The balances for the other funds are earmarked for specific purposes. The working capital under the Agency's regular budget fund is not a statutory operating reserve but is the difference between assets and liabilities of the fund. The working capital account is used for three specific purposes: (a) to meet temporary shortfalls in cash flow; (b) to finance unforeseen needs; and (c) in the event of a curtailment of the Agency's activities, to meet any extraordinary liquidating liabilities.

37. Included in the working capital balance is \$22.97 million of accrued contribution income.

38. For efficient cash flow management, the Agency centrally manages all cash received for both the regular and non-regular budget funds. Statement 3 depicts the changes in the Agency's financial position and reflects the consolidated cash balance of \$212.05 million at the end of the biennium.

39. Statement 4 shows the Agency-wide budgeted and actual expenditures for the biennium. The Agency expended \$1,308.2 million during the biennium, against a budget of \$1,819.6 million, on all its activities. From the regular budget, the expenditure was \$829.2 million, against a budget of \$994 million. From the non-regular budget, the expenditure was \$470.2 million, against a budget of \$815.2 million.

40. A graphical comparison of the regular budget actual and budgeted expenditure is shown below.

### Sources of funding

41. UNRWA does not have a system of assessed contributions, as its budget is funded almost entirely by voluntary contributions in cash and in kind from Governments, intergovernmental organizations and non-governmental bodies. The distribution of sources of funding by donor category and budget fund is shown below:

## H. Agency-wide structure of accounts

42. The Agency operates a system of fund accounting by which it maintains separate accounts for the regular budget and non-regular budget funds. The Agency's system of fund accounting provides a full identification of income and expenditure by purpose and the complete separation of the assets and liabilities of each fund. Contributions and corresponding allocations (including those for the regular budget) are assigned individual project codes, which are maintained as distinct financial and accounting entities.

43. The structure of the UNRWA financial statements reflects both the recurrent and non-recurrent nature of activities and the means by which they are funded. The statements also indicate how the Agency funded the expenditure from the different income sources. The statements are broadly divided into two parts:

(a) The regular budget funds comprise recurrent staff and non-staff costs, further divided into cash and in-kind portions. The cash budget is funded through cash contributions recorded as income to the General Fund. The in-kind budget represents the value of in-kind donations that the Agency expects to receive on the basis of agreements with donors or past practice (for example, food aid).

(b) The project budget funds comprise mainly non-recurrent costs funded by earmarked project contributions. Activities are implemented only if they are specifically funded by donors. Most of the Agency's capital costs are included here because of insufficient donor funding to meet all the requirements of the General Fund.

44. The regular budget and the project budget funds together comprise the total volume for the financial year. The text below clarifies which programme activities fall under the General Fund and which fall under the project fund component.

## **I. UNRWA activities**

45. UNRWA provides education, health, and relief and social services to some 4.3 million Palestine refugees in Jordan, Lebanon, the Syrian Arab Republic, the West Bank and the Gaza Strip. The headquarters of the Agency are located in Gaza and Amman. Throughout its 56 years of humanitarian and human development service in the area, the Agency has demonstrated a capacity to adapt and enhance its programmes as required to cope with developments in the region and stands ready to continue doing so in accordance with the mandate it receives from the General Assembly.

46. A number of challenges for the work of UNRWA have arisen since the outbreak of strife in the occupied Palestinian territory in September 2000. The continuing strife, severely deteriorating economic conditions for the refugees and the restrictions on the flow of goods, services and labour have greatly increased demands on UNRWA humanitarian operations in the Gaza Strip and the West Bank.

## **J. Education programme**

47. The goal of the education programme is to provide Palestine refugee children and youth with learning opportunities to acquire knowledge, life skills, experience and values in partnership with host authorities, local communities and other United Nations agencies within the context of a multicultural society, with special regard to gender equity, human rights, tolerance, conflict resolution and the Convention on the Rights of the Child. The objectives of the Education department are as follows:

(a) To provide and improve access to quality education and learning opportunities, in line with host authorities' education systems, for Palestine refugee children and youth, at the basic level. The Agency also provides secondary-level education in the Lebanon field location;

(b) To provide, improve and optimize vocational and technical education for young Palestine refugees to enhance their opportunities for employment and economic independence;

(c) To provide, improve and optimize pre-service teacher education to increase the pool of qualified teachers for prospective recruitment as UNRWA teaching staff;

(d) To enhance capacity-building for technical and administrative education staff at all levels, in line with the School as a Focus for Development, management development and quality assurance framework approach;

(e) To ensure equity and equality of access to quality learning for children with special educational needs;

(f) To foster and promote among teaching staff and students awareness and understanding of human rights, conflict resolution and tolerance;

(g) To contribute to the process of establishing system-wide programmes addressing gender mainstreaming, child disabilities, psychosocial health and life-skills-based education within system-wide strategies.

## K. Results of the education programme

48. During the biennium, 485,471 children were enrolled for the school year 2005/06 in the Agency's 663 elementary, preparatory and secondary schools (the latter in Lebanon only), which were staffed by 16,161 teachers. In addition, 299,973 refugee pupils attended other, Government and private, elementary, preparatory and secondary schools at no cost to UNRWA. During the year, vocational, technical and teacher education was provided at the Agency's eight training centres and three education science faculties for 6,631 students enrolled for the 2005/06 training year.

49. A total of 581 instructors taught in those training centres during the year. In-service teacher-training courses were provided by the Institute of Education at UNRWA headquarters in Amman, through the five education development centres in the UNRWA areas of operation, for 995 education staff in the 2005/06 school year. Through the UNRWA scholarship programme, which was funded entirely from earmarked donor contributions, 322 students were awarded university scholarships for the academic year 2004/05.

50. Expenditure on the education programme for the biennium 2006-2007 totalled \$499.4 million, against the General Assembly-approved budget of \$548.7 million. The education programme accounted for 60.2 per cent of the Agency's regular budget expenditure.

51. The distribution of education-services expenditure by activity and field is shown below:

## L. Health programme

52. The goal of the health programme is to protect, preserve and promote the health of the registered Palestine refugees within the Agency's five areas of operation and to meet their basic health needs from within the available means, consistent with the humanitarian policies of the United Nations and the basic concepts, principles and strategic approaches of the World Health Organization. The objectives of the health programme are as follows:

(a) To preserve the sustainable investment achieved in women's and children's health and attain further progress in the reduction of infant, child and maternal mortality through an integrated primary health-care approach consistent with the health-related Millennium Development Goals, as well as with the standards set out in the Convention on the Rights of the Child;

(b) To address the burden of death and disability caused by the emerging epidemic of non-communicable diseases, particularly diabetes mellitus and cardiovascular diseases, while simultaneously combating major infections continuing from the twentieth century, such as tuberculosis;

(c) To improve the access of the disadvantaged and under-served refugee population to health care through the rehabilitation, upgrading and expansion of primary health-care facilities, based on careful mapping of the services of other health-care providers.

(d) To address the increased burden of mental and psychological problems among the refugee population through the development of multidisciplinary community-based programmes focusing on prevention and targeting at-risk groups;

(e) To improve the access of the refugee population to essential hospital services by implementing affordable and equitable hospitalization policies, adjusting the imbalance in financial allocations among fields and achieving cost-efficiency gains through the rationalization of referral practices;

(f) To improve environmental health conditions in refugee camps by implementing developmental projects to upgrade the camp infrastructure of water, sewerage, drainage and solid-waste management systems and by integrating these systems within the municipal/regional schemes of the host authorities;

(g) To enhance the planning and evaluation capacity of the health-care system by improving methods of data collection and analysis and by upgrading the skills and capabilities of health personnel in the use of evidence-based information, including the use of information technology, for improved management and response;

(h) To contribute to the process of establishing system-wide programmes addressing gender mainstreaming, child disabilities, psychosocial health and life-skills-based education within system-wide strategies;

(i) To prevent breakdowns in service delivery and quality in crisis situations by responding to emerging health challenges while ensuring the sustainability of long-term intervention strategies.

## **M. Results of the health programme**

53. In the five areas of operation, the Agency offers Palestine refugees comprehensive primary health-care services comprising disease prevention and control and maternal and child health care, including family-planning services. These services are provided through 128 primary health-care facilities. During 2007, a total of 9,491,622 visits were made to these clinics by refugee patients for medical consultations and 737,601 for dental consultations.

54. Hospitalization assistance is provided either at contracted hospitals or through partial reimbursement of costs. UNRWA also runs a small hospital in Qalqilia in the West Bank. Under hospitalization assistance, a total of 74,081 patients were admitted to the UNRWA hospital and to contracted hospitals in 2007. Environmental health services are also part of the health programme, as is the supplementary feeding programme for pregnant women and nursing mothers.

55. Total expenditure on the health programme for the biennium 2006-2007 amounted to \$155.1 million, against the General Assembly-approved budget of \$186.6 million. The health programme accounted for about 18.6 per cent of the Agency's regular budget expenditure.

56. The distribution of health services expenditure by activity and location is shown below.

## N. Relief and social services programme

57. The goal of the relief and social services programme is to provide the most disadvantaged Palestine refugees with humanitarian assistance and to promote the self-reliance of less advantaged members of the refugee community, especially women, the aged, children, youth and persons with disabilities. The objectives of the relief and social services programme are as follows:

(a) To alleviate poverty among the most vulnerable within the Palestine refugee community by linking short-term relief to longer-term development needs, through a needs-based approach which addresses actual needs while emphasizing equality of opportunity and the right to basic human development;

(b) To ease the immediate plight of the poorest eligible refugee families through basic subsistence support, with a gradual closing of the gap in the safety-net provisions of the host authorities and UNRWA;

(c) To promote and facilitate community-based action by community-based organizations which create social, cultural, economic or educational opportunities and provide services for women, the aged, children, youth and persons with disabilities, and their families;

(d) To promote the institutional capacity of community-based organizations through training and technical assistance to enhance refugee participation in the formulation and implementation of social services for vulnerable groups in their communities;

(e) To improve the efficiency and effectiveness of service delivery to special hardship case families through a reduction in social worker caseloads, systematic in-service training and the improvement of overall working conditions;

(f) To improve the quality of the microcredit community support programme and enhance opportunities for economic inclusion through skills training and increased access to diversified loan products;

(g) To provide shelter to families who have lost their homes or who live in sub-standard housing as a result of chronic poverty, as assessed by each field office;

(h) To assist families with small-scale emergency needs during a family-specific economic or humanitarian crisis through selective cash assistance based on actual needs;

(i) To computerize the records of 4.8 million registered refugees using new web-based information technology and create an integrated database of refugee data from all the Agency's programmes.

## **O. Results of the relief and social services programme**

58. At the end of December 2007, 65,895 families comprising 255,907 refugees (with an average family size of 3.8 persons) were enrolled in the special hardship case programme, which concerned roughly 5.7 per cent of the total registered refugee population during the biennium. The food aid subprogramme, the quarterly safety-net support package of food/cash subsidies for special hardship case families, was covered by donations in cash and in kind from various donors, with benefits distributed according to set criteria and procedures. Selective cash assistance for those in extreme distress was continued during 2007, with a total of \$341,573 being distributed during the reporting period to 1,642 special hardship case and non-special hardship case families in all field locations. Seven hundred and ninety-six members of special hardship case families were enrolled in the vocational training centres and education science faculty training administered by the Agency's Department of Education, in an effort to obtain marketable skills and break family cycles of poverty.

59. During the reporting period, shelter rehabilitation was completely financed through extra-budgetary funds, enabling the rehabilitation of a total of 1,163 shelters, using both the contractual and the self-help approach. This represented 13 per cent of the estimated need (9,000 shelters) identified by the various field offices.

60. A total of 279 social workers provided counselling and support to help families cope with difficulties related to their socio-economic situation. To enhance their role in providing quality services in an efficient and effective manner, a reduction in the social workers' caseload norm from 250 to 200 special hardship cases was approved at the end of 2005. As a result, additional social workers were hired in the Lebanon and West Bank field locations and part of the Gaza field during 2006. Efforts are

now being directed towards hiring additional social workers in both the Jordan and Syrian Arab Republic fields to ensure full implementation of the norms Agency-wide. An innovative two-year certified education programme, developed in 2004 in collaboration with the Southern Illinois University School of Social Work (Carbondale, United States of America) with the objective of enhancing the technical capabilities of relief and social services programme staff and of advancing a generalist approach to social-work practice incorporating multi-intervention strategies and systems, enabled 188 social workers and their immediate supervisors to successfully complete eight courses of the certified education programme in the Jordan, Syrian Arab Republic and West Bank field locations and partly in the Lebanon field location by winter 2006/07. The remaining groups in Gaza and Lebanon will complete training when the security situation there allows.

61. In the process of developing and implementing a poverty-based approach for the special hardship case food aid programme to replace the current status-based approach by the senior poverty adviser, an in-depth socio-economic survey of special hardship case families was conducted in all five field locations and the results were analysed. The poverty lines (absolute and abject) in all field locations were reviewed and defined, income thresholds and eligibility criteria for special hardship case families were revised accordingly and new payment schemes were proposed based on the utilization of a newly developed proxy means test formula. A pilot project was finalized in 2007 in the Jordan field location which will better target the poorest of the poor among the special hardship case families.

62. The Agency's eligibility and registration staff continued the monthly updating of information contained in the field registration system database on 4.5 million refugees and continued to maintain the field social study system database, which tracks the socio-economic data of the special hardship case families. Scanning of family file documents and historical registration records was begun in the five field locations (Jordan, Lebanon, the Syrian Arab Republic, the West Bank and Gaza) and approximately 7,353,865 million documents were digitally scanned and preserved during the reporting period in all the field locations. The evaluation of tenders for the development of software for the refugee registration information system and implementation of the document management system to preserve the estimated more than 16 million scanned documents has been completed and a contract for the development of the refugee registration information system to replace the current field registration, field social study and URS systems was awarded to Estarta, Jordan, a local and international software development company. This contract was signed in April 2006. Working with the UNRWA team, the company attained several milestones in the development of the software, notably the prototype which was signed off in December 2006 with the approved functionality for registration and special hardship cases. The next stages will be the acquisition of hardware, the building of infrastructure and the development of pilot subsystems.

63. Through a network of 105 UNRWA-affiliated community-based organizations, the social services programme continued to provide Palestine refugees with access to opportunities to address their priority socio-economic needs through various activities, including awareness-raising, skills training and the provision of credit. During the reporting period, a total of 62,952 women, children and youth, and 30,802 persons with disabilities benefited from these activities. In addition, those community-based organizations, administered by refugee volunteers, successfully

managed 125 income-generating projects, which yielded 377 job opportunities and enhanced the financial sustainability of the community-based organizations.

64. The microcredit community support programme built on existing relief and social services programmes by targeting women and members of special hardship case families and by enhancing the capacity of community-based organizations to provide credit opportunities. During the reporting period, 924 jobs were created under the programme through various credit schemes, which contributed to improving the living standards of refugees and their families. A total of 3,256 women and their families benefited from indirect lending schemes administered through community-based organizations.

65. Total expenditure on the relief and social services programme during the biennium ended 31 December 2007 amounted to \$74.4 million, against the General Assembly-approved budget of \$85.9 million. Relief and social services expenditure represented 9 per cent of the Agency's regular budget expenditure.

66. The figure below reflects the distribution of relief and social services expenditure by activity and field.

## P. Administrative Support Department

67. The goal of the Administrative Support Department is to support the Agency's programmes and mandate through the provision of timely, effective and integrated support services in the areas of information and communication technology (ICT), procurement and logistics, security and general administrative services.

68. The Administrative Support Department's end of biennium results are as follows.

*Procurement and Logistics Division*

69. In the Procurement and Logistics Division:

(a) A revision of the catalogue items was conducted and the inventory items were reduced;

(b) Professional training courses were delivered according to the training plan. For their own development and in the interest of the implementation of professional, effective and up-to-date procurement practices, 26 Procurement and Logistics Division staff are currently studying at the Chartered Institute of Purchasing and Supply;

(c) The implementation of the new procurement inventory management system is in its final stages, with Agency-wide user training under way and implementation scheduled for June 2008;

(d) Buyers' code of conduct and ethics policies are being implemented, resulting in improved control and greater transparency.

*Information System Division*

70. ICT reform initiatives were launched in the course of the biennium to strengthen ICT capacity in accordance with the organizational development plan. An ICT review conducted early in 2007 resulted in a number of recommendations for improvements in ICT management and technical functions. Some recommendations have already been implemented, some are under implementation and the remaining recommendations are to be addressed in the next biennium. Consequently, the Information System Division was able to enhance its service delivery by:

(a) Deploying new information management systems utilizing web and Internet technologies in the areas of recruitment management and travel management;

(b) Developing new information management systems planned for deployment early in 2008 in the areas of refugee registration management and procurement and inventory management, as well as an Intranet system;

(c) Launching and managing a gap study for the assessment of the Agency's need for a new enterprise resource planning system, to be completed in February 2008;

(d) Developing technological strategic direction and tactical plans for enhancing the Agency's ICT infrastructure wide-area network connectivity and outsourcing information system hosting services, planned for deployment early in 2008;

(e) Expanding ICT support to cover all Agency schools;

(f) Upgrading a number of infrastructure system hardware and software components, thus maximizing the reliability and availability of ICT services.

*Update on disaster recovery plans as reported on in the mid-biennium financial report issued in August 2007*

71. Plans for a disaster recovery ICT data centre at the Cairo office were put on hold as a result of the ICT review in 2007 and the subsequent development of the strategic direction with regard to plans to outsource the hosting services of information systems to an alternative location. Further development of the disaster recovery plan is to continue in 2008.

*General services*

72. The General Services Section has been part of the Administrative Support Department since January 2007, following the relocation of the Section's functions from Gaza to Amman. The main areas of focus for the reporting period have been the development and implementation of a travel management system at all headquarters and field offices.

*Security*

73. Similarly, the Security Section has been part of the Administrative Support Department since September 2007. The Section's principal work to date has been to commence the development and drafting of a security policy framework proposal, with the planned development of subsequent security assessments to follow early in 2008.

74. Total expenditure on the operational and technical services programme during the biennium 2006-2007 amounted to \$42.1 million, against the General Assembly-approved budget of \$54.8 million. Operational and technical services expenditure represented 5.1 per cent of the Agency's regular budget expenditure.

## **Q. Common services**

75. The goal of the common services is to maintain the functioning of the Agency through sound legal support, cost-effective and efficient management, policy analysis, effective fund-raising and outreach to external interlocutors. The objectives of the common services are as follows:

- (a) To provide policy advice to the Commissioner-General and ensure the smooth implementation of policy decisions and the general cohesion of Agency operations;
- (b) To provide legal advice and support concerning matters of international law, particularly issues involving the privileges and immunities of the Agency and its staff;
- (c) To ensure Agency-wide accountability and transparency;
- (d) To maintain positive and productive relationships with donors and to enhance project management throughout the project cycle;
- (e) To increase awareness and support of the Agency among citizens, Governments and non-governmental organizations of donor and host nations, as well as the refugee population and Agency staff;

- (f) To provide programme and policy analysis that allows the Agency to respond to changing operational, political and social circumstances;
- (g) To liaise and strengthen cooperation with other United Nations agencies and participate in intergovernmental forums;
- (h) To maintain and improve the human resources services provided to international and area staff members;
- (i) To manage the Agency's financial resources effectively.

## R. Results of the common services

76. As part of management reform efforts aimed at improving the Agency's overall efficiency, recently implemented payroll and financial management systems were further enhanced during the year to meet the operational needs of the Agency.

77. Expenditure during the biennium for common services amounted to \$58.2 million, against the General Assembly-approved budget of \$118.2 million, representing 7 per cent of the Agency's regular budget expenditure.

78. The figure below shows the distribution of operational, technical and common services expenditure by activity and field location.

79. In addition to the ongoing services described above, during the biennium 2004-2005, UNRWA implemented the following special programmes to improve the living conditions of Palestine refugees, with earmarked funding from donors.

## S. Emergency appeals

80. Following the outbreak of strife in the occupied Palestinian territory in September 2000, UNRWA launched a series of emergency appeals for donor support

for the provision of emergency assistance to more than 1.3 million refugees to alleviate the humanitarian distress created as a result of the crisis in the Gaza Strip and the West Bank. The successive emergency appeals were aimed at providing employment opportunities, at providing cash and in-kind assistance for the poorest refugee families, and at the reconstruction and repair of infrastructure and refugee shelters damaged as a result of military action. During the biennium ended 31 December 2007, the Agency continued its programme of emergency assistance, focusing on food aid, emergency employment creation, shelter repair and rebuilding, cash assistance, health and education.

81. The total value of the emergency appeals for the biennium 2006-2007 amounted to \$293.1 million (\$173.1 million for 2006 and \$120 million for 2007). The total value of emergency appeals since their inception in 2000 stands at \$1,391.1 million.

## **T. Post-1999 projects**

82. The projects budget comprises mainly non-recurrent infrastructure costs that are to be funded by non-core budget contributions, including those relating to the expansion, replacement and maintenance of UNRWA facilities in order to meet the increasing demand for Agency services (particularly in the field of education), and the improvement of housing and environmental health conditions in refugee camps. By treating projects as integral to the biennium budget, the Agency provides a comprehensive estimate of its financial requirements to carry out its mandate over the biennium and directly links project-funded activities with those programme activities funded under the regular budget. Total pledges of \$145.9 million were made towards projects during the biennium 2006-2007 of which \$111.4 million was received. Additionally, \$10.4 million was received during the year against prior pledges. The total expenditure during the biennium 2006-2007 under this category was \$118.7 million.

## **U. Other projects**

83. The phasing-out of the project categories of peace implementation programme, Lebanon appeal, and capital and special projects continued during the biennium 2006-2007, resulting in minimal activities under those projects.

## **V. Microfinance and Microenterprise Department**

84. The goal of the Microfinance and Microenterprise Department is to promote economic development and alleviate poverty. This is achieved through the provision of credit for enterprise, household consumption and housing needs that will improve the quality of life of householders, small business owners and microentrepreneurs, sustain jobs, decrease unemployment, reduce poverty, empower women and provide income-generating opportunities for Palestine refugees and other proximate poor and marginal groups. The objectives of the Microfinance and Microenterprise Department are as follows:

(a) To provide enterprise, consumer and housing credit on a scale that is large enough to have a significant and measurable impact on the lives of the poorest;

(b) To provide operationally self-sufficient and sustainable credit in a cost-effective manner by targeting financial services in poorer urban areas with a high concentration of commercial, service and industrial businesses. Areas will be selected predominantly on the basis of having a highly localized density of Palestine refugees;

(c) To develop and expand the programme by adhering to international standards of outreach and efficiency so that the programme can be benchmarked and assessed against other practitioner institutions. The programme strives to achieve the best practices of the emerging microfinance industry through its participation in local and regional microfinance networks and by adopting the standards and practices established for the industry by such institutions as the Consultative Group to Assist the Poorest, the United States Agency for International Development, the Microfinance Network, Sanabel, the Calmeadow Foundation and Acción International;

(d) To meet the emerging standards for business training and business development services, where all the direct costs of training are met from participation fees and only the overhead and administrative costs are subsidized from donor contributions.

## **W. Results of the Microfinance and Microenterprise Department**

85. During the biennium 2006-2007, the Department maintained a portfolio of 12,668 active loans with an outstanding portfolio of \$10.56 million, which were administered through its network of 15 branch offices. During this period, the Department extended its branch office network and opened an additional five branch offices in Bethlehem, Damascus and Amman.

86. During the biennium, the Department financed 32,358 loans worth \$35.63 million, 34 per cent of them in the West Bank, 26 per cent in Gaza, 22 per cent in the Syrian Arab Republic and 18 per cent in Jordan. In financing terms, \$14.15 million was invested in the West Bank, \$9.58 million in Gaza, \$7.17 million in Jordan and \$4.72 million in the Syrian Arab Republic.

87. A total of 25,588 microenterprise loans worth \$28.34 million were financed through the Department's microenterprise credit product, some 3,419 loans to women microentrepreneurs valued at \$1.83 million were financed through the solidarity group lending product and 2,858 loans for consumption worth \$2.39 million were retailed to low-income and working class families through the consumer lending product. In addition, 450 housing loans in Gaza worth \$2.69 million were financed through the housing loan product and 43 loans valued at \$374,600 to formal small and microenterprise businesses were financed through the small-scale enterprise product.

88. The Department's small and microenterprise training programme in Gaza provided 115 short-term enterprise- and business-related training courses to almost 2,500 participants.

**X. Area Staff Provident Fund**

89. The financial statements of the Area Staff Provident Fund indicate that the investments of the Fund increased to \$1,077.32 million from \$1,011.97 million during the year 2006.

90. The Fund's investment income for the year was \$83.68 million, compared with \$95.85 million for the previous year.

91. The income available to the credit of Fund participants as at 31 December 2007 amounted to \$81.09 million, compared with \$94.10 million for the previous year.

## Chapter II

### Report of the Board of Auditors

#### *Summary*

The Board of Auditors has audited the financial statements of the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA) for the biennium ended 31 December 2007. The audit was carried out through field visits to the West Bank and the Gaza Strip, as well as a review of the financial transactions and operations at headquarters in Amman. The Board has also separately audited the financial statements of the United Nations Relief and Works Agency Area Staff Provident Fund for the year ended 31 December 2007 and a report on this has been separately issued to the Commissioner-General.

The Board issued an unqualified opinion on the financial statements of UNRWA for the period under review, as reflected in chapter III of the present report.

#### **Coordination with internal audit**

The Board coordinated with the UNRWA Department of Internal Oversight Services in the planning of the audit in order to avoid duplication of effort. In addition, the Board reviewed the internal audit coverage of the operations of UNRWA to assess the extent to which reliance could be placed on the work of the Department.

#### **Follow-up of previous recommendations**

In response to requests of the Advisory Committee on Administrative and Budgetary Questions and in line with paragraph 7 of General Assembly resolution 59/264 A, the Board evaluated the ageing of its previous recommendations that had not yet been fully implemented and has indicated the financial periods in which such recommendations were first made.

Approximately half of the Board's recommendations have been implemented, while 41 per cent are under implementation. Two recommendations have not been implemented and one recommendation has been overtaken by events. The recommendations that are under implementation are mainly long-term in nature and would therefore take a longer time to achieve. During the biennium 2006-2007, UNRWA launched its organizational development process, which includes systematic reforms in some areas covered by the Board's recommendations. The objective of UNRWA in taking this initiative is to deal with audit recommendations as part of Agency-wide reform.

#### **Overall financial overview**

For the period under review, total income was \$1.28 billion, compared with \$1.02 billion for the previous biennium, an increase of 24 per cent. Total expenditure amounted to \$1.31 billion, compared with \$0.99 billion for the previous biennium, an increase of 32 per cent. This resulted in a net deficit for the biennium (after adjustments of \$21.2 million) of \$52.4 million, compared with an excess of \$57.2 million (after adjustments of \$19.9 million) in the preceding biennium.

## **Statement of income and expenditure**

### *Income*

Contributions from all sources (Governments, intergovernmental organizations, United Nations agencies and non-governmental organizations) recorded increases in the biennium 2006-2007. Furthermore, exchange gains (based on the United Nations operational rate of exchange methodology) of \$11.9 million reflected a large improvement compared with exchange losses of \$18.6 million in the previous biennium.

## **Statement of assets, liabilities, and reserve and fund balances**

### *Accounts receivable*

Included in the accounts receivable balance of \$44 million was an amount of \$0.5 million which related to receivables due to UNRWA from the Palestinian National Authority. These receivables were originally raised during the period from 1990 to 1994 and, because of their age, recovery is now considered doubtful, but no provision for doubtful debt was raised.

### **Land and buildings**

UNRWA changed its accounting policy with regard to the treatment of expenditure incurred for the acquisition of land and buildings. Land and buildings were previously expensed (i.e. not recorded on the balance sheet). The change in accounting policy resulted in land and buildings being capitalized and recorded on the face of the assets and liabilities statement. As disclosed in the financial statements, this change in accounting policy was only applied to land and buildings acquired after 2002.

### **Reserves and fund balances**

The working capital reserve for the period under review amounted to \$40 million (2004-2005: \$38 million), while the fund balance reserve amounted to \$74 million (2004-2005: \$129 million). During the period under review, UNRWA changed its accounting policy to capitalize its land and buildings. As a result of this change, a revaluation capital surplus reserve amounting to \$60 million was created and as a result of the retrospective adjustment due to this change in accounting policy a comparative amount of \$45 million is disclosed. The capital reserve for project-financed buildings for the period under review amounted to \$26 million (2004-2005: \$22 million).

Also included in the financial statements are accumulated losses relating to the microfinance and microenterprise programme amounting to \$2.5 million (2004-2005: \$3.6 million) and a capital reserve of \$21.3 million (2004-2005: \$19 million).

### **Microfinance and microenterprise programme**

The Microfinance and Microenterprise Department is a small programme within UNRWA which provides credit facilities to microentrepreneurs. The Department's activities and balances for 2006 and 2007 have been included in the Agency's financial statements for the biennium. In addition, this entity prepares its own separate set of annual financial statements, on which the Board performs a

separate audit. The Board audited the 2006 annual financial statements and issued an unqualified audit opinion. The Board has still to perform the audit for 2007 on the Department's separate financial statements.

In the 2006 audit of the Microfinance and Microenterprise Department, the following issues were identified:

- (a) The Microfinance and Microenterprise Department had a write-off policy which was inconsistent with the level of credit risk;
- (b) The Microfinance and Microenterprise Department's financial operations manual needed revision to ensure it was in compliance with international financial reporting standards;
- (c) The Microfinance and Microenterprise Department had not conducted an analysis and forecast pertaining to its operating losses.

#### **End-of-service liabilities, including after-service health insurance**

UNRWA did not disclose or provide for after-service health insurance liabilities for its international staff. According to UNRWA and the United Nations, those liabilities are supposed to be borne by the United Nations Secretariat and disclosed in the main financial statements of the United Nations (Vol. I), but they were not disclosed there, so no liability was recorded for after-service health insurance. UNRWA, however, accrued a total of \$22.8 million relating to end-of-service liabilities for area staff leave encashment, as at 31 December 2007. Furthermore, UNRWA disclosed in the notes to the financial statements \$1.8 million for repatriation grants and \$1.4 million for leave pay encashment for international staff. UNRWA also disclosed in the notes to the financial statements termination liabilities amounting to \$206.3 million (2004-2005: \$168.07 million), which is an estimate of total separation costs relating to all area staff.

#### **Progress towards the implementation of International Public Sector Accounting Standards**

The UNRWA plan for the implementation of the International Public Sector Accounting Standards (IPSAS) had not been approved. Furthermore, the plan did not include the detailed milestones to be reached, did not identify certain role players and did not have formal mechanisms for reporting to stakeholders. The Board is concerned about this slow pace of progress, in the light of the imminent implementation of IPSAS, in 2010.

#### **Procurement and contract management**

The Board's audit revealed shortcomings in the areas of excessive lead times between requisitioning and issuing purchase orders; gaps in rules for the assessment of suppliers before their inclusion on the approved supplier list; insufficient evidence of investigation before supplier registration; missing documentation in supplier files; outdated supplier listings; and the lack of reconciliation between the ledger (Kardex) and inventory (Reality) systems at the West Bank field office.

### **Asset management**

UNRWA did not maintain a consolidated asset register to record and monitor the existence and completeness of assets. Each field office maintained separate fixed asset registers.

### **Expendable property**

UNRWA has significant quantities of expendable property. However, there has been no disclosure of such assets in the financial statements, although system enhancements are being made to address this issue.

### **Human resources management**

The Board has made several recommendations in respect of human resources management in its previous reports. These recommendations continue to be addressed by UNRWA as part of its organizational development process. Arising from the Board's current review of human resources management practices, the Board noted that:

- (a) The Gaza and West Bank field offices had no human resources plans in place;
- (b) As previously reported, UNRWA had not developed and implemented a succession plan;
- (c) Feedback provided by supervisors on performance appraisals was not documented and training needs were not identified during performance appraisals;
- (d) UNRWA did not compile personal development plans for all staff as part of the performance appraisal process, as previously recommended;
- (e) The West Bank field office had a vacancy rate of 8.50 per cent and some of the posts were vacant for more than six months.

### **Information technology**

In its previous reports the Board highlighted some areas for improvement. During the audit for the biennium 2006-2007, the Board noted the following shortcomings in information technology management. Several initiatives, such as the establishment of the Information Management Committee, have already been taken to address these matters.

- (a) UNRWA did not have a disaster recovery plan or a business continuity plan;
- (b) UNRWA had an inadequate back-up management system;
- (c) The UNRWA information systems security policy was still in draft form and therefore not approved or implemented;
- (d) UNRWA had no formal approved change control procedures in place for emergency changes.

### **Internal audit function**

For the biennium 2006-2007, the Department of Internal Oversight Services completed 27 out of the 50 planned audit assignments. A further five (10 per cent) of the audits were at the reporting stage, two (4 per cent) were in the fieldwork phase and 16 (32 per cent) had not been started. There is thus a need for the Department to enhance its coverage of UNRWA activities.

During the biennium, the Department of Internal Oversight Services had not performed any audit activity on the UNRWA area staff provident fund's business operations.

In September 2007, a quality assurance peer review was conducted by the Institute of Internal Auditors (IIA) on the Department of Internal Oversight Services, in keeping with the best practice and in compliance with IIA standards. The quality assurance review concluded that the Department "partially conformed" to IIA standards and highlighted various matters for consideration by management and the Department.

### **Internal audit findings**

The Board's review of the Department of Internal Oversight Services reports highlighted several significant matters which are discussed in the relevant sections of the present report.

### **Programme and project management**

The Board noted the following shortcomings in programme and project management:

(a) A formal approach, by way of policies/directives/guidelines, to implementing and sustaining project and programme management was not in place for all UNRWA projects.

(b) Project plans, interim reporting and final reporting were only undertaken for donor-funded projects. Training to provide competencies required to manage projects was not in place.

(c) The project procedure manual was last updated in 2003 and required updating again to bring it into line with best practice, international standards and the additional procedures implemented at the field office level.

(d) UNRWA headquarters provided limited support to field offices with regard to project management. This was illustrated by the lack of an approved project management strategy, implemented Agency-wide, indicating the headquarters support to be provided to field offices.

### **Write-offs and disposals**

UNRWA reported the following write-offs:

- (a) \$5.8 million for outstanding pledges written off against working capital;
- (b) \$0.25 million in outstanding receivables.

**Ex gratia payments**

UNRWA reported an ex gratia payment of \$2,628 for an accident between its bus and a vehicle of the United Nations Interim Forces in Lebanon.

**Cases of fraud and presumptive fraud**

UNRWA reported two cases of fraud and presumptive fraud to the Board for the financial period ended 31 December 2007.

**Recommendations**

The Board has made several recommendations based on its audit. The main recommendations are set out in paragraph 10 of the present report. The response of UNRWA to the Board's observations and recommendations is reflected in the body of the report.

**A. Introduction****1. Mandate, scope and methodology**

1. The Board of Auditors has audited the financial statements and reviewed the operations of the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA) for the biennium ended 31 December 2007 in accordance with General Assembly resolution 74 (I) of 7 December 1946. The audit was conducted in conformity with article VII of the Financial Regulations and Rules of the United Nations and the annex thereto, as well as the International Standards on Auditing. Those standards require that the Board plan and perform the audit to obtain reasonable assurance as to whether the financial statements are free of material misstatement.

2. The audit was conducted primarily to enable the Board to form an opinion as to whether the financial statements presented fairly the financial position of UNRWA as at 31 December 2007 and the results of its operations and cash flows for the biennium then ended, in accordance with the United Nations system accounting standards. This included an assessment as to whether the expenditure recorded in the financial statements had been incurred for the purposes approved by the governing bodies and whether income and expenditure had been properly classified and recorded in accordance with the Financial Regulations of the United Nations. The audit also included a general review of financial systems and internal controls and a test examination of the accounting records and other supporting evidence to the extent that the Board considered necessary to form an opinion on the financial statements.

3. The Board also issued a separate unqualified audit opinion on the financial statements of the UNRWA Area Staff Provident Fund, which were prepared in terms of the International Financial Reporting Standards for the year ended 31 December 2007.

4. The Board also performs an annual audit of the Microfinance and Microenterprise Department. The Board issued an unqualified opinion on the results

of its 2006 audit. The separate audit for the year 2007 is still to be performed and a separate report will be issued. The 2006 audit was conducted in coordination with the UNRWA Department of Internal Oversight Services. In its audit, the Department of Internal Oversight Services noted the following:

(a) The Microfinance and Microenterprise Department applied a consistent write-off policy for loans in field offices in Gaza, the West Bank, the Syrian Arab Republic and Jordan. These field offices had varying economic, social and political situations which might have an effect on credit default risk levels. The Microfinance and Microenterprise Department had not made a study to determine the appropriate write-off assumptions that could be applied to the loans of each field office.

(b) The Microfinance and Microenterprise Department accounted for recoveries with regard to amounts previously written off as revenue, which was not in compliance with the requirement of the International Financial Reporting Standards that the recoveries should be disclosed as sub-accounts, after operating income but before expenses.

(c) The Microfinance and Microenterprise Department incurred losses of \$1.9 million in 2006 and had an accumulated loss of \$6.6 million as at 31 December 2006. In the light of those losses, the Department had not performed forecasts and comparisons with other microfinancing entities operating in similar environments, to assist in determining its ongoing viability. The Department continued to report losses in 2007, amounting to \$2.5 million.

5. In addition to the audit of the accounts and financial transactions, the Board carried out reviews of the operations under United Nations financial regulation 7.5, which states that the Board may make observations with respect to the efficiency of the financial procedures, the accounting system, the internal financial controls and, in general, the administration and management of the operations. The General Assembly had also requested the Board to follow up on previous recommendations and to report to it accordingly. Those matters are addressed in paragraphs 12 to 18 below.

6. The Board continued to report the results of audits to the Administration in the form of management letters containing detailed observations and recommendations. This practice allowed for ongoing dialogue with the Administration. Two such management letters were issued covering the period under review.

7. Where observations in the present report refer to specific locations, such observations are limited to the locations specified. They do not in any way imply that they are applicable to other locations nor do they imply that issues to which they refer do not also exist at other locations.

8. The present report covers matters that, in the opinion of the Board, should be brought to the attention of the General Assembly. The Board's observations and conclusions were discussed with the Administration, whose views have been appropriately reflected in the present report.

## **2. Coordination with internal audit**

9. In planning its audits, the Board continued to coordinate with the UNRWA Department of Internal Oversight Services in order to avoid duplication of efforts and to determine the extent of reliance that could be placed on the Department's

work. In this regard, the separate audit of the Microfinance and Microenterprise Department, referred to above, was performed, under the supervision of the Department of Internal Oversight Services, by an external auditor, to whom it was outsourced. The Board welcomes the audit reports finalized by the Department of Internal Oversight Services, but has expressed its concern about the incomplete execution of its audit plans.

### 3. Main recommendations

10. The Board's main recommendations are that UNRWA:

(a) **Consult with donors with a view to reprogramming resources reflected in balances for unliquidated obligations (para. 27);**

(b) **Account for all its land and buildings in its financial statements (para. 37);**

(c) **In coordination with the United Nations, ensure that its liabilities in respect of after-service health insurance are determined and accurately recorded (para. 46);**

(d) **Update its IPSAS implementation plan, ensure that it is approved and include in it all role players and a mechanism for reporting to them (para. 51);**

(e) **Adhere to the lead-time guidelines for the various stages of the procurement process (para. 70);**

(f) **Maintain an asset register that includes all non-expendable property, including land and buildings, that reflects cost, description, asset number and date of acquisition to ensure accountability for this property (para. 74);**

(g) **Consider disclosing in the financial statements the value of unused expendable property at the end of the financial period in order to improve transparency, accountability and financial reporting, and in preparation for implementation of IPSAS (para. 80);**

(h) **Develop human resources plans for its field offices (para. 85);**

(i) **Develop a comprehensive disaster recovery and business continuity plan and communicate it to all personnel (para. 107);**

(j) **In conjunction with the Department of Internal Oversight Services, include the Area Staff Provident Fund in its audit workplan (para. 137 (b)).**

11. The Board's other recommendations appear in paragraphs 32, 55, 59, 63, 67, 88, 92, 93, 98, 101, 112, 116, 121, 125, 128, 131, 137 (a), 143, 158, 162, 165 and 169. These recommendations do not address sanctions or disciplinary steps which the Administration may wish to impose on defaulting officials for consistent failure to ensure compliance with the Financial Regulations and Rules of the United Nations and the Financial Regulations of UNRWA, administrative instructions and other related directives.

## **B. Detailed findings and recommendations**

### **1. Follow-up of previous recommendations**

12. In accordance with section A, paragraph 7 of General Assembly resolution 51/225, the Board reviewed the actions taken by UNRWA to implement the recommendations contained in the Board's report for the biennium ended 31 December 2005. ACABQ, in its report (A/62/355) on implementation of the recommendations of the Board relating to the biennium 2004-2005, encouraged UNRWA to continue efforts to expedite implementation of the Board's recommendations. ACABQ made that comment in the context of the relatively slow implementation by UNRWA of the Board's recommendations, which ACABQ had noted from the Board's report on the implementation of its recommendations (A/62/120).

13. UNRWA has developed an organizational development process, entitled "Serving Palestine refugees more effectively — strengthening the management capacity of UNRWA", which was approved in September 2006 and launched on 1 January 2007. The plan sets out strategic and interdependent initiatives based on four levers of change identified at UNRWA, namely programme management, human resources management, organizational processes and systems, and leadership and management.

14. UNRWA views its organizational development process as a significant tool in addressing the Board's recommendations relating to the biennium 2004-2005 and to the current biennium.

15. Of the total of 34 recommendations made, 17 (50 per cent) were fully implemented, while 14 (41 per cent) were partially implemented. Two recommendations (6 per cent) were not implemented and one (3 per cent) was overtaken by events. These recommendations are shown in the annex.

#### *Recommendations partially implemented*

16. Based on the responses provided by UNRWA, most of the recommendations that were partially implemented were due to be addressed by the organizational development plan. This plan was under implementation and was due to be completed in 2008. In particular, recommendations relating to results-based management and human resources were to be addressed by that plan, while observations relating to information technology were to be addressed in the updated enterprise resource planning system, which was under development. The Board is concerned at the high proportion of recommendations not yet fully implemented.

#### *Ageing of previous recommendations*

17. The Board also evaluated the ageing of its recommendations relating to the previous biennium that were partially or not yet implemented, as requested by ACABQ (A/59/736, para. 8). The financial periods in which such recommendations were first made are indicated in the annex.

18. Of the 16 recommendations not fully implemented, 11 (69 per cent) related to the biennium 2004-2005 and five (31 per cent) were first raised in relation to the biennium 2002-2003, as depicted in figure 1 below.

Figure 1  
Ageing of partially implemented and unimplemented recommendations  
relating to the previous bienniums

## 2. Overall financial overview

### *Key financial ratios*

Table 1  
Ratios of key financial indicators

Ratio	Biennium ended 30 December			Component of 2007 ratio <sup>a</sup>
	2003	2005	2007	
Assessed contribution outstanding/total assets <sup>b</sup>	0.23	0.23	0.2	87/447
Cash/total assets <sup>c</sup>	0.64	0.63	0.47	212/447
Current assets/liabilities (liquidity ratio) <sup>d</sup>	2.48	2.88	1.57	355/225
Cash/liability <sup>e</sup>	1.58	1.82	0.94	212/225
Assets/liabilities <sup>f</sup>	2.48	2.88	1.99	447/225
Unliquidated obligations/total liabilities <sup>g</sup>	0.66	0.54	0.58	130/225

<sup>a</sup> In millions of United States dollars.

<sup>b</sup> A low indicator depicts a healthy financial position.

<sup>c</sup> A high indicator depicts a healthy financial position.

<sup>d</sup> A favourable indicator is a ratio above 1.

<sup>e</sup> A low indicator is a reflection that insufficient cash is available to settle debts.

<sup>f</sup> A high indicator is a reflection of sufficient assets to cover all liabilities.

<sup>g</sup> A low indicator is a positive reflection that obligations are being liquidated.

19. Table 1 contains key financial ratios extracted from the financial statements. The outstanding contributions ratio has improved compared with the previous biennium, reflecting improved collection strategies. The cash to total assets ratio has deteriorated compared with that in the previous biennium, indicating that only 47 per cent of total assets are in cash readily available to meet the immediate debts of the Agency. The cash to liability ratio has also deteriorated compared with the previous biennium, indicating that for every dollar of debt, the Agency only has

94 cents of liquid assets to settle such debts as they fall due. However, the solvency ratio (assets/liabilities) indicates that the Agency is in a healthy financial position even though this ratio deteriorated compared with the previous bienniums. The unliquidated obligations ratio has deteriorated compared with the previous biennium.

20. The liquidity ratio shows that UNRWA has \$1.57 (2004-2005: \$2.88) in short-term resources to service each dollar of current debt. The acceptable norm is to have one dollar available to service each dollar of current debt. In comparison with the prior biennium, this position has deteriorated; however this is due to a significant increase in unliquidated obligations arising from the closure of the Gaza Strip.

21. The solvency ratio shows that UNRWA has \$1.99 (2004-2005: \$3.56) to service each dollar of long-term debt as it falls due. The acceptable norm is to have two dollars available to cover each dollar of debt. The reason for the deterioration in comparison with the prior year is that noted in the preceding paragraph.

### 3. Statement of income and expenditure

22. Total income for the period under review amounted to \$1.277 billion (2004-2005: \$1.025 billion), while total expenditure amounted to \$1.308 billion (2004-2005: \$0.987 billion), resulting in a deficit of \$31 million. Comparative income and expenditure for the current and previous two bienniums are shown in figure 2.

Figure 2

#### Comparative income and expenditure

(in billions of United States dollars)

23. The financial performance of UNRWA indicates that UNRWA incurred a deficit of \$31 million in the current biennium (in 2004-2005, a \$37 million surplus). However, the Board noted that only 4 per cent of total expenditure was administrative; most of the expenditure was on programme-related activities. Project spending increased by 125 per cent and emergency appeal spending by 60 per cent, owing to the prevailing programme requirements.

24. The increase in expenditure of approximately \$320 million during 2006-2007 compared with 2004-2005 (32 per cent) was attributable mainly to contributions from donors increasing by 20 per cent.

#### *Unliquidated obligations*

25. Unliquidated obligations (the reserve for unliquidated budget commitments) as at 31 December 2007 amounted to \$130 million, representing 10 per cent of the total biennial expenditure and an increase of \$78 million (148 per cent) compared with 2004-2005. This increase is due to the protracted closure of the Gaza Strip, which resulted in a delay in the execution and completion of some contracts and other obligations which were to be liquidated in 2007. Figure 3 shows unliquidated obligations as against total expenditure for the financial periods 2002-2003, 2004-2005 and 2006-2007.

Figure 3  
**Unliquidated obligations as against total expenditure**  
(in millions of United States dollars)

26. Resources have been committed to earmarked projects which are delayed or cannot be commenced because of external circumstances. This situation leads to scarce resources being committed to delayed projects, whereas such funds could be diverted with the consent of donors to programmes and projects in other areas, or to projects not effected by the closure of the Gaza Strip.

**27. The Board recommends that UNRWA consult with donors with a view to reprogramming resources reflected in balances for unliquidated obligations.**

28. UNRWA informed the Board that implementation of that recommendation might not be feasible as unliquidated obligations arose in respect of earmarked funding arrangements which obliged it to firmly commit funds to a specified project. UNRWA proposed discussing the long-outstanding obligations with the donors concerned, with a view to identifying a mutually acceptable solution.

#### 4. Statement of assets, liabilities, and reserves and fund balances

##### *Assessed contributions receivable*

29. Assessed contributions outstanding as at 31 December 2007 amounted to \$87 million, compared with \$66 million for the preceding financial period, an increase of \$21 million (32 per cent).

30. Paragraph 33 of the United Nations system accounting standards states that “the organization may make a provision for delays in the collection of the outstanding contributions”. It is the policy of the United Nations not to make provision for delays in the collection of such assessed contributions, in accordance with General Assembly decisions on the matter. However, UNRWA writes off all pledges for contributions outstanding for more than two years. In the current biennium, these amounted to \$5.8 million.

##### *Accounts receivable*

31. Included as part of the accounts receivable balance of \$44 million is an amount of \$544,074 which relates to receivables due from the Palestinian National Authority (PNA) to UNRWA. This receivable was raised during the period from 1990 to 1994 and related to freight costs incurred by UNRWA which were to be refunded by PNA. During the current biennium, UNRWA did not provide further evidence that the amount was recoverable.

**32. UNRWA agreed with the Board’s recommendation that it review the collectability of the Palestinian National Authority debt and make a provision for doubtful debts as appropriate.**

33. UNRWA informed the Board that it maintained the balance for possible offset against an amount payable to PNA of approximately \$0.37 million. However, if there was no offset in the next biennium, a write-off would be considered.

##### *Land and buildings*

34. UNRWA recognized/recorded land and buildings for the first time in its financial statements for the current biennium. It reported on the face of its statement of assets and liabilities an amount of \$88.5 million for land and buildings and restated its corresponding comparatives with an amount of \$62.4 million. UNRWA had in the past only disclosed the historical cost of its land and buildings (since the inception of the Agency), which were disclosed at \$340.3 million and \$302.4 million for the 2004-2005 and 2002-2003 bienniums respectively.

35. The Board is concerned that the historical cost of land and buildings now recorded on the face of the statement of assets and liabilities is understated. UNRWA explained that the land and buildings acquired before 2002 were not included in the carrying amount of \$88.5 million disclosed in the statement of assets and liabilities and in the notes to the financial statements. This was because the historical cost of buildings which were acquired and expensed prior to 31 December 2001 could not be reliably determined as the value might have changed because some buildings might have been impaired, questions concerning the ownership of land and shelters needed to be resolved and old records were not always complete.

36. Consequently, the Board could not determine the total value of the Agency’s land and buildings. However, UNRWA was undertaking a revaluation exercise in the

course of the next biennium in preparation for the implementation of IPSAS in 2010.

**37. UNRWA agreed with the Board's recommendation that it account for all its land and buildings in its financial statements.**

38. UNRWA informed the Board that the new treatment of land and buildings in the financial statements was in accordance with a recommendation of its Audit and Inspection Committee. The amount for the prior period represented the cumulative expenditure on land and buildings which had been expensed since the inception of the Agency. Furthermore, it planned to engage the services of an independent firm of property consultants to undertake a revaluation exercise by the end of 2008 that would help it to determine the fair value of all its land and buildings, which would be reflected under IPSAS.

**5. Reserves and fund balances**

39. UNRWA disclosed six types of reserves in its financial statements for the period under review, the working capital reserve, fund balances reserves, the revaluation capital reserve, the capital reserve for project-financed buildings, retained earnings and the capital reserve relating to the Microfinance and Microenterprise Department.

40. The working capital reserve as at 31 December 2007 amounted to \$40 million (2005: \$38 million), while the fund balance reserve amounted to \$74 million (2005: \$129 million). During the period under review, UNRWA changed its accounting policy to capitalize its land and buildings. As a result of this change, the revaluation capital surplus reserve was created, amounting to \$60 million (2005: \$45 million). The capital reserve for project-financed buildings as at 31 December 2007 amounted to \$26 million (2004-2005: \$22 million).

**6. End-of-service liabilities and after-service health insurance**

41. In relation to the financial reporting of end-of-service liabilities in accordance with General Assembly resolutions 60/255 and 61/264, the Administration changed the presentation of end-of-service liabilities this biennium from disclosure in the notes to the financial statements to presentation on the face of the financial statements.

42. The financial statements for the period under review reflected end-of-service liabilities amounting to \$22.1 million, which related to area staff leave encashment balances. The area staff leave encashment liability is calculated by applying accrued leave days for each individual staff member, up to the maximum allowed under the staff rules, to the latest salary available on the payroll system.

43. The notes to the financial statements disclose an estimated value of \$206.3 million for the area staff termination liability, which was determined on the basis of the liquidation of the Agency. However, this is not a current obligation of the UNRWA as there is no indication at present that the Agency will cease to operate.

44. The notes to the financial statements further state that separation costs of international staff are borne by the United Nations Secretariat and no provision for those costs is made in the Agency's financial statements. As a result, UNRWA has not disclosed the after-service health insurance liability in its financial statements,

as that liability relating to international staff should be included in the United Nations financial statements (Vol. I). However, the United Nations has informed the Board that it has, in error, omitted UNRWA from its actuarial liability calculations as at 31 December 2007. Thus the UNRWA share of the after-service health insurance liability is not disclosed in the United Nations financial statements. The United Nations has informed the Board that it assumes the after-service health insurance liability for those UNRWA staff who are on posts funded from the United Nations regular budget and has estimated that liability to be \$6.6 million as at 31 December 2007. The Board has not validated that liability.

45. UNRWA disclosed in the notes to the financial statements an amount of \$3.2 million for other end-of-service liabilities for international staff. Details are shown in table 2 below.

**46. The Board recommends that UNRWA, in coordination with the United Nations, ensure that its liability in respect of after-service health insurance is determined and accurately recorded.**

Table 2

**Estimated end-of-service liabilities for international staff  
as at 31 December 2007**

<i>Category</i>	<i>Amount (United States dollars)</i>
Provision for repatriation grant	1 800 000
Leave pay encashment	1 400 000
<b>Total</b>	<b>3 200 000</b>

## **7. Progress towards the implementation of IPSAS**

47. In accordance with General Assembly resolution 61/233 and in response to the comments of ACABQ in its report (A/61/350), the Board carried out a gap analysis relating to the implementation of IPSAS as well as new or upgraded enterprise resource planning systems. ACABQ had commented on the desirability of such systems taking fully into account the detailed requirements of IPSAS.

48. UNRWA informed the Board that the enterprise resource planning system currently in use by the Agency (the Financial Management System) would be maintained in the process of implementing IPSAS. The system had a facility to accommodate full accrual accounting and the ability to cover functionalities related to fixed assets and inventory accounting. There would therefore be no need for the acquisition of a new enterprise resource planning system in order to ensure full and successful implementation of IPSAS. The system would, however, have to undergo some customization and modifications, where applicable, mainly to ensure it was able to store, process and produce IPSAS-compliant financial information and reports.

49. The Board reviewed the UNRWA plan for the implementation of IPSAS and noted that the plan did not have evidence of having been approved. Furthermore, the plan did not detail any milestones to be reached by UNRWA.

50. Even though the Agency's implementation plan identified some role players, it did not define the role and responsibilities of legal, information technology, internal audit and evaluation personnel, project staff, donors and implementing partners. Furthermore, the plan did not detail any formal mechanism for reporting to stakeholders.

**51. UNRWA agreed with the Board's recommendation that it:**

(a) **Update its IPSAS implementation plan and ensure that it is approved;**

(b) **Include all role players and a mechanism for reporting to them in its IPSAS implementation plan.**

52. UNRWA informed the Board that its IPSAS implementation plan had been cleared by the Comptroller. It would be revised in line with the Board's recommendation and would be submitted to the Commissioner-General for final approval.

## **8. Procurement and contract management**

### *Registration of prospective suppliers*

53. Section 3, paragraph 9B(i) of the UNRWA Manual of Supply Procedures requires the Procurement and Logistics Division and the Field Procurement and Logistics Divisions to maintain registers of approved suppliers. New suppliers are added to the registers after investigation of their suitability.

54. The Board noted that the UNRWA procurement rules and procedures gave no indication of how the suitability factors should be applied.

**55. UNRWA agreed with the Board's recommendation that it revise the criteria for the inclusion of new suppliers on its register of approved suppliers and identify in its procurement rules and procedures how those criteria should be applied.**

56. UNRWA informed the Board that it would address the recommendation by issuing clear instructions, in line with United Nations Global Marketplace practice and the United Nations Common Coding System. Those instructions would be promulgated in the procurement manual, which would be in line with United Nations guidelines. Furthermore, UNRWA stated that it was continuing to review registration information with a view to increasing the number of suppliers from developing countries and that it was aligning its new vendor registration with the United Nations Supplier Code of Conduct.

### *Evaluation of suppliers*

57. The Board noted that at the Gaza Strip and West Bank field offices there were cases of insufficient evidence of the supplier evaluation having been performed.

58. UNRWA informed the Board, that, with regard to the cases cited at the Gaza field office, the majority of the Gaza field office's local suppliers were individuals who owned their business (sole traders) and were not required to publish or submit audit statements of their resources, unlike limited companies with shareholders. However, the Gaza field office always requested such suppliers to submit a bank

reference to the effect that the concerned supplier's account was active and in good standing.

**59. UNRWA agreed with the Board's recommendation that it maintain all relevant documentation, including supplier evaluation records, in registration files.**

60. UNRWA informed the Board that in the West Bank and Gaza field offices, its procurement staff had visited suppliers to inform them of the United Nations Global Marketplace practices and the United Nations Common Coding System coding. UNRWA informed the Board that supplier registration files had since been maintained at all field offices. Furthermore, the supplier list had been reviewed and the number of suppliers reduced from over 8,000 suppliers to approximately 1,100.

*Approved supplier lists*

61. The Board noted that the supplier lists at both the Gaza and West Bank field offices were not updated on a regular basis. As a result, unsuitable suppliers might be invited to tender for the provision of goods and services.

62. UNRWA informed the Board that with regard to one of the cases cited at the West Bank field office, the supplier was recorded in the West Bank field office procurement system but had never been approved as it had not provided the proper documents. Although the supplier had been included in the approved vendor list through an oversight, that company had not been invited to participate in a tender and had never been awarded any purchase order.

**63. UNRWA agreed with the Board's recommendation that it ensure that the field offices regularly update their registers of approved suppliers.**

64. UNRWA informed the Board that all supplier registration files had been completely updated as at January 2008 at the field offices and at headquarters, in the course of the establishment of the procurement and inventory management system and that a biannual requirement to update data had been included in the procurement procedures.

*Reconciliation between Kardex and Reality*

65. The Board visited inventory warehouses at both the Gaza Strip and West Bank field offices. Inventory movement to and from Agency warehouses was tracked through a manual stock ledger system (Kardex) and then manually captured onto a computer inventory system (Reality). While independent reconciliations between stock levels and movements were performed on a monthly basis by the Gaza field office, as recorded in the Kardex and Reality systems, no such reconciliations were performed by the West Bank field office.

66. The risk exists that information recorded in the Reality system may be incomplete, incorrect and/or outdated, and consequently inventory could be misstated.

**67. UNRWA agreed with the Board's recommendation that it review its existing manual stock record-keeping arrangements.**

68. UNRWA subsequently informed the Board that that recommendation had since been implemented through the establishment of the new procurement and inventory

management system, and the phasing out of the Kardex and Reality systems. UNRWA stated that the new procurement inventory management system was an integrated system; inventory details were captured into the system and in real time matched to the procurement process and the financial payment process. Furthermore, electronic reconciliations were continuously performed and physical verification of stock would be performed on a regular basis.

#### *Procurement lead times*

69. In the Board's report for the biennium 2004-2005, UNRWA had agreed with the Board's recommendation that it establish and strengthen controls to monitor and reduce procurement lead times. The Board noted that there were excessive lead times, ranging from 8 to 12 months, between the requisition for purchase and the capturing of purchase orders.

**70. The Board reiterates its previous recommendation that UNRWA adhere to the lead-time guidelines for the various stages of the procurement process.**

71. UNRWA informed the Board that the implementation of the procurement and inventory management system would provide specific and detailed processing times for every phase of the procurement process, from the date of approval of a requisition by a user department to the payment of the vendor's invoice.

## **9. Asset management**

72. Non-expendable property consists of property and equipment valued at \$1,500 or more per unit at the time of purchase and with a serviceable life of five years or more. As disclosed in note 9 to the financial statements, the value of non-expendable holdings as at 31 December 2007 was \$95.3 million, a 17 per cent increase over the previous-period balance of \$81.3 million.

#### *Asset register*

73. The Board noted that UNRWA did not maintain an asset register to monitor the existence and completeness of assets. The Board was provided with an excel spreadsheet schedule listing assets. However, the listing did not indicate acquisition date, invoice reference, asset number or physical location, and did not provide a description of the asset, or details of disposals and pending disposals. Furthermore, this listing did not include land and prefabricated buildings. The absence of an asset register may lead to assets not being fully accounted for and losses going undetected.

**74. UNRWA agreed with the Board's recommendation that it:**

(a) **Maintain an asset register that includes all non-expendable property, including land and buildings, that reflects cost, description, asset number and date of acquisition, to ensure accountability for this property;**

(b) **Implement procedures to periodically physically verify the existence of assets and the condition of the assets and investigate and adjust for variances.**

75. UNRWA informed the Board that the asset registers were maintained at the field office level and records existed to physically verify assets. A centralized,

consolidated, Agency-wide assets register would be implemented with the assets module of the financial management system, during the second half of 2008.

#### **10. Expendable property**

76. Expendable property consists of property and equipment valued at less than \$1,500 per unit at the time of purchase and with a serviceable life of less than five years. There are, however, a number of exceptions to this rule.

77. Paragraph 5 of the United Nations system accounting standards requires observance of the principles of prudence, substance over form and materiality in the selection and application of accounting policies. In addition, paragraph 49 requires disclosure of the value of inventory (other than non-expendable equipment, furniture and motor vehicles) as an asset in the financial statements at the end of the financial period.

78. The Board noted that except for stock relating to embroidery and carpentry, there was no disclosure of the value of expendable property in the financial statements, although significant amounts of such property were held at pharmaceutical locations, warehouses and food distribution centres.

79. UNRWA informed the Board that it had not been its policy to disclose expendable property since that would require a reduction in expenditure at the end of the year and corresponding credit to Member States. The latter was not possible since the funds had already been expended.

**80. UNRWA agreed with the Board's recommendation that it consider disclosing in the financial statements the value of unused expendable property at the end of the financial period in order to improve transparency, accountability and financial reporting, and in preparation for the implementation of the International Public Sector Accounting Standards.**

81. UNRWA informed the Board that the implementation of the procurement and inventory management system would allow for the adoption of a new procurement and inventory software module which would enable it to report on unused expendable property values.

#### **11. Human resources management**

##### *Human resources planning*

82. During the audit of human resources management at the Gaza Strip and West Bank field offices, the Board noted that neither field office had human resources plans in place yet.

83. Although there was no formal requirement for field offices to prepare human resources plans, the Board considered it good practice for field offices to prepare their own human resources plans since they carried out their own recruitment. In the absence of such plans, the effectiveness of human resources management, which included human resources planning and forecasting, staff selection and deployment, performance management and the development of relevant skills and knowledge, could not be planned, evaluated, monitored or improved in the best possible manner.

84. UNRWA stated that when that recommendation had been made in the previous report of the Board, it had undertaken to complete a workforce plan by 2009 and to

provide regular updates on progress towards the achievement of that goal. UNRWA informed the Board that it was taking a systematic approach to human resources planning, which it saw as a key component of an integrated set of initiatives within the human resources component of the organizational development process.

**85. UNRWA agreed with the Board's reiterated recommendation that it develop human resources plans for its field offices.**

86. UNRWA informed the Board that it was in the process of adopting a comprehensive workforce strategy, details of which had been discussed at a recent Management Committee meeting. The strategy included workforce planning at headquarters and in the field locations, in conjunction with the programme management and budgetary cycles. Tools for programme management, including workforce planning, were currently being developed.

#### *Succession planning*

87. The Board reported previously that UNRWA had no succession plan in place.

**88. UNRWA agreed with the Board's reiterated recommendation that it formalize the process of succession planning.**

89. UNRWA informed the Board that succession planning was part of overall workforce planning and would be undertaken in 2008. In addition, exit interviews were conducted regularly for international staff. To ensure that UNRWA had an adequate cadre of senior staff who could be selected to replace retiring staff, large-scale externally accredited leadership and management development training was started in 2007.

#### *Performance management system*

90. The Board noted that UNRWA conducted performance appraisal reviews for employees annually, in the context which the work performance of the employee was examined and discussed with a view to identifying weaknesses and strengths, as well as opportunities for improvement and skills development. The Board noted that feedback provided by supervisors on performance appraisals was not documented and that training needs were not identified during performance appraisals.

91. The Board had previously recommended that UNRWA compile personal development plans for all staff as part of the performance appraisal process. At the time of the audit, personal development plans had still not been implemented for all staff.

**92. UNRWA agreed with the Board's reiterated recommendation that it compile personal development plans for staff as part of the performance appraisal process.**

**93. UNRWA agreed with the Board's recommendation that supervisors provide documented feedback during performance appraisal reviews of staff members.**

94. UNRWA informed the Board that an improved, electronic, competency-based performance appraisal system had been developed and was currently being rolled out for international staff and senior area staff. It included an assessment of training and development needs, communication and feedback at the midpoint and at the end

of the contractual year. Furthermore, in the longer term, the Agency would seek to link performance appraisal with outcomes expected from reforms in programme management and with its classification and compensation systems, which were being redesigned.

#### *Gender representation*

95. At the time of the interim audit visit, the gender ratios at both the Gaza and West Bank field offices were outside the 50:50 target range established by the Secretary-General. The male to female ratio of the local staff complement in Gaza was 55:45 (the total of 9,490 employees comprised 4,235 (45 per cent) females and 5,255 (55 per cent) males). At the Professional level and above, the local staff component of 547 employees consisted of 82 females (15 per cent) and 465 males (85 per cent).

96. The male to female ratio of the local staff complement in the West Bank was 49:51 (the total of 4,329 employees comprised 2,102 (49 per cent) females and 2,227 (51 per cent) males). At the Professional level and above, the local staff component of 439 employees consisted of 70 (16 per cent) females and 369 (84 per cent) males.

97. UNRWA informed the Board that it had made efforts to ensure diversity in staff selection. However, the Agency had not established time frames and accountability measures for achieving the 50:50 gender distribution target. UNRWA explained that it was difficult to establish a time frame to achieve a 50:50 gender balance, since women did not apply for a considerable number of vacant posts (such as those for manual labourers and guards) owing to local traditions or to the physical abilities required for such posts.

**98. UNRWA agreed with the Board's recommendation that it formally establish gender distribution milestones and monitor all new appointments against such milestones.**

99. UNRWA informed the Board that, in April 2008, it had adopted a comprehensive gender mainstreaming strategy for 2008-2009, which incorporated a human resources gender policy and implementation strategy setting out targets and milestones. Furthermore, UNRWA stated that all gender-related policy documents were made available to staff on its Intranet sites and that, later in 2008, a Junior Professional Officer was expected to join the Human Resources Department and have specific responsibility for supporting the implementation of the human resources gender policy.

#### *Vacancy rate*

100. UNRWA considered that a 5 per cent vacancy rate was a reasonable target. The Agency endeavoured to fill vacancies within three months. During the review of vacancies, the Board noted that the Gaza field office's vacancy rate of 3.5 per cent was within the norm. However, the West Bank field office's vacancy rate of 8.5 per cent was above the norm. Furthermore, some of the posts had been vacant for more than six months. Posts that were vacant for excessive periods could have a negative impact on service delivery.

101. **UNRWA agreed with the Board's reiterated recommendation that it include in its human resources plan a strategy to manage the timely filling of long-vacant posts.**

102. UNRWA informed the Board that the management of vacant posts had been examined in recent process reviews and had also been considered in December 2007 by the Management Committee. A combination of strategies to address the issue would be implemented in 2008.

103. UNRWA further informed the Board that it fully accepted all the recommendations relating to human resources and that those recommendations were being adequately addressed through a comprehensive overhaul of human resources management. UNRWA further explained that human resources reforms were part of the organizational development process which it had embarked upon in 2005.

## **12. Information technology**

104. A high-level overview of the general computer controls applicable to the information systems was undertaken at headquarters in Amman and the field offices in the Gaza Strip and the West Bank. The objective of the high-level overview was to ascertain the reliability of the overall information systems management controls where the financial systems were concerned.

105. The review indicated that although some controls were in place, there were several significant weaknesses in the general control environment.

### *Disaster recovery plan and business continuity plan*

106. The Board had previously noted that UNRWA did not have a disaster recovery plan or business continuity plan that had been developed, documented and communicated.

107. **UNRWA agreed with the Board's reiterated recommendation that it:**

(a) **Develop a comprehensive disaster recovery and business continuity plan and communicate it to all personnel;**

(b) **Test, review and update its disaster recovery plan on a regular basis.**

108. UNRWA informed the Board that, with a view to expediting the implementation of all recommendations relating to information technology, it had secured the services of a consultant to develop a draft disaster recovery plan framework, which was due to be discussed and adopted by the recently established Information Management Committee.

109. UNRWA further informed the Board that it had signed a memorandum of understanding with the Department of Field Support to the effect that all newly developed central applications would be moved to the data centre in Brindisi, Italy, from where disaster recovery services would be provided. Furthermore, a second international wide area network to provide data connectivity was currently being put in place.

*Management of back-ups*

110. The Board noted certain weaknesses regarding the management of back-ups, such as that they were not stored in an off-site location; no register of back-ups was kept; and evidence that back-ups were regularly tested did not exist.

111. Without proper back-up management, the Agency has no way of ensuring that data could be successfully restored or that the Agency would have access to the back-ups.

**112. UNRWA agreed with the Board's recommendation that it address the weaknesses identified in the back-up procedures relating to information technology across the Agency.**

113. UNRWA informed the Board that back-up schedules at headquarters in Amman were well established and carried out on a daily and monthly basis. Monthly back-ups were kept indefinitely in secure safes. Back-ups were verified each time the process was completed. Tapes were stored off-site for headquarters systems. However, back-ups for other offices were not transported to different locations. UNRWA undertook to establish and implement the headquarters procedure at all locations.

114. UNRWA also informed the Board that a review of back-up processes for all locations was currently being conducted and that the results would be reflected in a revised operations manual, to be issued by the end of August 2008, that would provide Agency-wide guidance.

*UNRWA information systems strategy and master plan*

115. The Board noted that the UNRWA information systems strategy and master plan had not been updated recently, the last revision having been undertaken in October 2004.

**116. UNRWA agreed with the Board's recommendation that it review and update its information systems strategic plan regularly, taking into account international standards and best practice.**

117. UNRWA informed the Board that its newly established Information Management Committee would play a central role in implementing and updating the information systems strategic plan, as its terms of reference included regular review of the Agency's information and communications technology strategic plan.

*Information systems security policy*

118. At the time of the audit, the UNRWA information system security policy was still in draft form and therefore not approved or implemented.

119. An information security statement was issued and approved on 24 July 2005, under the terms of which an information security working group was established. It was also noted that paragraphs 3.3 and 4.1.1 of the information system strategic plan provided for the establishment of an information system security plan, which was also budgeted for.

120. Without a proper information system security and administration policy, the management would be unable to protect the Agency's information system assets or

detect and report on information systems security violations that might compromise the integrity and confidentiality of data housed within the Agency.

**121. UNRWA agreed with the Board's reiterated recommendation that it develop an information systems security policy to enforce and regulate access to sensitive and confidential data and information.**

122. UNRWA informed the Board that a draft information security policy has been prepared and would be reviewed by the Information Management Committee, and that, once it had been finalized, the policy would be managed through regular reviews by that committee.

*Change control policy for emergency changes*

123. The Board noted that UNRWA had no formally approved change control procedures in place for emergency changes.

124. Without a proper change control process, UNRWA faces the risk that it may not be able to ensure that changes are authorized, documented and tested properly before implementation.

**125. UNRWA agreed with the Board's reiterated recommendation that it:**

(a) **Develop a change control policy for emergency changes;**

(b) **Enforce standardized procedures relating to requests for changes to the application systems.**

126. UNRWA responded that, with regard to standardized procedures for requests for changes, the Information System Division (ISD) had issued the relevant instructions under ISD Technical Instruction No. 1, entitled "System development and configuration management procedures" and those procedures would be revised to include emergency change requests. The plan was to include those items under a comprehensive "service desk" policy and procedures.

*Help desk*

127. UNRWA informed the Board that an assessment of the help desk resources had been conducted in 2004 and additional resources had been requested as part of a restructuring proposal, in conjunction with the information and communication technology strategy and master plan. In addition, a similar assessment had been conducted by the United Nations Secretariat in the first quarter of 2007. Both assessments found that there was a shortage of qualified personnel.

**128. UNRWA agreed with the Board's recommendation that it allocate sufficient personnel to staff help desks.**

129. UNRWA informed the Board that some of the posts requested in the restructuring proposal had been approved for establishment in the third quarter of 2007 and the recruitment process to fill them was under way. This activity will be covered by the comprehensive "service desk" policy and procedures referred to above. UNRWA also undertook to regularly assess user satisfaction and help desk requirements.

130. All UNRWA offices had procedures and structures in place to deal with information system problems and requests; however, the systems used were not

standardized across the Agency. For example, the Gaza field office had an advanced, computerized system incorporating e-mail, intranet, fax and telephone in place, developed in-house by one of the programmers, while other field offices did not. The West Bank field office had an e-mail and telephone system in place. As a result, there was no standard method for the recording of help desk problems and solutions and the quality of help desk service delivery among UNRWA offices would naturally vary.

**131. UNRWA agreed with the Board's recommendation that it standardize help desk policies, procedures and structures to ensure consistent standards of service delivery.**

132. UNRWA informed the Board that, given the financial difficulties it faced, it would implement the recommendations relating to the help desks as resources and competing priorities allowed. Owing to funding shortfalls, 50 per cent of the additional posts requested in the restructuring proposal submitted in 2005 had been approved in June 2007; the remainder had been approved for recruitment in 2008. UNRWA further informed the Board that it was in the process of assessing a number of software solutions for help desk logging, with a view to adopting a standard, Agency-wide, solution by the end of 2008.

### **13. Internal audit function**

#### *Internal audit coverage*

133. The Board reviewed the Department of Internal Oversight Services' workplan for 2006-2007 for UNRWA operations and noted that the workplan was based on the assessment of risks. During 2007, the Department completed 27 (54 per cent) of the 50 planned audit assignments, 5 audits (10 per cent) were at the reporting stage, 2 (4 per cent) were in the fieldwork phase and 16 (32 per cent) were not started. The Department informed the Board that its workplan had been prepared to reflect assignments "in excess of its capacity".

134. As a result of the incomplete internal audit coverage, the Board's reliance on the internal audit work was reduced. The Board is therefore concerned about the impact of the internal audit coverage on the overall control environment of UNRWA.

135. During the biennium, the Department of Internal Oversight Services had not performed any audit activity on the activities and financial records of the UNRWA Area Staff Provident Fund. However, the Department performs a regular validation of the management's actions to address the recommendations of the Board. The Board found this validation to be a useful oversight tool.

136. UNRWA informed the Board that the action plan of the Department of Internal Oversight Services was determined by operational necessity and that in spite of resource constraints the Department had accomplished substantial work during the biennium, completing a number of special assignments and other projects, including the peer review and coordination with the Board with regard to the audit of the annual financial statements of the Microfinance and Microenterprise Department.

**137. The Board recommends that UNRWA, in conjunction with the Department of Internal Oversight Services:**

(a) **Consider desktop reviews or other alternative procedures for assignments where the security situation prevents a field visit from being undertaken;**

(b) **Include the Area Staff Provident Fund in its audit workplan.**

138. The Department of Internal Oversight Services informed the Board that it prepared its workplan (based on risk assessment) in excess of its capacity in order to build in operational flexibility in case of security-related closures in Gaza, the West Bank and Lebanon and that its plan was reviewed annually by the Audit Committee to take into consideration the Agency's priorities with regard to oversight issues. Furthermore, the Department stated that it utilized some of its available time to conduct its internal quality assessment and then submitted itself for the external quality assessment. The Department explained that it had been able, despite the constraints, to extend audit coverage across the Agency in certain areas and also undertake investigation-related activities.

*Quality assurance peer review*

139. In September 2007, a quality assurance peer review of the Department of Internal Oversight Services was conducted by the Institute of Internal Auditors (IIA) in keeping with best practice and in compliance with IIA standards.

140. The quality assurance peer review concluded that the Department of Internal Oversight Services partially conformed to IIA standards. The review found that the Department was "making good faith efforts to comply with the requirements of individual standards or elements of the code of ethics ... but has fallen short of achieving some of its objectives". The review concluded that DIOS "partially complies" with attribute standards and "fully complies" with performance standards and with the code of ethics.

141. The quality assurance report listed four matters for consideration by the Agency's management, namely:

(a) Establishing the independence of the internal audit activity by formalizing a reporting path for the Chief Audit Executive, independent of the UNRWA management;

(b) Improving the partnership between management and the Department of Internal Oversight Services, which will require support and encouragement at the executive and management levels;

(c) Enhancing the charter of the Advisory Committee on Internal Oversight by including language which addresses the responsibility to advise the Commissioner-General on the appointment or removal of the Chief Audit Executive;

(d) Implementing a formal enterprise risk process to ensure that all key agency risks are identified and managed and the Department of Internal Oversight Services focuses its audit programme on key risks.

142. The quality assurance report further listed nine matters for consideration by the Department of Internal Oversight Services, namely:

(a) Expanding the annual audit planning process to develop a comprehensive audit risk universe that encompasses all auditable segments;

- (b) Establishing a consistent standard report format to ensure consistent report quality, and establishing a quality review process;
- (c) Enhancing coverage of information technology (IT) by increasing IT skills;
- (d) Improving/enhancing root cause analysis of audit observations to ensure causes of problems are addressed whenever possible;
- (e) Expanding metrics to improve resource management to ensure resource constraints are better considered, measured and evaluated;
- (f) Improving the practice and perception of objectivity by ensuring each audit approach is in line with the Department's goal of helping the Agency achieve its objectives;
- (g) Expanding continuing professional development to maintain a high-quality, knowledgeable and professional audit staff;
- (h) Including efficiency in audit objectives where appropriate, by considering an evaluation of the effectiveness and efficiency of processes during the audit;
- (i) Improving the partnership between the Department of Internal Oversight Services and management by taking a more consultative and partnering approach.

**143. The Board recommends that UNRWA, in conjunction with the Department of Internal Oversight Services, implement the recommendations of the peer review process.**

#### **14. Internal audit findings**

144. Significant findings of audits performed by the Department of Internal Oversight Services are summarized below.

##### *Appointment of relatives*

145. The Department of Internal Oversight Services noted that some appointments of UNRWA staff relatives were made, in contravention of the rules. The management commented that it was implementing the relevant instruction. However, in some cases, it had no alternative but to resort to employing staff relatives when there were no other candidates available to assume assignments. There were instances where the hiring departments, through oversight, employed such relatives without obtaining prior approval.

##### *Refugee cash distributions*

146. The Department of Internal Oversight Services noted that, although refugees signed to indicate receipt of cash distributions, they did not sign upon receiving commodities distributed in the distribution centres.

147. The Department pointed out that no distributions were made to ineligible refugees. However, it referred to certain instances where closed case files had been destroyed before three years had elapsed. According to the Relief Department manuals, closed case files should be kept for at least three years.

*Inspection of goods on receipt*

148. The Department of Internal Oversight Services noted that UNRWA field offices did not conduct inspections for quantity or quality at the port. The shipments were transferred to the main warehouse, where inspection processes were then performed. According to the UNRWA manual of supply procedures, an inspection should be conducted at the port, in order for the Agency's rights to be reserved with respect to any losses.

*Reconciliation of financial reports*

149. The Department of Internal Oversight Services noted that the field office managements were not able to reconcile their accounting records with their results in the internal financial reports prepared by the headquarters in Gaza. Sound internal control policies and procedures required that headquarters send the financial report to each office before issuing the final version, in order to ensure the accuracy of the figures.

*Tender documents*

150. The Department of Internal Oversight Services noted that tender documents presented by the contractors very often contained arithmetic errors, such as errors in multiplication or addition, and such errors were corrected by unknown person(s). The person(s) who corrected them did not insert the date on which the corrections were made nor did they place their initials against the corrections made.

*Information System Division Technical Instructions*

151. The Department of Internal Oversight Services noted that the Computer Information System at headquarters in Amman had not reviewed and updated the ISD Technical Instructions, especially No. 3, to ensure that they were compatible with the ISD Directives.

*Stock records at central pharmacies*

152. The Department of Internal Oversight Services noted that at the Lebanon field office central pharmacy unauthorized changes had been made with regard to quantities issued.

153. The Board considers that the findings of the Department of Internal Oversight Services highlighted above reflect deficiencies in the areas concerned and the Board underscores the need for UNRWA to address these deficiencies

**15. Programme and project management***Project management policy*

154. At the time of the Board's interim audit, a formal approach, by way of policies, directives or guidelines, to implementing and sustaining project and programme management was not in place for all UNRWA projects.

155. Project plans were established and interim and final reporting carried out only for donor-funded projects. Training to provide special competencies required to manage projects was not in place. Such initiatives would facilitate the consistent use of the project management concept at all field and headquarter offices.

156. UNRWA informed the Board that the operations handbook that was being developed should fill some of the gaps in project policy. With regard to roles and responsibility, most of the responsibility rested with the field office implementing the projects. Training was not always appropriate for project staff, except on the procedures manual, as the theory was that the staff hired for projects would already possess the required skills.

157. The West Bank field office informed the Board that it agreed that the deficiencies highlighted in project management existed, namely the absence of Agency-wide project management policy and strategy, the unclear definition of the roles of key players at both the field and headquarters levels, the absence of mechanisms to collate lessons learned, and an outdated procedures manual which did not reflect up-to-date project management practices.

**158. UNRWA agreed with the Board's recommendation that it adopt a policy covering the management of all projects that, inter alia, set out the responsibilities of all role players, as well as the competencies and training they required.**

159. UNRWA subsequently informed the Board that it had since established the Programme Coordination and Support Unit, whose functions included the streamlining of project and programme management, and that its Management Committee had adopted a medium-term strategy in December 2007 that set out the roles and responsibilities of various Agency entities with regard to project and programme management. Furthermore, a plan to train staff at headquarters and field offices on programme/project cycle management had since been finalized and was under implementation.

160. UNRWA also informed the Board that, since the audit, it had adopted a new monitoring and evaluation policy.

#### *Lessons learned*

161. No system was in place to record all lessons learned in the implementation of projects, including at field offices. Therefore, insofar as non-donor-funded projects were concerned, the knowledge of the project officers was relied upon to take into account some of the lessons learned.

**162. UNRWA agreed with the Board's recommendation that it establish a system to record and apply lessons learned in project implementation.**

163. UNRWA informed the Board that it had since finalized and adopted its monitoring and evaluation policy, which would be used as a basis for addressing the Board's recommendations with regard to project management. Furthermore, that policy provided for responsibility for applying lessons learned across sectors and field locations to be shared between the Programme Coordination and Support Unit, programmes and field offices.

#### *Project procedures manual*

164. The project procedures manual outlines the key steps involved in developing and managing a project within UNRWA. It is aimed at enabling new staff to comprehend quickly the procedures of the Agency, including the roles and responsibilities of the various departments and field offices involved in project

implementation. This manual was last updated in 2003 and requires another update to bring it into line with best practice and international standards.

**165. UNRWA agreed with the Board's reiterated recommendation that it update the project procedures manual, with input from the field offices, and benchmark it against best practice and international standards.**

166. UNRWA informed the Board that the programme cycle management handbook that the Programme Coordination and Support Unit was currently working on would address some of those issues in a broader context for projects, programmes and emergency operations. The updating of the project procedures manual had been deferred until the programme cycle management handbook was completed.

#### *Headquarters support*

167. The Board's discussions with personnel in operations and at field offices indicated that headquarters provided limited support to field offices with regard to project management. That situation was amplified by the lack of an approved project management strategy, implemented agency-wide, that indicated the headquarters support to be given to the field offices.

168. One main input at the headquarters level was to review project reports to ensure that field offices complied with the donor agreements, to advise them that agreements had been signed and to forward copies of the agreements.

**169. UNRWA agreed with the Board's recommendation that it liaise with field offices to implement the project management support required by them.**

170. UNRWA informed the Board that support was now being provided to field offices by the Programme Coordination and Support Unit, which offered guidance and assistance on programming, assessment, monitoring and evaluation issues. Furthermore, additional support was provided by project officers and the newly appointed programme support officers. UNRWA stated that together, all those factors constituted a knowledge network of systematic and strategic support to its field offices.

171. UNRWA informed the Board that it fully accepted all the Board's recommendations relating to project management and that those recommendations were in the process of being implemented across the Agency under the rubric of enhanced programme cycle management and the organizational development process.

## **16. Write-offs and disposals**

172. The Administration informed the Board that, in accordance with financial rule 106.8, accounts receivable of \$6 million had been written off during the biennium 2006-2007. They consisted of outstanding pledges of \$5.8 million and outstanding receivables of \$253,656.

## **17. Ex gratia payments**

173. As required by financial regulation 5.11, the Administration reported ex gratia payments for the period under review amounting to \$2,628, for an accident between an UNRWA bus and a vehicle of the United Nations Interim Force in Lebanon.

## 18. Cases of fraud and presumptive fraud

174. The Administration reported the following cases to the Board.

### *Relief and Social Services Department*

175. On 20 August 2006, a meeting was held to investigate forgery incidents in the cash assistance programme. This was the second meeting held to investigate the subject. In this case, it was discovered that some persons had withdrawn amounts of money from the cash assistance transferred from UNRWA to the Bank of Palestine to be offered to needy families. With the assistance of some staff members, the persons had used documents and stamps that pertained to UNRWA.

176. The Investigation Board met from 20 August 2006 to November 2006, when it submitted its final report. The Investigation Board interviewed a large number of staff members of the Relief Department who were involved in the corruption in the case of the cash assistance or who were aware of those incidents, which violated the Agency's rules and regulations. On the basis of an internal Board of Inquiry report of 13 April 2007, the management has undertaken an overhaul of the emergency cash assistance programme at the Gaza field office and made appropriate management changes.

### *Engineering and Construction Services Department clerk*

177. In mid-July 2007, the UNRWA Area Maintenance Officer in Nuseirat contacted the Gaza Engineering and Construction Services Division, inquiring why he had not received the value of the April 2007 invoices. When asked, the staff member responsible for payment of these maintenance-related invoices admitted delaying the payment (i.e., appropriating the cash which had been entrusted to him). The value of these invoices/cash payments amounted to around \$980 for payments due in April, May and June 2007.

178. The Agency sent a letter to the staff member on 14 August 2007, providing him with an opportunity to respond to the allegation. His response failed to rebut the allegation and he was issued a written censure, combined with suspension without pay for two weeks, from 17 to 30 September 2007.

## C. Acknowledgement

179. The Board of Auditors wishes to express its appreciation for the cooperation and assistance extended to its staff by the Commissioner-General and the Comptroller and members of their staff, as well as by the staff at headquarters in Amman and at the Gaza, West Bank and Amman field offices.

## Chapter III

### Audit opinion

We have audited the accompanying financial statements of the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA), comprising statements numbered 1 to 7 and the supporting notes, for the biennium ended 31 December 2007. These financial statements are the responsibility of the Commissioner-General of UNRWA. Our responsibility is to express an opinion on the financial statements based on our audit.

We conducted our audit in accordance with the International Standards on Auditing. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting policies used and significant estimates made by the Commissioner-General, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for the audit opinion.

In our opinion, the financial statements present fairly, in all material respects, the financial position of UNRWA as at 31 December 2007 and the results of its operations and its cash flows for the period then ended, in accordance with the United Nations system accounting standards.

Furthermore, in our opinion, the transactions of UNRWA that have come to our notice or which we have tested as part of our audit have in all significant respects been in accordance with the Financial Regulations of UNRWA and legislative authority.

In accordance with article VII of the Financial Regulations and Rules of the United Nations, we have also issued a long-form report on our audit of the UNRWA.

**Philippe Séguin**

First President of the Court of Accounts of France  
Chairman of the United Nations Board of Auditors

**Terence Nombembe**

Auditor-General of the Republic of South Africa  
(Lead auditor)

**Reynaldo A. Villar**

Chairman, Philippine Commission on Audit

30 June 2008

## Chapter IV

### Certification of the financial statements

Pursuant to financial regulations 11.4 and 12.1 of the United Nations Relief and Works Agency for Palestine Refugees in the Near East, I have the honour to submit the consolidated financial statements for the Agency (including the Microfinance and Microenterprise Department) for the biennium ended 31 December 2007.

I certify that all transactions have been properly recorded in the accounting records and properly reflected in the Agency's financial accounts and appended statements, which I hereby certify as accurate and representative of the Agency's operating activities and the financial state of affairs as at 31 December 2007.

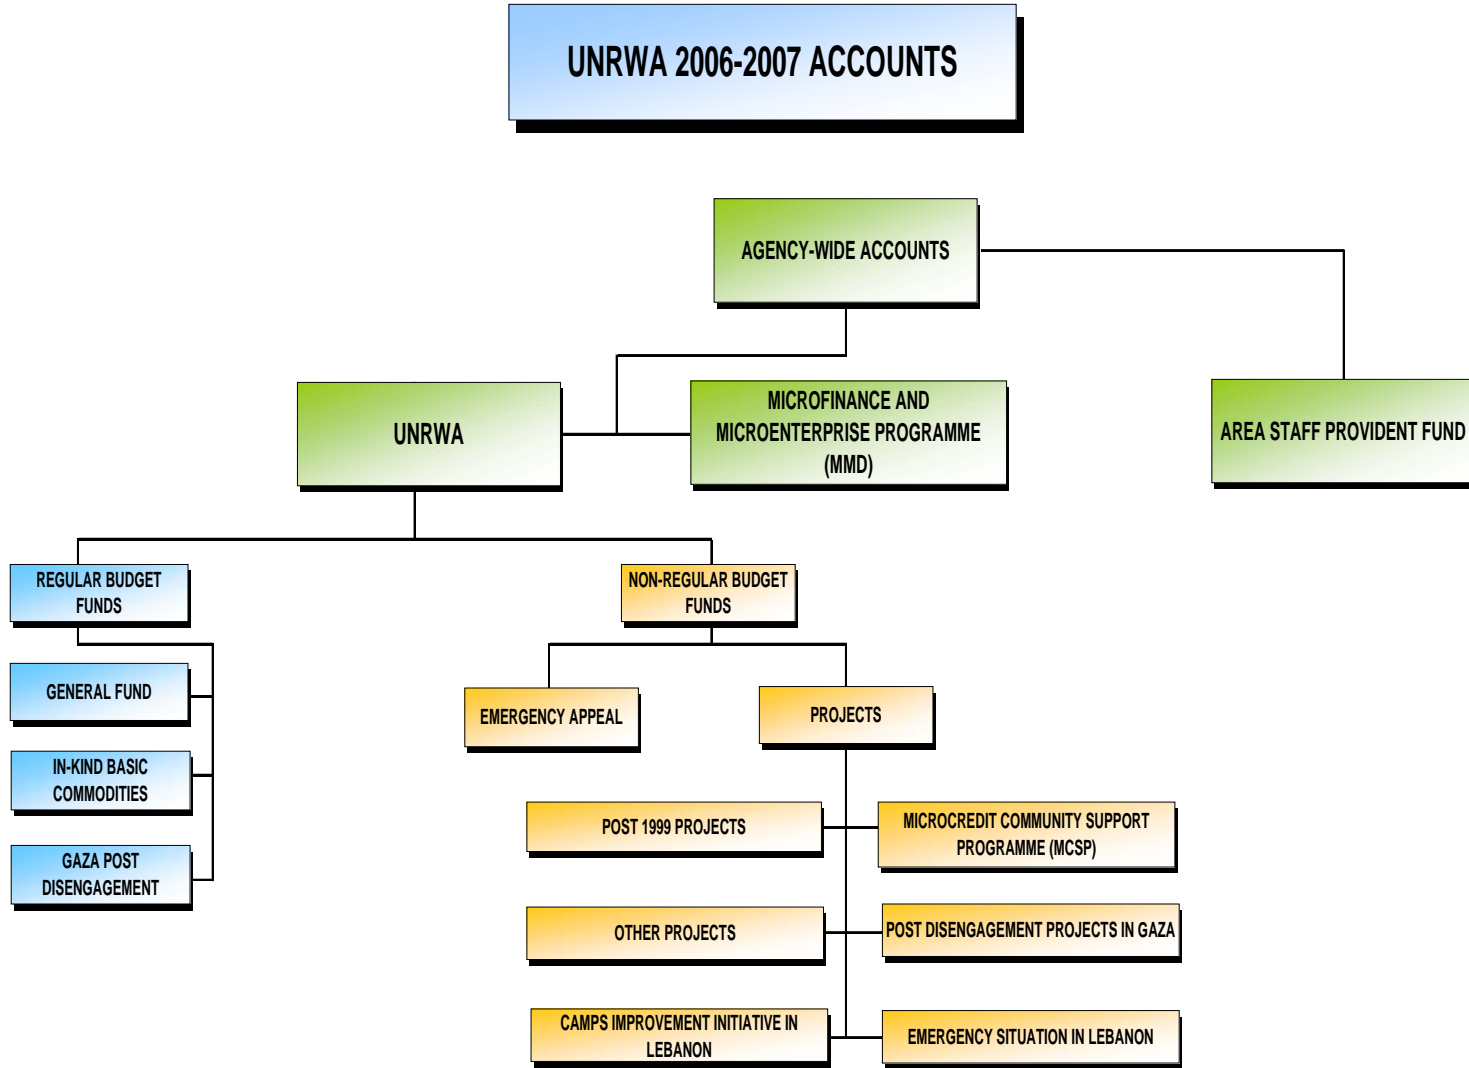

(Signed) Ramadan **Al Omari**  
Comptroller

27 March 2008

## **Chapter V**

### **Financial statements for the biennium ended 31 December 2007**

- A. Financial statements of the United Nations Relief and Works  
Agency for Palestine Refugees in the Near East for the biennium  
ended 31 December 2007**

## Notes to the financial statements

### Mission statement

The mission of the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA) is to provide education, health, relief and social services, as well as access to microcredit, microfinance and microenterprise opportunities for Palestine refugees living in Jordan, Lebanon, the Syrian Arab Republic, the West Bank and the Gaza Strip. The primary beneficiaries of UNRWA services are Palestine refugees, particularly the most vulnerable groups, including children, women, the aged and the disabled, although certain non-refugees are provided services under exceptional circumstances, as mandated by the General Assembly.

### Note 1

#### Summary of significant accounting policies

##### (a) Basis of presentation

1.1 The financial statements are prepared in accordance with the United Nations system accounting standards and the Financial Regulations of the Agency.

##### (b) Accounting conventions

1.2 The financial statements are prepared under the historical cost convention.

1.3 In accordance with the Agency's financial regulation 10.2, the accounts of the Agency are maintained on the accrual basis of accounting, except for items in note 2. The fundamental accounting concepts of going concern, matching and consistency are followed in the presentation of the financial statements.

1.4 The Agency operates a system of fund accounting. This means it maintains separate accounts for the regular budget and the non-regular budget funds. The Agency's system of fund accounting provides a full identification of income and expenditure by purpose and the complete separation of the assets and liabilities of each fund. The financial statements are presented in a columnar manner by fund. Contributions or allocations to funds other than the regular budget are assigned individual project codes, which are maintained as distinct financial and accounting entities.

1.5 The Agency's financial period consists of two consecutive calendar years, as provided for in financial regulation 2.1. An interim closure of accounts is carried out at the end of the first year and a final closure at the end of the second year.

1.6 Owing to the nature of their operations, the financial statements of the Area Staff Provident Fund and those of the microfinance and microenterprise programme are prepared on an annual basis and are presented separately.

##### (c) Change in accounting policy

1.7 The United Nations system accounting standards (paras. 49 (v) and 51) require that the value of land and buildings be disclosed as an asset and the method of valuation stated, and that costs incurred during construction or major long-term acquisitions be accumulated and disclosed in a separate account. The Agency has in the past deemed it fit to depart from this requirement, in accordance with

paragraph 3 of the United Nations system accounting standards, which states that where individual organizations find it necessary to depart from the practice set out in the standards, they should disclose the reasons for doing so in the statement of significant accounting policies included in their financial statements.

1.8 During the current biennium, however, the Agency changed its accounting policy with regard to the treatment of expenditure incurred on land and buildings.

1.9 As a result of this change in accounting policy, all land and buildings acquired after 1 January 2002 whose value has been reliably documented were capitalized and shown on the face of the balance sheet. The capitalization threshold has been set at \$2,000. The historical cost of buildings, which had been expensed prior to 31 December 2001, amounted to \$276,128,571. These costs were authorized against the Agency's budget and financed out of contributions from various donors. This value may change in future as a result of the revaluation exercise planned to be carried out in the course of the biennium 2008-2009 in preparation for the adoption of IPSAS in 2010.

1.10 Buildings will be depreciated over their useful economic lives on a straight line basis at the rate of 4 per cent, with the exception of prefabricated buildings of a temporary nature, which are deemed to have a shorter lifespan and are therefore depreciated at 10 per cent on a straight line basis. No depreciation will be charged on land. On acquisition (or completion of construction) of buildings, the first-year depreciation charge will be prorated to take into account the actual time in the year that capitalization occurred. All costs incurred on the construction and rehabilitation of refugee shelters will be charged to expenditure in the year in which they are incurred. See note 8 below for a detailed computation of the recognition of land and buildings on the face of the Agency's financial statements. Costs for other items of property, plant and equipment will continue to be charged to expenditure as and when they are incurred, in accordance with the current practice.

**(d) Regular budget results for the biennium**

1.11 During the biennium ended 31 December 2007, the Agency reported a net excess of income over expenditure of \$2,368,536 in its cash regular budget fund, before adjustments. During the biennium, a net adjustment of \$16,157,628 was made in respect of a change in accounting policies for termination liabilities, a change in accounting estimates and a change in accounting estimates — contributions. This resulted in a net deficit (net result for the year) of income over expenditure for the biennium for the mainstream General Fund of \$15,201,526.

**(e) Currency translation**

1.12 The accounts of the Agency are maintained in United States dollars. Transactions in other currencies are translated to United States dollars using the United Nations operational rates of exchange prevailing at the time of the transaction. Gains or losses on the conversion of currencies between the market rates (the currency market spot rates at which the trades are executed) and United Nations operational rates of exchange are treated as additions to or reductions from income. At the end of a financial period, assets and liabilities in other currencies are translated to United States dollars at the rates of exchange applicable on 1 January of the following year.

**(f) Management of currency risks**

1.13 The primary principle of UNRWA risk management is the preservation of the value of its resources in United States dollar terms. UNRWA currency risk can be identified mainly as a potential loss in the value of non-received non-dollar contributions and non-dollar cash assets as a result of a strengthening United States dollar. The risk arises from the date the contributions are pledged. In order to protect its assets and cash flow against adverse currency movements, UNRWA adopts a conservative risk management approach to minimize its exposure to exchange rate fluctuations. Generally, UNRWA will conduct its foreign exchange transactions on the spot market. However, derivative instruments, such as forward contracts and the purchase of options, may be used to reduce foreign exchange risk on current and certain future obligations, assets and liabilities denominated in other currencies. Hedging transactions may be written for periods of up to one year and only for the purpose of minimizing the risk of currency fluctuations, not for trading or speculative purposes. Foreign exchange gains and losses against multi-currency holdings are booked in the regular budget only. Contributions received against non-regular budget projects are credited with the corresponding United States dollar value based on the United Nations currency exchange rates on the date of actual receipt of a contribution and therefore are not exposed to exchange gains and losses (see note 7.1).

**(g) Income recognition**

1.14 Cash contributions are recorded as income on the basis of confirmed donor pledges received during the current financial period. At the end of the financial period, outstanding confirmed pledges for both the regular and the non-regular budget are accrued as income. Pledges in respect of in-kind donations are also accrued.

1.15 Contributions in kind are recorded as income (using the donor's valuation) when they are received by the Agency, as provided for in financial regulation 10.7, except for contributions received in cash for food commodities.

1.16 Contributions received from donors in respect of a future financial period are treated as income received in advance and are recognized as liabilities in the balance sheet.

1.17 Interest income on bank deposits and micro-loans, income derived from the sale of used vehicles and equipment, shares of profits on insurance policies, income from production units and other sundry income are treated as miscellaneous income.

**(h) Expenditure**

1.18 Expenditure reported in the Agency's financial statements includes disbursements, un-liquidated obligations (in respect of the procurement of goods and services that have not yet been received as at the end of the financial period) and budget carry forwards (in respect of amounts that are charged to the current biennium's expenditure against justifications that are received against the approved budget) for regular and non-regular budget funds, except expenditure incurred on fixed assets, land and buildings, which is capitalized and depreciated (see paras. 1.9 and 1.10 above).

**Note 2****Staff end-of-service and termination benefits**

2.1 *Area staff leave encashment.* An amount of \$22,061,616 has been accrued and shown on the face of the balance sheet in respect of provisions for the Agency's area staff leave encashment liability. This leave encashment has been estimated on the basis of staff leave balances available in the Agency's Human Resources Management system (leave module). The calculations are based on two categories of staff, teaching and non-teaching staff.

2.2 *Area staff termination liability.* Separation costs for international staff are borne by the United Nations Secretariat and no provision for these costs is made in the Agency's financial statements. Actual separation costs for area staff are charged to the financial period in which they are incurred and no prior provision is made for them. In the event of the Agency ceasing operations, the accumulated termination benefits for area staff as at 31 December 2007 is estimated at \$206.9 million (\$168.07 million as at 31 December 2005) based on current costs, rules and regulations. During the biennium 2006-2007, a provision of \$29 million was made in the budget to meet the Agency's obligations towards end-of-service benefits for area staff expected to retire during the period. The increase of \$38.23 million in end-of-service liabilities over the biennium is due to the net difference between:

- (a) Increases caused by salary increases Agency-wide, annual increments and the migration of staff members to higher benefit brackets;
- (b) Savings resulting from continuing retirement of staff members, the non-availability of end-of-service benefits to newly recruited area staff members, etc.;
- (c) The increase in the number of categories of staff included in the computation of the end-of-service benefits.

The criteria for the computation of end-of-service benefits are as follows:

- (a) There are three groups/categories of staff concerned:
  - Group 1: with less than 10 years of service or aged under 46;
  - Group 2: with 10 or more years of service and aged between 46 and 55;
  - Group 3: staff taking early voluntary retirement, which is applicable for persons:
    - (i) Older than 55 with three years of service or more;
    - (ii) With more than 25 years of service;
    - (iii) Older than 50 with 10 years of service or more.
- (b) The indemnity for each group is as follows:

**Group 1 (less than 10 years of service or aged under 46)**

<i>Years of qualifying service</i>	<i>Months of base salary</i>
0	0
1	1
2	1
3	2
4	3
5	4
6	5
7	6
8	7
9 or more	8

This can be translated into the following statement:

If total service = 1 --> 1 \* base salary

If total service between 1.01 and 8.99 --> (total service - 1) \* base salary

If total service >= 9 --> 8 \* base salary

**Group 2 (10 or more years of service and aged between 46 and 55)**

<i>Age</i>	<i>Months of base salary</i>
46	8.25
47	8.5
48	8.75
49	9
50	9.25
51	9.5
52	9.75
53	10
54	10.25
55	10.5

The above can be translated into the following:

If age = 46 --> 8.25 \* base salary

If age = 47 --> 8.50 \* base salary

If age = 48 --> 8.75 \* base salary

If age = 49 --> 9.00 \* base salary

If age = 50 --> 9.25 \* base salary

If age = 51 --> 9.50 \* base salary

If age = 52 --> 9.75 \* base salary

If age = 53 --> 10.00 \* base salary

If age = 54 --> 10.25 \* base salary

If age = 55 --> 10.50 \* base salary

**Group 3: staff taking early voluntary retirement, which is applicable for persons:**

- (i) Older than 55 with three years of service or more;
- (ii) With more than 25 years of service;
- (iii) Older than 50 with 10 years of service or more

0.085 \* total years in service \* annual base salary

2.3 *International staff end-of-service liability.* The estimated leave pay encashment entitlement for the total leave days accrued by international staff and the estimated provision for repatriation grant payments as at 31 December 2007 amounted to \$3,216,596, broken down as follows:

Provision for repatriation grant payments: \$1,839,002

Leave pay encashment: \$1,377,594

**Note 3****United Nations Joint Staff Pension Fund**

UNRWA is a member organization participating in the United Nations Joint Staff Pension Fund, which was established by the General Assembly to provide retirement, death, disability and related benefits. The Pension Fund is a funded defined benefit plan. It is mandatory for internationally recruited UNRWA staff members to join the Pension Fund. The financial obligation of UNRWA to the Pension Fund consists of its mandated contribution at the rate established by the General Assembly, together with its share of any actuarial deficiency payments which might become payable pursuant to article 26 of the Regulations of the Fund. Such deficiency payments are only payable if and when the General Assembly has invoked the provision of article 26, following determination that there is a requirement for deficiency payments based on an assessment of the actuarial sufficiency of the Fund as of the valuation date. At the time of preparation of the present report the General Assembly has not invoked this provision. The Agency's liability towards the Pension Fund has been fully met as at 31 December 2007.

**Note 4****United Nations Relief and Works Agency for Palestine Refugees in the Near East Area Staff Provident Fund**

4.1 The UNRWA Area Staff Provident Fund, established under article XIII of the Agency's Financial Regulations, is a retirement benefit plan which applies to all area staff members after six months of service. It is a defined contribution plan. The mandatory staff contribution is 7.5 per cent and the Agency contributes 15 per cent of basic salary. Staff can also contribute up to 50 per cent of their basic salaries in additional voluntary contributions.

4.2 Amounts due to (from) the Area Staff Provident Fund are as follows, in United States dollars:

<i>Balance as at 31 December 2005</i>	<i>Details</i>	<i>Balance as at December 2007</i>
<b>3 150 069</b>	<b>Opening balance 01.01.2006</b>	<b>(1 132 139)</b>
52 006 417	Mandatory employee contributions	60 134 845
55 081 655	Agency contribution	66 451 658
1 093 141	Voluntary employee contributions	1 176 903
(21 646 322)	Employee loans	(23 845 052)
216 411	Commission on loans	238 451

**Note 10****Cash on hand and in banks**

10.1 The cash on hand and in bank balance of \$212,046,146 includes Microfinance and Microenterprise Department bank balances. Cash balances relating to the emergency appeal and projects amounting to \$124,132,650 are earmarked for activities relating to the fund groups in the current biennium and \$83,070,206 was earmarked for the biennium ended 31 December 2005.

10.2 The cash balances of \$212,046,146 at the end of the biennium were held in the currencies shown below. Currency values have been converted at the United Nations operational rate of exchange as at 1 January 2008.

<i>Closing balance 2005 All funds</i>							<i>Closing balance 2007 All funds</i>

**Note 11****Donor contributions receivable**

11.1 Contributions receivable represent confirmed pledges outstanding from donors for 2006-2007 for both regular budget and non-regular budget activities as at 31 December 2007.

11.2 The total contributions receivable reported in statement 2 at the end of the biennium was \$86,496,056, comprising regular budget contributions of \$22,966,207 and non-regular budget contributions of \$63,529,849 against 2006-2007 outstanding contributions, in addition to Microfinance and Microenterprise Department contributions receivable of \$473,841.

11.3 The following is a breakdown of contributions receivable balances by donor category at the end of the biennium. These balances have been accrued as income in 2006-2007. More details are shown in appendix 4.

2004-2005 (US\$)			2006-2007 (US\$)	
Regular budget	Non-regular budget	Details	Regular budget	Non-regular budget
13 453 988	32 014 819	Due from Governments	10 976 876	17 652 391
9 485 613	8 165 525	Due from intergovernmental organizations	11 628 280	27 860 528
123 814	22 500	Due from United Nations organizations	118 000	241 198
2 177	1 418 527	Due from non-governmental organizations	176 350	17 746 681
—	8 000	Other donors	66 700	28 872
<b>23 065 592</b>	<b>41 629 371</b>	<b>Contributions receivable</b>	<b>22 966 207</b>	<b>63 529 850</b>
943 396		Microfinance and Microenterprise Department contributions receivable	473 841	
<b>65 638 359</b>		<b>Total</b>	<b>86 969 897</b>	

11.4 The following are the outstanding contributions receivable by donor category:

Donor	Total	Old outstanding pledges prior to 2006-2007 not accrued <sup>a</sup> (US\$)	Outstanding pledges accrued in 2006-2007 (US\$)
Governments	55 263 279	26 634 012	28 629 267
Intergovernmental organizations	51 673 109	12 184 302	39 488 807
United Nations organizations	359 198	—	359 198
Non-governmental organizations	18 042 694	119 483	17 923 211
Sundry	95 572	—	95 572
<b>Subtotal</b>	<b>125 433 852</b>	<b>38 937 797</b>	<b>86 496 055</b>
Microfinance and Microenterprise Department outstanding pledges	6 644 380	6 170 539	473 841
<b>Total</b>	<b>132 078 233</b>	<b>45 108 336</b>	<b>86 969 897</b>

<sup>a</sup> Outstanding pledges prior to 2006-2007 of \$45,108,336 represent old outstanding pledges that have not been accrued in the current biennium.

<b>32 499 581</b>		<b>Accounts receivable net of provisions</b>	<b>44 163 525</b>	

12.2 The amount of \$815,016 represents funds due from the Microfinance and Microenterprise Department as a result of operational payments that UNRWA makes on its behalf; such funds are settled on a monthly basis.

### Note 13

#### Inventory

The Agency has three self-supporting production units, the Embroidery Centre, the Carpentry Unit and the Contracting Section, all of which are located in Gaza. These units are governed by separate instructions for effective management control and performance assessment. Therefore, as an exception to the Agency's accounting policies, inventory of these production units is reported at cost, under assets in the financial statements.

<i>Closing balance 2005</i> <i>(United States dollars)</i>	<i>Details</i>	<i>Closing balance 2007</i> <i>(United States dollars)</i>
356 723	Raw materials inventory — Carpentry Unit	—
61 182	Raw materials inventory — Embroidery Centre	52 729
<b>417 905</b>	<b>Raw materials inventory subtotal</b>	<b>52 729</b>
21 959	Work in progress — Carpentry Unit	—
1 920	Work in progress — Embroidery Centre	2 203
<b>23 879</b>	<b>Work in progress subtotal</b>	<b>2 203</b>
100 324	Finished goods — Carpentry Unit	—

<b>187 103</b>	<b>Finished goods subtotal</b>	<b>73 021</b>
<b>628 887</b>	<b>Total production units inventory</b>	<b>127 953</b>

**Note 14**  
**Accounts payable**

14.1 The accounts payable comprise:

<i>Closing balance 2005 (US\$)</i>			<i>Closing balance 2007 (US\$)</i>	
<i>Regular budget</i>	<i>Non-regular budget</i>	<i>Details</i>	<i>Regular budget</i>	<i>Non-regular budget</i>
16 165 356	1 898 244	Supplier accounts payable	14 010 881	4 212 579
561 242		Deposits received	560 225	—
497 217		Ministry of Education — Jordan (textbooks)	—	—
633 000		West Bank water supply (Palestinian Authority)	770 800	—
13 473		Unpaid cheques	309 344	—
974 296		Area staff group medical insurance	323 052	—
127 296		Unpaid salaries, wages and other expenses	159 851	—
175 070		Other salary-related payables	2 615 190	—
2 375 000		Dues to OPEC Palestine Trust Fund	2 375 000	—
1 304 876		Funds held for other entities	860 157	2 860
1 974 739		Interest due to projects	2 853 971	—
76 365		VAT refunds from the Palestinian Authority due to projects	32 844	—
—		Miscellaneous accounts payable	201 488	9
<b>24 877 930</b>	<b>1 898 244</b>	<b>Accounts payable</b>	<b>25 072 802</b>	<b>4 215 448</b>
46 612		Microfinance and Microenterprise Department accounts payable	2 616 812	
<b>26 822 786</b>		<b>Total accounts payable</b>	<b>31 905 062</b>	

14.2 The supplier accounts payable age analysis is as follows, in United States dollars:

<i>1-30 days</i>	<i>31-60 days</i>	<i>61-90 days</i>	<i>Over 90 days</i>	<i>Total</i>
15 656 507	308 039	146 162	2 112 752	<b>18 223 460</b>

14.3 Included in the supplier accounts payable is the amount of \$11.2 million already paid to suppliers and reported under the title “Prepaid expenses and advances to suppliers” shown on the assets side of the balance sheet. This accounting treatment, whereby the asset and liability accounts referred to above are offset against each other once the supplies are received in the Agency’s warehouse, was necessary to enable goods in transit to be tracked.

**Note 15**  
**Reserve for unliquidated budget commitments**

<i>Closing balance 2005 (United States dollars)</i>			<i>Closing balance 2007 (United States dollars)</i>	
<i>Regular budget</i>	<i>Non-regular budget</i>	<i>Details</i>	<i>Regular budget</i>	<i>Non-regular budget</i>
25 398 587	9 152 848	Unliquidated budget obligations	15 893 759	100 098 753
5 251 621	6 590 469	Goods in transit purchase orders	1 915 727	—
6 050 843	—	Provision for carrying forward	12 126 870	—
<b>36 701 051</b>	<b>15 743 317</b>	<b>Total reserve for commitments</b>	<b>29 936 356</b>	<b>100 098 753</b>

15.1 The provisions for unliquidated budget commitments are in respect of procurement of goods and services that have not yet been received as at the end of the financial period.

15.2 The provision for carrying forward, amounting to \$12,126,870, is in respect of amounts that are charged to current biennium expenditure against justifications that are received against the approved budget. The amount of \$100,098,753 is in respect of building construction and procurement of minor equipment. These are hard commitments or obligations that are carried forward to the next biennium budget and are broken down as follows:

<i>United States dollars</i>	
Building construction	68 342 604
Minor equipment	3 865 321
Staff costs	4 677 888
Procurement of supplies	17 648 696
Other	5 564 244
<b>Total</b>	<b>100 098 753</b>

**Note 16**  
**Prior-year adjustments**

16.1 As shown in statement 5, prior-year adjustments represent adjustments made either to working capital and reserves accounts brought forward or to current-year surplus or shortfall of income over expenditure amounts, depending on the category of adjustments. Prior-year adjustments are divided into three distinct categories:

- (i) Prior-year adjustments due to a change in accounting policies;
- (ii) Prior-year adjustments due to a change in accounting estimates;
- (iii) Prior-year adjustments due to the correction of fundamental errors.

The net amount in respect of prior-year adjustments for the biennium ended 31 December 2007 is \$21,309,147, broken down as follows:

<i>2004-2005 amount (US\$)</i>	<i>Category</i>	<i>2006-2007 amount (US\$)</i>
—	Due to a change in accounting policies	21 804 571
(20 012 118)	Due to a change in accounting estimates	25 536 647
	Due to a change in contribution estimates	(23 877 702)
75 679	Due to a change in accounting estimates, Microfinance and Microenterprise Department	(1 163 520)
<b>19 936 439</b>	<b>Total</b>	<b>21 309 147</b>

16.2 Reclassifications between funds are:

- (a) Closed-project balances transferred from one fund group to another;
- (b) Regrouping of funds between budget funds.

<i>Biennium 2004-2005 (US\$)</i>		<i>Biennium 2006-2007 (US\$)</i>	
<i>Regular budget</i>	<i>Non-regular budget</i>	<i>Regular budget</i>	<i>Non-regular budget</i>
429 764	2 992 025	138 977	(138 977)

## Note 17

### Commitments and contingent liabilities

17.1 The Agency's contingent liabilities as at 31 December 2007, as evaluated by the Legal Department, fall broadly into two categories, namely, those in connection with personnel matters in respect of significant claims, litigation or arbitration and those associated with contractual matters. Contractual matters relate mostly to claims pertaining to procurement/purchase orders and claims from landlords from whom the Agency rents buildings.

17.2 A number of appeals by personnel that could involve the payment of back wages and entitlements are pending consideration by the respective appeals boards of the international and area staff as well as by the United Nations Administrative Tribunal. The contingent liabilities relating to those appeals amount to approximately \$981,145 as at 31 December 2007 (2004-2005: \$1,329,928.50).

17.3 The contingent liabilities for commercial contracts are approximately \$8,119,922.05 as at 31 December 2007 (2004-2005: \$10,477,674.30).

**Note 18****Microfinance and Microenterprise Department**

18.1 Financial statements 1 to 5 include aggregate figures for the Microfinance and Microenterprise Department. The income, expenditure, prior-year adjustments and net result of the Microfinance and Microenterprise Department are presented as follows:

<i>2004-2005 (US\$)</i>	<i>Description</i>	<i>2006-2007 (US\$)</i>
<b>Income</b>		
3 915 334	Interest on loans	4 970 213
