3. *Notes* the implementation of the outcomes of the World Summit at the regional level facilitated by the regional commissions, as observed in the report of the Secretary-General on progress made in the implementation of and follow-up to the outcomes of the World Summit at the regional and international levels, including the steps taken in this respect, and emphasizes the need to continue to address issues of specific interest to each region, focusing on the challenges and obstacles that each may be facing with regard to the implementation of all goals and principles established by the World Summit, with particular attention to information and communications technology for development;

4. *Reiterates* the importance of maintaining a process of coordinating the multi-stakeholder implementation of the outcomes of the World Summit through effective tools, with the goal of exchanging information among action line facilitators, identifying issues that need improvement and discussing the modalities of reporting the overall implementation process, encourages all stakeholders to continue to contribute information to the stocktaking database on the implementation of the goals established by the World Summit, maintained by the International Telecommunication Union and invites United Nations entities to update information on their initiatives in the stocktaking database;

5. *Highlights* the urgent need for the incorporation of the recommendations of the outcome documents of the World Summit in the revised guidelines for United Nations country teams on preparing the common country assessments and United Nations Development Assistance Frameworks, including the addition of an information and communications technology for development component;

6. *Notes* the holding in Geneva from 16 to 20 May 2011 of the World Summit on the Information Society Forum 2011, organized by the International Telecommunication Union, the United Nations Educational, Scientific and Cultural Organization, the United Nations Conference on Trade and Development and the United Nations Development Programme as a multi-stakeholder platform for the implementation of the outcomes of the World Summit and to facilitate the implementation of the World Summit action lines;

7. *Calls upon* all States, in building the information society, to take steps to avoid and to refrain from taking any unilateral measure not in accordance with international law and the Charter of the United Nations that impedes the full achievement of economic and social development by the population of the affected countries and that hinders their well-being;

8. *Welcomes* the progress highlighted in the report of the Secretary-General regarding the implementation of and follow-up to the outcomes of the World Summit, in particular the fact that the rapid growth in mobile telephony since 2005 has meant that more than half of the world's inhabitants will have access to information and communications technologies within their reach, in line with one of the World Summit targets; the value of this progress is enhanced by the advent of new services and applications, including m-health, m-transactions, e-government,

e-business and developmental services, which offer great potential to the development of the information society;

9. *Notes with great concern* that many developing countries lack affordable access to information and communications technologies and that for the majority of the poor, the promise of science and technology, including information and communications technologies, remains unfulfilled, and emphasizes the need to effectively harness technology, including information and communications technologies, to bridge the digital divide;

10. *Recognizes* that information and communications technologies present new opportunities and challenges and that there is a pressing need to address the major impediments that developing countries face in accessing the new technologies, such as lack of resources, infrastructure, education, capacity, investment and connectivity and issues related to technology ownership, standards and flows, and in this regard calls upon all stakeholders to provide adequate resources, enhanced capacity-building and transfer of technology to developing countries, particularly the least developed countries;

11. *Also recognizes* the rapid growth in broadband access networks, especially in developed countries, and notes with concern that there is a growing digital divide in the availability, affordability, quality of access and use of broadband networks between high-income countries and other regions, with least developed countries and Africa as a continent lagging behind the rest of the world;

12. *Further recognizes* that the transition to a mobile-led communications environment is leading to significant changes in operators' business models and that it requires significant rethinking of the ways in which individuals and communities make use of networks and devices, of Government strategies and of ways in which communications networks can be used to achieve development objectives;

13. *Recognizes* that, even with all the developments and the improvement observed in some respects, in numerous developing countries information and communications technologies and their applications are still not affordable for the majority of people, particularly those living in rural areas;

14. *Also recognizes* that the number of Internet users is growing and that in some instances the digital divide is also changing in character from one based on whether access is available to one based on the quality of access, information and skills that users can obtain, and the value they can derive from it, and recognizes in this regard that there is a need to prioritize the use of information and communications technologies through innovative approaches, including multi-stakeholder approaches, within national and regional development strategies;

15. *Welcomes* the report of the Broadband Commission for Digital Development, submitted to the Secretary-General of the United Nations in New York on 19 September 2010, and notes that the report includes the Declaration of Broadband Inclusion for All of the Commission;

16. *Notes* that, while a solid foundation for capacity-building in information and communications technology has been laid in many areas with regard to building the information society, there is still a need for continuing efforts to address the ongoing challenges, especially those faced by developing countries and the least developed countries, and draws attention to the positive impact of broadened capacity development that involves institutions, organizations and entities dealing with information and communications technologies and Internet governance issues;

17. *Recognizes* the need to focus on capacity development policies and sustainable support to further enhance the impact of activities and initiatives at the national and local levels aimed at providing advice, services and support with a view to building a people-centred, inclusive and development-oriented information society;

18. *Notes* that topics that were not central at the first and second phases of the World Summit continue to emerge, such as the potential of information and communications technologies to combat climate change, social networking, virtualization and cloud computing, the protection of online privacy and the empowerment and protection, especially against cyberexploitation and abuse, of vulnerable groups of society, in particular children and young people;

19. *Reiterates* the importance of information and communications technology indicators as a monitoring and evaluation tool for measuring the digital divide between countries and within societies and in informing decision makers when formulating policies and strategies for social, cultural and economic development, and emphasizes that the standardization and harmonization of reliable and regularly updated information and communications technology indicators that capture the performance, efficiency, affordability and quality of goods and services is essential for implementing information and communications technology policies;

Internet governance

20. *Reaffirms* paragraph 21 of its resolution 2010/2 of 19 July 2010 and paragraph 16 of General Assembly resolution 65/141 of 20 December 2010;

21. *Reaffirms also* paragraphs 35 to 37 and paragraphs 67 to 72 of the Tunis Agenda for the Information Society;⁵⁴

Enhanced cooperation

22. *Recalls* its resolution 2010/2, in which it invited the Secretary-General of the United Nations to convene open and inclusive consultations involving all Member States and all other stakeholders with a view to assisting the process towards enhanced cooperation, in order to enable Governments on an equal footing to carry out their roles and responsibilities in respect of international public policy issues pertaining to the Internet but not in respect of the day-to-day technical and operational matters that do not impact upon those issues, through a balanced participation of all stakeholders in their respective roles and responsibilities, as stated in paragraph 35 of the Tunis Agenda;

23. *Notes with appreciation* the open and inclusive consultations convened by the Secretary-General, through the Department of Economic and Social Affairs of the Secretariat, from September to December 2010, including the meeting held in New York on 14 December 2010;

24. *Decides* to forward the report of the Secretary-General on enhanced cooperation on public policy issues pertaining to the Internet⁵⁵ regarding the outcome of these consultations to the General Assembly for consideration at its sixty-sixth session in order to enable Governments on an equal footing to carry out

their roles and responsibilities in respect of international public policy issues pertaining to the Internet but not in respect of the day-to-day technical and operational matters that do not impact upon those issues;

Internet Governance Forum

25. *Recalls* General Assembly resolution 65/141 on information and communications technologies for development, in which it extended the mandate of the Internet Governance Forum for a further five years, while recognizing the need for improvements;

26. *Takes note with appreciation* of the report on the outcomes of the Working Group on Improvements to the Internet Governance Forum,⁵⁶ and expresses its gratitude to all the members of the Working Group for their time and valuable efforts in this endeavour, as well as to all Member States and other relevant stakeholders that have submitted inputs to the Working Group consultation process;

27. *Notes* that the wealth of information and the complexity and political sensitivity of the subject as well as a divergence of views among members of the Working Group on a number of concrete proposals did not, within the short time frame that it had, allow the Working Group to finalize a set of recommendations, as appropriate, on improving the Forum;

28. *Agrees* to extend the mandate of the Working Group on Improvements to the Internet Governance Forum until the fifteenth session of the Commission on Science and Technology for Development, and invites it to complete its task on the basis of the work already accomplished;

29. *Urges* that the Working Group be reconvened at the earliest possible time to enable timely submission of its recommendations to the Commission at its fifteenth session, which shall constitute an input from the Commission to the General Assembly, through the Economic and Social Council;

The road ahead

30. *Urges* the United Nations entities still not actively cooperating in the implementation of and follow-up to the outcomes of the World Summit through the United Nations system to take the necessary steps and commit to a people-centred, inclusive and development-oriented information society and to catalyse the attainment of the internationally agreed development goals, including those contained in the United Nations Millennium Declaration;⁵⁷

31. *Calls upon* all stakeholders to keep the goal of bridging the digital divide, in its different forms, an area of priority concern, put into effect sound strategies that contribute to the development of e-government and continue to focus on pro-poor information and communications technology policies and applications, including with regard to broadband access at the grass-roots level, with a view to narrowing the digital divide between and within countries;

32. *Urges* all stakeholders to prioritize the development of innovative approaches that will stimulate the provision of universal access to affordable

34. *Urges* all countries to make concrete efforts to fulfil their commitments under the Monterrey Consensus of the International Conference on Financing for Development;⁵⁸

35. *Calls upon* United Nations organizations and other relevant organizations and forums, in accordance with the outcomes of the World Summit, to periodically review and modify the methodologies for information and communications technology indicators, taking into account different levels of development and national circumstances, and therefore:

(a) Endorses the work of the Partnership on Measuring Information and Communication Technologies for Development;

while acknowledging with appreciation the financial support provided by the Governments of Finland and Switzerland to this fund;

37. *Requests* the Secretary-General to submit to the Commission, on a yearly basis, a report on the implementation of the recommendations contained in Economic and Social Council resolutions on the assessment of the quantitative and qualitative progress made in the implementation of and follow-up to the outcomes of the World Summit;

development-oriented policies for a socio-economically inclusive information society, including policies relating to access, infrastructure, and an enabling environment,

Welcoming the work of the Commission on its two current priority themes, “Technologies to address challenges in areas such as agriculture and water” and “Measuring the impact of information and communications technology for development”,

Recognizing the important role that information and communications technologies play in promoting innovation in science and technology for development,

Recognizing also the importance of science, technology and innovation policy reviews in assisting developing countries to strengthen their national development plans and improve their innovation systems,

Recalling the agreed conclusions of the Commission on the Status of Women on access and participation of women and girls in education, training and science and technology, including for the promotion of women’s equal access to full employment and decent work,⁶⁰ adopted at its fifty-fifth session, in which it inter alia, highlighted the need for the sharing of good practice examples in mainstreaming a gender perspective into science, technology and innovation policies and programmes, with a view to replicating and scaling up successes, and recalling further the call of the Commission on the Status of Women upon the Commission on Science and Technology for Development for concrete steps in this respect,

Taking note of the report of the intersessional panel meeting of the Commission on Science and Technology for Development, held in Geneva in December 2010 and of the report prepared by the secretariat of the United Nations Conference on Trade and Development,⁶¹

Work of the Committee of Experts on the Transport of Dangerous Goods and on the Globally Harmonized System of Classification and Labelling of Chemicals

The Economic and Social Council,

Recalling its resolutions 1999/65 of 26 October 1999 and 2009/19 of 29 July 2009,

Having considered the report of the Secretary-General on the work of the Committee of Experts on the Transport of Dangerous Goods and on the Globally Harmonized System of Classification and Labelling of Chemicals during the biennium 2009–2010,⁹²

⁹² E/2011/91.

A. Work of the Committee regarding the transport of dangerous goods

Recognizing the importance of the work of the Committee of Experts on the Transport of Dangerous Goods and on the Globally Harmonized System of Classification and Labelling of Chemicals for the harmonization of codes and regulations relating to the transport of dangerous goods,

Bearing in mind the need to maintain safety standards at all times and to facilitate trade, as well as the importance of these issues to the various organizations responsible for modal regulations, while meeting the growing concern for the protection of life, property and the environment through the safe and secure transport of dangerous goods,

Noting the ever-increasing volume of dangerous goods being introduced into worldwide commerce and the rapid expansion of technology and innovation,

Recalling that, while the major international instruments governing the transport of dangerous goods by the various modes of transport and many national regulations are now better harmonized with the Model Regulations annexed to the Committee's recommendations on the transport of dangerous goods, further work on harmonizing these instruments is necessary to enhance safety and to facilitate trade, and recalling also that uneven progress in the updating of national inland transport legislation in some countries of the world continues to present serious challenges to international multimodal transport,

Noting with concern that, despite the recommendations contained in chapter 5.5 of the *Recommendations on the Transport of Dangerous Goods: Model Regulations*,⁹³ intended to alert workers involved in opening and unloading transport units containing general cargo that has been fumigated prior to shipment for phytosanitary purposes and who may be unfamiliar with the substantial risks of asphyxiation, intoxication and death when such units have not been ventilated, accidents during such operations are still reported in port areas and inland container depots,

1. *Expresses its appreciation* for the work of the Committee of Experts on the Transport of Dangerous Goods and on the Globally Harmonized System of Classification and Labelling of Chemicals with respect to matters relating to the transport of dangerous goods, including their security in transport;

2. *Requests* the Secretary-General:

(a) To circulate the new and amended recommendations on the transport of dangerous goods⁹⁴ to the Governments of Member States, the specialized agencies, the International Atomic Energy Agency and other international organizations concerned;

(b) To publish the seventeenth revised edition of the *Recommendations on the Transport of Dangerous Goods: Model Regulations*⁹⁵ and amendment 1 to the fifth revised edition of the *Recommendations on the Transport of Dangerous Goods*:

⁹³ United Nations publication, Sales No. E.09.VIII.2 and corrigendum.

⁹⁴ See ST/SG/AC.10/38/Add.1 and 2.

⁹⁵ United Nations publication, Sales No. E.11.VIII.1.

*Manual of Tests and Criteria*⁹⁶ in all the official languages of the United Nations, in the most cost-effective manner, no later than the end of 2011;

(c) To make those publications available on the website of the Economic Commission for Europe,⁹⁷ which provides secretariat services to the Committee, in book format and also as a CD-ROM;

3. *Invites* all Governments, the regional commissions, the specialized agencies, the International Atomic Energy Agency and the other international organizations concerned to transmit to the secretariat of the Committee their views on the Committee's work, together with any comments that they may wish to make on the recommendations on the transport of dangerous goods;

4. *Invites* all interested Governments, the regional commissions, the specialized agencies and the international organizations concerned to take into account the recommendations of the Committee when developing or updating appropriate codes and regulations;

5. *Invites*, in particular, the Governments of Member States, the International Labour Organization and the International Maritime Organization to draw the attention of authorities and other entities concerned with workplace safety to the warning, marking, documentation and training provisions contained in chapter 5.5 of the *Recommendations on the Transport of Dangerous Goods: Model Regulations*⁹³ or in the *International Maritime Dangerous Goods Code*, concerning fumigated cargo transport units, and to take appropriate steps to ensure their implementation and workers' awareness;

6. *Requests* the Committee to study, in consultation with the International Maritime Organization, the International Civil Aviation Organization, the regional commissions and the intergovernmental organizations concerned, the possibilities of improving the implementation of the Model Regulations on the transport of dangerous goods in all countries for the purposes of ensuring a high level of safety and eliminating technical barriers to international trade, including through the further harmonization of international agreements or conventions governing the international transport of dangerous goods;

7. *Invites* all Governments, as well as the regional commissions and organizations concerned, the International Maritime Organization and the International Civil Aviation Organization to provide feedback to the Committee regarding differences between the provisions of national, regional or international legal instruments and those of the Model Regulations, in order to enable the Committee to develop cooperative guidelines for enhancing consistency between these requirements and reducing unnecessary impediments; to identify existing substantive and international, regional and national differences, with the aim of reducing those differences in modal treatment to the greatest extent practical and ensuring that where differences are necessary they do not pose impediments to the safe and efficient transport of dangerous goods; and to undertake an editorial review of the Model Regulations and various modal instruments with the aim of improving clarity, user friendliness and ease of translation;

Bearing in mind also that the General Assembly, in its resolution 57/253 of 20 December 2002, endorsed the Johannesburg Plan of Implementation and requested the Economic and Social Council to implement the provisions of the Plan relevant to its mandate and, in particular, to promote the implementation of Agenda 21⁹⁹ by strengthening system-wide coordination,

Noting with satisfaction:

(a) That the Economic Commission for Europe and all United Nations programmes and specialized agencies concerned with chemical safety in the field of transport or of the environment, in particular the United Nations Environment Programme, the International Maritime Organization and the International Civil Aviation Organization, have already taken appropriate steps to amend or update their legal instruments in order to give effect to the Globally Harmonized System of Classification and Labelling of Chemicals or are considering amending them as soon as possible,

(c) That the Globally Harmonized System has been in force in Mauritius since 2004,¹⁰⁰

(d) That New Zealand, where the first edition of the Globally Harmonized System has been in use since 2001, is updating its national legislation in accordance with the provisions of the third revised edition,¹⁰⁰

(f) That in Serbia national legislation implementing the Globally Harmonized System entered into force on 18 September 2010,¹⁰⁰

(g) That in the United States of America, the Occupational Safety and Health Administration of the Department of Labor published on 30 September 2009 a proposed rule to modify its existing Hazard Communication Standard to conform with the third revised edition of the Globally Harmonized System,¹⁰⁰

(h) That implementation of the Globally Harmonized System has started in the Republic of Korea, Singapore and Viet Nam,¹⁰⁰

(i) That other Member States (e.g., Australia, Brazil, Canada, China, Japan, Malaysia, the Russian Federation, South Africa and Switzerland) participating in the activities of the Subcommittee of Experts on the Globally Harmonized System of Classification and Labelling of Chemicals are actively preparing revisions of national legislation or have developed or already issued standards applicable to chemicals in implementation of the Globally Harmonized System,¹⁰⁰

(j) That a number of United Nations programmes and specialized agencies and regional organizations, in particular the United Nations Institute for Training and Research, the International Labour Organization, the World Health Organization, the Economic Commission for Europe, the Asia-Pacific Economic Cooperation, the Organization for Economic Cooperation and Development, Governments, the European Union and non-governmental organizations representing the chemical industry, have organized or contributed to multiple workshops, seminars and other capacity-building activities at the international, regional, subregional and national levels in order to raise administration, health sector and industry awareness and to prepare for or support the implementation of the Globally Harmonized System,

Aware that effective implementation will require further cooperation between the Subcommittee of Experts on the Globally Harmonized System of Classification and Labelling of Chemicals and the international bodies concerned, continued efforts by the Governments of Member States, cooperation with the industry and other stakeholders, and significant support for capacity-building activities in countries with economies in transition and developing countries,

¹⁰¹ Commission Regulation (EC) No. 790/2009 of 10 August 2009, amending, for the purposes of its adaptation to technical and scientific progress, Regulation (EC) No. 1272/2008 of the European Parliament and of the Council on classification, labelling and packaging of substances and mixtures (*Official Journal of the European Union*, vol. 52, L 235 of 5 September 2009).

stability, democracy and good governance and the promotion and protection of human rights and fundamental freedoms, so as to ensure the achievement of Africa's social and economic objectives;

Narcotic Drugs and Psychotropic Substances of 1988 provide a fundamental global framework of international standards for States parties for preventing and combating money-laundering,

“Recalling its resolution 65/232 of 21 December 2010, on strengthening the United Nations crime prevention and criminal justice programme, and welcoming in particular the use of its technical cooperation capacity for preventing and countering the illicit flow of funds,

“Recognizing that the strengthening of national and international measures against the laundering of proceeds of crime derived from transnational organized crime, including, as appropriate, drug trafficking and related offences provided for in the United Nations Convention against Transnational Organized Crime, will contribute to weakening the economic power of criminal organizations,

“Recognizing also the pertinence of the review of implementation mechanisms for the United Nations Convention against Corruption to the prevention of illicit financial flows as well as to a possible mechanism or mechanisms for the implementation of the United Nations Convention against Transnational Organized Crime,

“4. *Also urges* Member States to consider taking all necessary measures to ensure that they do not provide a safe haven for wanted fugitives who have accumulated or are harbouring in their possession proceeds of crime derived from transnational organized crime, including, as appropriate, drug trafficking and related offences provided for in the United Nations Convention against Transnational Organized Crime, or who finance organized crime or criminal organizations, in particular by extraditing or prosecuting such fugitives, and urges Member States, in accordance with national laws and international law obligations, to fully cooperate with each other in this regard;

Prevention, protection and international cooperation against the use of new information technologies to abuse and/or exploit children

The Economic and Social Council,

Recalling General Assembly resolutions 55/63 of 4 December 2000, 56/121 of 19 December 2001 and 64/211 of 21 December 2009 concerning combating the criminal misuse of information technologies, as well as other relevant United Nations resolutions,

Reaffirming its resolution 2004/26 of 21 July 2004 entitled “International cooperation in the prevention, investigation, prosecution and punishment of fraud, the criminal misuse and falsification of identity and related crimes” and resolution 2007/20 of 26 July 2007 entitled “International cooperation in the prevention, investigation, prosecution and punishment of economic fraud and identity-related crime”,

Reaffirming also Commission on Crime Prevention and Criminal Justice resolution 16/2 of 27 April 2007 entitled “Effective crime prevention and criminal justice responses to combat sexual exploitation of children”,

Taking note of resolution 9, on computer-related crimes, adopted by the Eighth United Nations Congress on the Prevention of Crime and the Treatment of Offenders, in which States were called upon to intensify their efforts to more effectively combat computer-related abuses,

Taking into consideration the outcome of the Tenth United Nations Congress on the Prevention of Crime and the Treatment of Offenders on meeting the challenges of the twenty-first century in combating crime and promoting justice,

Underscoring the importance of paragraph 42 of the Salvador Declaration on Comprehensive Strategies for Global Challenges: Crime Prevention and Criminal Justice Systems and Their Development in a Changing World, adopted by the Twelfth United Nations Congress on Crime Prevention and Criminal Justice,¹⁴⁰ in which the Congress invited the Commission on Crime Prevention and Criminal Justice to consider convening an open-ended intergovernmental expert group to conduct a comprehensive study of the problem of cybercrime and responses to it by Member States, the international community and the private sector, and welcoming the meeting of that expert group held in Vienna from 17 to 21 January 2011,

Recognizing the work of the Commission in combating cybercrime,

Bearing in mind that the United Nations Convention against Transnational Organized Crime¹⁴¹ represents a major step forward in combating crimes relating to the use of new information and communications technologies,

Expressing concern that increasingly rapid technological advances have created new possibilities for the criminal misuse of new information and communications technologies,

Recalling the Convention on the Rights of the Child¹⁴² and the Optional Protocol to the Convention on the Rights of the Child on the sale of children, child prostitution and child pornography,¹⁴³

Reaffirming that the Worst Forms of Child Labour Convention, 1999 (No. 182), of the International Labour Organization requires States parties to take immediate and effective measures to secure the prohibition and elimination of the use, procuring or offering of a child for prostitution, for the production of pornography or for pornographic performances,

¹⁴⁰ General Assembly resolution 65/230, annex.

¹⁴¹ United Nations, *Treaty Series*, vol. 2225, No. 39574.

¹⁴² *Ibid.*, vol. 1577, No. 27531.

¹⁴³ *Ibid.*, vol. 2171, No. 27531.

Taking into account the fact that social spaces created using new information and communications technologies are heavily used by children for social interaction,

Stressing that new information and communications technologies and applications are being misused to commit child sexual exploitation crimes and that technical developments have permitted the appearance of crimes such as the production, distribution or possession of child sexual abuse images, audio or video, the exposure of children to harmful content, the grooming, harassment and sexual abuse of children and cyberbullying,

Bearing in mind the potential risks associated with certain content found on the Internet and virtual social networks and that easy contact with criminals online may affect the integral development of children,

Noting that, as a result of the technological advances of recent years, material that violates the integrity and rights of children is available to an increasing number of persons,

Expressing concern that new information and communications technologies have made it possible for criminals to contact children easily and in ways that were not previously possible,

Aware that new information and communications technologies make it possible to construct false identities that facilitate the abuse and/or exploitation of children by criminals,

Reaffirming that children should be afforded the same protection in cyberspace as in the physical world,

Underscoring the importance of cooperation between States and the private sector in combating the use of new information and communications technologies to abuse and/or exploit children,

Underscoring also the importance of international cooperation and coordination in effectively combating the criminal misuse of new information and communications technologies for the purpose of abusing and/or exploiting children,

Recognizing that gaps in the access to and use of new information and communications technologies by States can diminish the effectiveness of international cooperation in combating the use of those technologies to abuse and/or exploit children,

Noting the thematic discussion entitled “Protecting children in a digital age: the misuse of technology in the abuse and exploitation of children” held by the Commission on Crime Prevention and Criminal Justice at its twentieth session,

1. *Urges* those States that have not yet done so to consider ratifying the Convention on the Rights of the Child¹⁴² and the Optional Protocol to the Convention on the Rights of the Child on the sale of children, child prostitution and

child pornography,¹⁴³ the Worst Forms of Child Labour Convention, 1999 (No. 182), of the International Labour Organization, the United Nations Convention against Transnational Organized Crime¹⁴¹ and the Protocol to Prevent, Suppress and Punish Trafficking in Persons, Especially Women and Children, supplementing the United Nations Convention against Transnational Organized Crime;¹⁴⁴

4. *Urges* Member States to adopt measures, including, where appropriate, legislation, designed to criminalize all aspects of the misuse of technology to commit child sexual exploitation crimes and to consider, in accordance with national and international law, appropriate measures to detect and remove known child sexual abuse images from the Internet and to facilitate the identification of those responsible for the abuse and/or exploitation of children;

5. *Encourages* Member States to promote the creation and application of adequate verification measures to protect children online;

8. *Encourages* Member States to incorporate in their national legislation, in conformity with their legal systems, measures for saving and ensuring rapid access to electronic data during criminal investigations relating to the use of new information and communications technologies to abuse and/or exploit children;

9. *Urges* Member States to provide adequate resources to carry out their tasks effectively to the offices responsible for investigating and prosecuting the perpetrators of crimes committed using new information and communications technologies to violate the rights of the child;

¹⁴⁴ Ibid., vol. 2237, No. 39574.

¹⁴⁵ The terms “child” and “children” refer to boys, girls and adolescents.

10. *Encourages* Member States to implement awareness-raising activities to provide children with information on the mechanisms through which they can seek protection and assistance and report cases of abuse and/or exploitation in spaces created using new information and communications technologies, as well as awareness-raising activities aimed at parents and educators to prevent such crimes;

11. *Invites* Member States to implement effective reporting mechanisms whereby their citizens can report websites and/or virtual activities related to child sexual exploitation crimes;

12. *Urges* Member States to conduct campaigns to raise awareness among the general public of the risks of misuse of new information and communications technologies;

13. *Encourages* Member States to create and implement mechanisms for the appropriate authority to identify children who are abused and/or exploited through new information and communications technologies and to establish procedures for protecting them;

14. *Urges* Member States to promote the drafting and adoption of codes of conduct and other mechanisms of corporate social responsibility for Internet service providers, mobile telephone companies, Internet cafes and other relevant key actors;

16. *Also requests* the United Nations Office on Drugs and Crime, taking into account, where appropriate, relevant data collected by the expert group, to design and carry out an assessment of the needs of States for training in the investigation of offences against children committed by using new information and communications technologies and, on the basis of the results of that survey, to design a training and technical assistance programme to assist Member States in combating such offences more effectively, subject to the availability of resources and not duplicating the efforts of the International Criminal Police Organization (INTERPOL);

17. *Urges* Member States to increase their coordination and cooperation and to exchange information regarding good practices and successful experiences in combating the use of new information and communications technologies to abuse and/or exploit children;

18. *Encourages* Member States to take advantage of the knowledge and efforts, as well as the prevention initiatives, of the United Nations, other international organizations, regional organizations, civil society and the private sector to combat the criminal misuse of new information and communications technologies;

Commending, in that regard, the efforts of the Palestinian Authority to improve the economic and social situation in the Occupied Palestinian Territory, especially in the areas of governance, the rule of law and human rights, livelihoods and productive sectors, education and culture, health, social protection, infrastructure and water,

Gravely concerned, in that regard, about the accelerated construction of settlements and implementation of other related measures by Israel in the Occupied Palestinian Territory, particularly in and around occupied East Jerusalem, as well as in the occupied Syrian Golan, in violation of international humanitarian law and relevant United Nations resolutions,

Expressing deep concern about the rising incidence of violence, harassment, provocation and incitement by illegal armed Israeli settlers in the Occupied Palestinian Territory, including East Jerusalem, against Palestinian civilians, including children, and their properties, including historic and religious sites, and agricultural lands,

Gravely concerned by the serious repercussions on the economic and social conditions of the Palestinian people caused by Israel's construction of the wall and its associated regime inside the Occupied Palestinian Territory, including in and around East Jerusalem, and the resulting violation of their economic and social rights, including the right to work, to health, to education, to property, to an adequate standard of living and to freedom of access and movement,

Expressing grave concern also over the continuing and intensifying policy of home demolitions, evictions and revocation of residency rights, which have caused the further displacement of the Palestinian population in and around occupied East Jerusalem, as well as measures to further isolate the city from its natural Palestinian environs, including through the accelerated construction of settlements, the construction of the wall, the confiscation of land and the continued imposition of checkpoints, which have seriously exacerbated the already critical socio-economic situation being faced by the Palestinian population,

Taking note of recent developments regarding the situation of access to the Gaza Strip, although grave hardships continue to prevail as a result of the prolonged Israeli closures and severe economic and movement restrictions that in effect amount to a blockade, and calling in that regard for the full implementation of Security Council resolution 1860 (2009) of 8 January 2009 with a view to ensuring the full opening of the border crossings for the sustained and regular movement of persons and goods, including humanitarian aid, commercial flows and construction materials,

Deploring the heavy casualties among civilians, including hundreds of children and women, the internal displacement of thousands of civilians and widespread damage to homes, vital civilian infrastructure, hospitals, schools, food supply installations, economic, industrial and agricultural properties, and several United Nations facilities in the Gaza Strip, which have a grave impact on the provision of vital health and social services to Palestinian women and their families, and on their socio-economic living conditions, all caused by the military operations in December 2008 and January 2009,

Recalling, in that regard, the relevant United Nations reports, including those of the Economic and Social Council, the Economic and Social Commission for Western Asia and the Human Rights Council,

Expressing deep concern about the short- and long-term detrimental impact of such widespread destruction and the hampering of the reconstruction process by Israel, the occupying Power, on the socio-economic and humanitarian conditions of the Palestinian civilian population in the Gaza Strip, and calling in that regard for the immediate acceleration of the reconstruction process in the Gaza Strip with the assistance of the donor countries, including the disbursement of funds pledged at the International Conference in Support of the Palestinian Economy for the Reconstruction of Gaza, held in Sharm el-Sheikh, Egypt, on 2 March 2009,

Gravely concerned at various reports of the United Nations and specialized agencies regarding the substantial aid dependency caused by prolonged border closures, inordinate rates of unemployment, widespread poverty and severe humanitarian hardships, including food insecurity and rising health-related problems, including high levels of malnutrition, among the Palestinian people, especially children, in the Occupied Palestinian Territory, including East Jerusalem,

Expressing grave concern at the deaths and injuries caused to civilians, including children, women and peaceful demonstrators, and emphasizing that the Palestinian civilian population must be protected in accordance with international humanitarian law,

Emphasizing the importance of the safety and well-being of all civilians, and calling for the cessation of all acts of violence, including all acts of terror, provocation, incitement and destruction, and all firing of rockets,

Expressing deep concern that thousands of Palestinians, including hundreds of children and women, continue to be held in Israeli prisons or detention centres under harsh conditions,

Commending the important work being done by the United Nations, the specialized agencies and the donor community in support of the economic and social development of the Palestinian people in line with their national development and State-building plan, which is to be completed by the end of August 2011, as well as the assistance being provided in the humanitarian field,

Recognizing the efforts being undertaken by the Palestinian Authority, with international support, to rebuild, reform and strengthen its damaged institutions and promote good governance, and emphasizing the need to preserve the Palestinian national institutions and infrastructure and to ameliorate economic and social conditions,

Welcoming in that regard, and calling upon the international community to continue its strong support for, the plan of the Palestinian Authority entitled "Palestine: Ending the Occupation, Establishing the State", for constructing the institutions of a Palestinian State by September 2011,
