

Security Council

Distr.: General
10 July 2019

Original: English

Note by the President of the Security Council

At its 7488th meeting, held on 20 July 2015 in connection with the item entitled “Non-proliferation”, the Security Council adopted resolution [2231 \(2015\)](#).

In paragraph 4 of the resolution, the Security Council requested the Director General of the International Atomic Energy Agency to provide regular updates to the Council on the implementation by the Islamic Republic of Iran of its commitments under the Joint Comprehensive Plan of Action and to report at any time any issue of concern directly affecting fulfilment of those commitments.

Accordingly, the President herewith circulates the report of the Director General dated 8 July 2019 (see annex).

Annex

**Letter dated 8 July 2019 from the Director General of the
International Atomic Energy Agency addressed to the President of
the Security Council**

I have the honour to enclose herewith the document submitted to the Board of Governors of the International Atomic Energy Agency (see enclosure).

I should be grateful if you would bring the present letter and its enclosure to the attention of all members of the Security Council.

(Signed) Yukiya **Amano**

Enclosure

[Original: Arabic, Chinese, English, French, Russian and Spanish]

Verification and monitoring in the Islamic Republic of Iran in light of United Nations Security Council resolution 2231 (2015)

Report by the Director General

1. This report of the Director General to the Board of Governors and, in parallel, to the United Nations Security Council (Security Council), is on the Islamic Republic of Iran's (Iran's) implementation of its nuclear-related commitments under the Joint Comprehensive Plan of Action (JCPOA) in relation to the level to which it is enriching uranium. It provides an update on developments since the Director General's previous reports.¹

Activities Related to Enrichment

2. On 7 July 2019, Iran provided the Agency with updated design information indicating that the enrichment level of the UF₆ product is up to 5% U-235 at the Fuel Enrichment Plant (FEP) at Natanz. On 8 July 2019, Iran informed the Agency that, based on the operator's assessment, the enrichment level of the UF₆ product at FEP "is about 4.5%".

3. On 8 July 2019, the Agency, using its on-line enrichment monitors, verified that Iran was enriching UF₆ above 3.67% U-235 at FEP.² On the same date, the Agency took samples of the UF₆ product for analysis.
