National plan of action

The Dominican Republic engages in a continuous review process to determine the domestic legislation that is required to complement existing legislation with a view to ensuring the full implementation of Security Council resolution 1540 (2004). It should be noted, however, that in order to comply effectively with its requirements, it has been proposed to establish an Interagency Commission comprising government agencies with jurisdiction in this area, to analyse and identify the regulations in effect within their respective fields of activity. Once this compliance review has been completed by the Interagency Commission, an additional report will be submitted to the Security Council Committee established pursuant to resolution 1540 (2004) and the necessary action identified by each Government agency, including the adoption of regulations on national implementation, will gradually be coordinated.

Need for international assistance

While the Dominican Republic is engaged in an ongoing process to ensure that it meets international requirements, it must continue to receive advice and technical support in some related areas from international organizations, including the United Nations Office on Drugs and Crime and the group of experts of the Security Council Committee established pursuant to resolution 1540 (2004).

Conclusion

The Government of the Dominican Republic is pleased to submit this report and reiterates its intention to continue taking the necessary steps to transmit another report in the near future detailing more precisely the existing domestic legislation on the matter in question and progress on further action taken by the Government for the implementation of Security Council resolution 1540 (2004).
