## **I. Introduction**

Since the creation of the Republic, one of the fundamental pillars of Peru's foreign policy has been the promotion of international peace and security. Our historic performance shows that we have always supported measures aimed at achieving disarmament in all its aspects, preventing proliferation, promoting the pacific settlement of disputes and improving understanding and mutual trust among members of the international community.

Accordingly, Peru supported the creation of the International Atomic Energy Agency, the Organization for the Prohibition of Chemical Weapons and the Comprehensive Nuclear-Test-Ban Treaty Organization and actively participates in each of them. It has also signed most of the international instruments in this area, in order to help ensure that nuclear materials, chemical substances and biological agents are used for peaceful purposes and, at the same time, to prevent them from being diverted for military purposes.

This supplementary national report on resolution 1540 (2004) further demonstrates our commitment to disarmament and the non-proliferation of weapons of mass destruction and thereby contributes to the promotion of international peace and security.

## **II. Executive summary**

At the outset, it is important to stress that Peru does not possess, and does not intend to possess, any weapons of mass destruction. It has stated this position on various occasions, in both a regional and a subregional context.

Accordingly, the Conference of Ministers for Foreign Affairs and of Defence of the Andean Community adopted the Lima Commitment-Andean Charter for Peace and Security and the limitation and control of foreign defence spending (17 June 2002), chapter VII of which concerns commitments to consolidate the ban on nuclear, chemical and biological weapons.

Through the Declaration regarding a South American peace zone (July 2002), Peru once again demonstrated its desire to contribute towards the eradication of weapons of mass destruction, for this Declaration explicitly bans the siting, development, manufacture, deployment, testing, and use of any type of mass-destruction weapon, as well as the transport of such weapons through the countries of the region.

On the occasion of the 2003 Declaration on Security in the Americas, Peru reaffirmed its commitment to strengthening peace, in a context of consolidating the policy of banning weapons of mass destruction and establishing peace zones.

Likewise, one of the main objectives of the Andean Community's Declaration of San Francisco de Quito on the Establishment and Development of the Andean Zone of Peace is to contribute to the effective prohibition of weapons of mass destruction and their passage through the Andean region.

Lastly, and more specifically, through the joint ministerial statement in support of the Comprehensive Nuclear-Test-Ban Treaty (September 2004), Peru reaffirmed its backing of the Treaty, as a way of eliminating nuclear testing and contributing to

the progressive reduction of nuclear weapons and the prevention of nuclear proliferation.

Peru therefore recognizes the need to adopt legal and administrative measures aimed at fulfilling its obligations under resolution 1540 (2004). Accordingly, it has conducted and continues to conduct a series of multilateral and national activities relating to the non-proliferation of weapons of mass destruction, as outlined below.

**1. Legislation on weapons, their means of delivery and related materials in the nuclear field**

**(a) Background**

The international community has made considerable progress in this area. Peru's commitment to this effort is demonstrated by the fact that it has ratified or acceded to instruments of international law of both regional and international scope.

Accordingly, the Treaty on the Non-Proliferation of Nuclear Weapons (NPT), which was adopted on 1 July 1968 and entered into force on 5 March 1970, was ratified by Peru on 6 February 1970. Likewise, the Treaty for the Prohibition of Nuclear Weapons in Latin America and the Caribbean (Treaty of Tlatelolco) entered into force for Peru on 4 March 1969.

In accordance with article III of the NPT, each non-nuclear-weapon State party to the Treaty (the case of Peru) undertakes to conclude safeguards agreements with the International Atomic Energy Agency (IAEA). Thus, in 1979 Peru concluded an Agreement for the Application of Safeguards with IAEA, and in 2000 it signed a Protocol Additional to the Agreement for the Application of Safeguards, which it ratified in 2001.

Peru actively participated in the preparatory process and in the NPT Review and Extension Conference held in New York from 17 April to 12 May 1995, at which it was decided to extend the NPT indefinitely and strengthen the periodic review process. Those decisions were based on the conviction that the NPT is the cornerstone of the global nuclear non-proliferation regime.

In the same spirit, and in order to establish the preservation of international peace and security as one of the priority and defining areas of its foreign policy, Peru has acceded to the following related international instruments:

- Vienna Convention on Civil Liability for Nuclear Damage (1963);
- Convention on the Physical Protection of Nuclear Material (1980);
- Convention on Early Notification of a Nuclear Accident (1986);
- Convention on Assistance in the Case of a Nuclear Accident or Radiological Emergency (1986);
- Protocol for the Protection of the South-East Pacific against Radioactive Contamination (1989);
- Convention on Nuclear Safety (1994);
- Joint Convention on the Safety of Spent Fuel Management and on the Safety of Radioactive Waste Management (1997); and

- Regional Cooperative Agreement for the Promotion of Nuclear Science and Technology in Latin America and the Caribbean (ARCAL) (1998).

**(b) Implementing legislation**

Act No. 28627 of 22 November 2005 added a new paragraph to article 279-A of the Penal Code making a whole series of acts relating to weapons of war punishable by law. Work is now under way on a draft general law on weapons, munitions, explosives and related materials, which is expected to incorporate a classification of weapons of war covering weapons of mass destruction [chemical, nuclear and biological]. This would enable the State, acting within the national legal framework, to penalize acts which, following the entry into force in Peru of international non-proliferation treaties, would be considered illegal.

In the area of related materials, as defined by Security Council resolution 1540 (2004), Peru has a wide array of legislation:

- Regulations pertaining to nuclear safeguards (1989);
- Regulations pertaining to radiological safety (1997);
- Regulations concerning Physical Protection of Nuclear Materials and Facilities (2002);
- Act No. 27757 prohibiting imports of goods, machinery and equipment that use radioactive sources (2002);
- Act No. 28028 governing the use of sources of ionizing radiation (2003);
- Regulations concerning authorizations, monitoring, control, violations and penalties relating to Act No. 28028 (2003); and
- Regulations pertaining to Act. No. 27757 establishing a control mechanism for the import of sources of ionizing radiation (2004).

The Peruvian Nuclear Energy Institute (IPEN) has accumulated over 25 years' worth of experience in the research and development of nuclear energy and related areas. Furthermore, in accordance with Act No. 28028 governing the use of sources of ionizing radiation, it is the national authority responsible for regulating, authorizing, controlling and monitoring the use of sources of ionizing radiation relating to radiological and nuclear safety, physical protection and nuclear safeguards within the national territory.

The Institute is also responsible for monitoring the safe use of sources of ionizing radiation, in close cooperation with IAEA.

**2. Legislation on weapons, their means of delivery and related materials in the chemical field**

**(a) Background**

Peru is a State party to the Convention on the Prohibition of the Development, Production, Stockpiling and Use of Chemical Weapons and on Their Destruction (Chemical Weapons Convention) following its accession on 14 January 1993. The Convention entered into force on 29 April 1997.

**(b) Implementing legislation**

In order to comply with this international instrument, in October 1996 the Peruvian legislature adopted Act No. 26672 establishing the National Council for the Prohibition of Chemical Weapons (CONAPAQ), which in article 2 establishes CONAPAQ as the National Authority referred to in article VII, paragraph 4, of the Chemical Weapons Convention and designates the institutions that comprise it.

This Act also incorporates the prohibitions referred to in the Convention and the corresponding penalties by introducing a new provision in the Penal Code (article 279-A).

With the clear aim of refining the systems for controlling sensitive materials and technologies, the Peruvian legislature incorporated the substances regulated by the Convention into the Customs Tariffs Nomenclature. Supreme Decree No. 119-97 then established specific tariff subheadings for those substances.

CONAPAQ is currently working on a draft law on measures for the control of chemical substances that could be diverted for the manufacture of chemical weapons, the objective of which is to establish the requisite measures to give full effect to the provisions of the Chemical Weapons Convention. Even though the draft law has yet to go through the internal adoption process, its provisions have been included in the corresponding sections of the matrix, under "Remarks", for reference.

**3. Legislation on weapons, their means of delivery and related materials in the biological field**

**(a) Background**

Peru is a State party to the Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction, having signed it on 10 April 1972 and deposited its instrument of ratification on 5 June 1985.

**(b) Implementing legislation**

Peru has made huge strides in the field of biosafety. Following its accession to the Convention on Biological Diversity (1993) and the Cartagena Protocol on Biosafety to the Convention on Biological Diversity (2000), Peru addressed the question of the implementation of each instrument within the national legal framework.

Accordingly, by Act No. 27104 (12 May 1999) on preventing the risks associated with the use of biotechnology, Peru regulated biosafety, establishing the general rules applicable to activities relating to investigation, production, introduction, handling, transport, storage, conservation, exchange, sale, confined use and release of living modified organisms (LMOs), under controlled conditions.

One of the key provisions of this Act is article 12, which explicitly bans the use of LMOs in biological weapons and in practices that are harmful to the environment and human health.

Regulations for the Act were subsequently established by Supreme Decree No. 108-2002-PCM. Currently, consideration is being given to the implementation of sectoral directives governing each of the activities covered by the Act and its regulations.

### III. Matrix relating to the supplementary national report on resolution 1540 (2004)

## Enclosure

[Original: Spanish]

### OP 2 — Biological Weapons (BW)

**State:** Peru  
**Date of report:** 19 April 2006

Does national legislation exist which prohibits persons or entities to engage in one of the following activities? Can violators be penalized?		National legal framework		Enforcement: civil/criminal penalties and others		Remarks
		YES	If YES, indicate source document of national implementation law	YES	If YES, indicate source document	
1	Manufacture/produce		*		*	
2	Acquire					
3	Possess		*		*	
4	Stockpile/store		*		*	
5	Develop					
6	Transport					
7	Transfer					
8	Use					
9	Participate as an accomplice in a.m. activities					
10	Assist in a.m. activities				*	
11	Finance a.m. activities					
12	A.m. activities related to means of delivery					
13	Involvement of non-State actors in a.m. activities					
14	Other					

\* The previous national report of Peru, of 1 November 2004, contained in document S/AC.44/2004/(02)/60, wrongly identified Legislative Decree No. 898 (Act prohibiting the possession of weapons of war) as a law prohibiting the manufacture, production, possession and stockpiling of biological and nuclear weapons, whereas in fact this Act concerns conventional weapons. Likewise, and for the same reason, the reference to article 279 of the Penal Code as a provision penalizing such activities was incorrect.

## OP 2 — Chemical Weapons (CW)

State:

Peru

Date of report:

19 April 2006

Does national legislation exist which prohibits persons or entities to engage in one of the following activities? Can violators be penalized?		National legal framework		Enforcement: civil/criminal penalties and others		Remarks
		YES	If YES, indicate source document of national implementation law	YES	If YES, indicate source document	
1	Manufacture/produce	X	<p><b>Act No. 26672 of 20 October 1996, establishing the National Council for the Prohibition of Chemical Weapons (CONAPAQ)</b></p> <p><b>Article 4</b> provides that no person shall:</p> <p>(a) Develop, produce or otherwise acquire, stockpile, own, possess or retain chemical weapons, or transfer chemical weapons to anyone, whether directly or indirectly;</p> <p>(b) Use chemical weapons;</p> <p>(c) Initiate military preparations for the use of chemical weapons;</p> <p>(d) Assist, encourage or induce in any way any person to carry out any activity prohibited to States parties by the Chemical Weapons Convention;</p> <p>(e) Transfer or receive from any person in a non-State party any chemicals listed in Schedules 1 and 2 of the Convention's Annex on Chemicals.</p>	X	<p><b>Article 279-A of the Penal Code</b></p> <p>“Any person who produces, develops, trades in, stockpiles, sells, acquires, uses or possesses chemical weapons — in violation of the prohibitions established in the Chemical Weapons Convention adopted by the United Nations in 1992 — or who transfers chemical weapons to another party, or promotes, supports or facilitates the commission of such acts shall be sentenced to imprisonment for a term of no less than five and no more than 20 years”</p>	<p><b>Draft law on measures for the control of chemical substances that could be diverted for the manufacture of chemical weapons</b></p> <p><b>Art. 24:</b> Sets forth prohibitions relating to Schedule 1, stating that no person shall:</p> <p>(a) Produce, acquire, retain, transfer or use toxic chemicals and their precursors listed in Schedule 1, except for the purposes set forth in part VI, section A, paragraph 2, of the Verification Annex;</p> <p>(b) Pass on to a third State toxic chemicals and their precursors listed in Schedule 1 that have been transferred to Peru;</p>

13	Involvement of non-State actors in a.m. activities					
14	Other					

\* The previous national report of Peru, of 1 November 2004, contained in document S/AC.44/2004/(02)/60, wrongly identified Legislative Decree No. 898 (Act prohibiting the possession of weapons of war) as a law prohibiting the manufacture, production, possession and stockpiling of biological and nuclear weapons, whereas in fact this Act concerns conventional weapons. Likewise, and for the same reason, the reference to article 279 of the Penal Code as a provision penalizing such activities was incorrect.

# **OP 3 (a) and (b) — Account for/Secure/Physically protect BW including Related Materials**

**State:** Peru
