**Summary report presented by Jordan to the Security Council regarding implementation of Security Council resolution [2270 \(2016\)](#) on the imposition of heightened sanctions against the Democratic People's Republic of Korea**

**Background**

Jordan long ago established a national committee that brings together the ministries and competent national agencies responsible for following up implementation of the Security Council resolutions that impose sanctions against specific States, entities or individuals. That committee must inform the Ministry of Foreign Affairs of any measures taken, so that the necessary reports can be drafted and presented regularly to the Security Council.

**Follow-up by the national sanctions committee of the implementation of Security Council resolution [2270 \(2016\)](#)**

The reports presented by this committee to the Ministry of Foreign Affairs have not contained any indication that it has addressed any matter or situation related to the sanctions imposed on the Democratic People's Republic of Korea since the adoption of resolution [2270 \(2016\)](#) on 2 March 2016. There was, however, a single situation in which it was suspected that one of the resolution's provisions might have been violated. The Ministry of Foreign Affairs, in cooperation with the Ministry of Transport, addressed the matter and the case was closed. In June 2016, the Ministry of Foreign Affairs was informed that two vessels operated by a Jordanian company were flying the flag of the Democratic People's Republic of Korea. Upon enquiry, the company stated that it did not operate those vessels, but they were, rather, operated by companies that belonged to non-Jordanian owners. The company added that it dealt with those vessels only with regard to the implementation of the International Safety Management Code. However, in order to ensure implementation of resolution 2270 (2016), the company contacted the non-Jordanian owners of the vessels, and the flag of the vessel *Aliman* was changed. A certificate confirming the deflagging of that vessel will be obtained from the relevant registration office. The owner of the vessel *Bassant*, which is currently undergoing repairs in dry dock, will also do the same before returning it to operation. The Ministry of Transport has been instructed to follow up this case and obtain copies of the deflagging certificates.

It should also be noted that, according to Jordan Customs, all items imported from or exported to the Democratic People's Republic of Korea are processed through the red channel and thus subject to physical inspection.
