Bulgaria has consistently continued its efforts to implement all restrictive measures imposed on the Democratic People's Republic of Korea by the Security Council and transposed by the European Union in its legal acts.

The Republic of Bulgaria and the other European Union member States have jointly implemented the additional restrictive measures imposed on the Democratic People's Republic of Korea by the Security Council in its resolution [2371 \(2017\)](#) by adopting the following legal acts:

- Council Implementing Decision (CFSP) 2017/1459 of 10 August 2017 implementing Decision (CFSP) 2016/849 concerning restrictive measures against the Democratic People's Republic of Korea
- Commission Implementing Regulation (EU) 2017/1457 of 10 August 2017 amending Council Regulation (EC) No. 329/2007 concerning restrictive measures against the Democratic People's Republic of Korea

At the national level, the competent Bulgarian authorities have taken the steps below to implement the restrictive measures imposed.

The Bulgarian National Customs Agency directly and fully applies the European Union and national legislation concerning the restrictive measures imposed on the Democratic People's Republic of Korea by the Security Council in its resolution [2371 \(2017\)](#).

In addition to the directly applicable European Union legislation, detailed administrative guidelines are always elaborated for customs officers.

Risk profiles have also been created. They impose mandatory inspections of all cargo within or transiting through the territory of Bulgaria that has originated in or is destined for the Democratic People's Republic of Korea, or is being transported on aircrafts and vessels flagged, or in vehicles registered by, that country. The risk profiles also cover obligatory checks of all cargo that has originated in or is destined for the Democratic People's Republic of Korea, or is being transported on means of transport, including rail and road transport, registered by that country.

In June 2017, two representatives of the Bulgarian National Customs Agency took part in a training-of-trainers course for customs training institutions on the modules of the Convention on the Prohibition of the Development, Production, Stockpiling and Use of Chemical Weapons and on Their Destruction. Several courses have been planned for customs officers that will cover the following topics: European and national legislation and regulations concerning trade control of dual-use chemicals; the Chemical Weapons Convention and monitored chemicals; tools for the identification of scheduled chemicals under the Chemical Weapons Convention;

customs control of chemical shipments; transfer provisions under the Chemical Weapons Convention; reporting of the import and export of chemicals under the Chemical Weapons Convention and common problems; and group discussions with practical exercises using real-life situations.

The Bulgarian Ministry of Interior has imposed travel bans in accordance with Security Council resolution [2371 \(2017\)](#).

The Ministry of Economy has taken the necessary measures to apply additional sanctions within its sphere of competence.

The most important measures taken include:

- Publication on the official website of the Ministry of Economy of detailed information regarding the newly imposed sanctions, with a particular focus on: the total export ban on coal, iron and iron ore, lead and lead ore and seafood, the introduction of a ceiling on work permits for workers from the Democratic People's Republic of Korea and the ban on setting up new joint ventures with structures or citizens of the Democratic People's Republic of Korea
- A recommendation has been sent to the Bulgarian Small and Medium Enterprises Promotion Agency to share detailed information with Bulgarian companies and business circles on the newly imposed sanctions
- Detailed information has been provided in response to a letter, dated 1 June 2017, from the Panel of Experts established pursuant to Security Council resolution [1874 \(2009\)](#).

There is also ongoing monitoring of cross-border transactions to prevent and block operations related to the ordering or receiving of transfers to or from accounts of citizens of the Democratic People's Republic of Korea who are subject to targeted financial sanctions. Checks are performed automatically through specialized information systems.
