**Possible Elements for a Future International Legal Agreement  
on the Prevention of the Deployment of Weapons in Outer Space,  
the Threat or Use of Force Against Outer Space Objects**

**I. Possible Name of Such Agreement**

Treaty on the Prevention of the Deployment of Weapons in Outer Space, the threat or Use of Force Against Outer Space Objects

**II. Preamble**

Outer space is the common heritage of mankind and plays an ever-increasing role in its future development.

There exists a potential danger of an armed confrontation and combatant activities being extended to outer space.

The prevention of the deployment of weapons and an arms race in outer space becomes a pressing task facing the international community.

The United Nations General Assembly has adopted a series of resolutions on peaceful use of outer space and prevention of an arms race in outer space, which have provided a prerequisite and basis for the prevention of the deployment of weapons and an arms race in outer space.

The existing agreements on arms control and disarmament relevant to outer space, including those bilateral ones, and the existing legal regimes concerning outer space have played a positive role in the peaceful use of outer space and in regulating outer space activities. These agreements and legal regimes should be strictly complied with. However, they are unable to effectively prevent the deployment of weapons and an arms race in outer space.

For the benefit of mankind, outer space shall be used for peaceful purposes, and it shall never be allowed to become a sphere of military confrontation.

Only a treaty-based prohibition of the deployment of weapons in outer space and the prevention of the threat or use of force against outer space objects can eliminate the emerging threat of an arms race in outer space and ensure the security for outer space assets of all countries which is an essential condition for the maintenance of world peace.
